|   |  |  |  |  |

Defendants and Counterclaim Plaintiffs Rivos Inc., Wen Shih-Chieh a/k/a Ricky Wen, Jim
 Hardage, Weidong Ye, Laurent Pinot, Prabhu Rajamani and Kai Wang (together, "Counterclaim
 Plaintiffs") allege the following counterclaims, based on personal knowledge as to their own
 actions, and otherwise on information and belief, against Plaintiff and Counterclaim Defendant
 Apple Inc. as follows:

6

#### NATURE OF THE ACTION

7 1. Afraid of any threat of legitimate competition in the marketplace, and hoping to 8 frighten and send a message to any employees who might dare to leave Apple to work somewhere 9 else, Apple has resorted to trying to thwart emerging start-ups through anticompetitive measures, 10 including illegally restricting employee mobility. Counterclaim Plaintiffs bring these counterclaims 11 because Apple has sought to impose overreaching obligations on its employees so that Apple can 12 anticompetitively retaliate against them and any future employer of theirs if they dare to exercise 13 their right to leave Apple to obtain employment elsewhere—especially when the employees choose to join a start-up that Apple perceives as a potential competitor. 14

2. Apple is relentless in these efforts. It forces its employees to sign contracts with
provisions that run afoul of California law as a condition of their employment. These contracts
purport to prohibit employees from retaining *anything* from their time at Apple—even general
know-how that is not trade secret—and contain other provisions that are unenforceable because they
violate California public policy. And yet Apple still wields these provisions to scare current and
former employees into submission, and to chill activity that California law expressly allows.

3. Apple has no regard for employee rights or privacy in carrying out this
anticompetitive scheme. Even when Apple knows its employees are leaving to work somewhere
that Apple (rightly or wrongly) perceives as a competitive threat, it does not consistently conduct
exit interviews or give employees any meaningful instruction about what they should do with
supposedly "confidential" Apple material upon leaving. Whether by neglect or as part of a planned
effort to generate a pretextual basis to sue the employees and their new employer for "stealing"
Apple material, Apple lets these employees walk out the door with material they may have

-1

28

Case No. 5:22-CV-2637-PCP

inadvertently "retained" simply by using the Apple systems (such as iCloud or iMessage) that Apple
 effectively mandates they use as part of their work.

3 4. Then as soon as the employee is out the door, Apple scours any and all personal information it can find in order to make out some case of "retention" of Apple material so that 4 5 Apple can set an example of the former employees and their new employers, which Apple then uses to intimidate any Apple employees who might think to leave. Without making any effort to shield 6 7 or protect employees' personal information, Apple (or third parties it hires to do the work) looks 8 through current and former employees' personal iCloud accounts, personal iMessages, personal 9 Time Machine backups, personal web search histories, and more-then Apple weaponizes whatever 10 it finds against the employees and their new employers.

5. 11 Rivos is one such promising startup that caught Apple's ire, even though Rivos does not compete with Apple for anything except hiring talented engineers. Unlike Apple, which 12 13 develops Systems on a Chip ("SoCs") for consumer-based products using architecture it licenses from ARM, Rivos is developing next-generation SoCs for use in servers based on the open-source 14 15 RISC-V architecture. After learning of Rivos in May 2021, Apple immediately began strategizing 16 to thwart its growth and to prevent any Apple employees from leaving to pursue promising 17 opportunities at Rivos. Apple knew that Rivos was funded by two investors who had funded 18 NUVIA, another start-up co-founded by a former Apple Senior Director of Platform Architecture 19 against whom Apple had deployed the same anticompetitive playbook. Concerned that Rivos would 20become NUVIA 2.0, Apple set out to stop Rivos, and the employees who chose to leave Apple to 21 join Rivos, from ever getting a product to the marketplace.

6. To support its campaign against Rivos and the former Apple employees Rivos hired,
Apple has invoked unlawful and unenforceable provisions of its Intellectual Property Agreement
(the "Apple IPA" (*see, e.g.*, Dkt. 256-1)) that fly in the face of California law and strong, important
California policy. These counterclaims seek to prevent Apple from stifling employee mobility
under the guise of enforcing an illegal and unenforceable contract that Apple foists on its
employees.

7. Apple does not hide its anger that over 50 former Apple employees chose to leave 1 2 their positions at Apple, for a variety of personal and individual reasons, to pursue promising new 3 opportunities at Rivos. And, as one would expect and as California law expressly encourages, these 4 former Apple employees pursued jobs at Rivos that would make use of their skills and know-how 5 that they developed throughout their careers, including long before they started at Apple. But Apple is desperate to punish Apple employees for leaving, and also to threaten other Apple employees who 6 7 might think to leave, and Apple uses the Apple IPA as its primary weapon in this effort-including 8 against Wen, Hardage, Ye, Pinot, Rajamani, and Wang, all of whom Apple demanded sign the 9 Apple IPA as a condition of working at Apple. And, in exchange for no consideration at all, Apple required that they sign it again, by way of a purported "exit checklist" when they left Apple. 10

8. To conceal its true anticompetitive motives, Apple asserts that the Apple IPA merely
prohibits employees from retaining or using information that Apple supposedly owns and that the
employees are not allowed to keep. Not so. In violation of California law and public policy, the
Apple IPA is so expansive as to cover anything "learned" during the course of employment,
regardless whether it is a trade secret. The Apple IPA also contains a non-solicitation provision,
which is designed to, and Apple uses to, chill employee mobility and competition.

9. Apple should not be permitted to force employees to agree to an illegal contract of
 adhesion as an end-run around California's protections of employee mobility and innovation, and as
 a means to squash entrant start-ups who hire former Apple employees. Apple's actions not only
 violate the laws and public policy of the State of California, but also undermine the free and open
 competition that has made the state the birthplace of countless innovative businesses. Apple's
 actions harm its current and former employees, Rivos and other California employers, and the State
 of California.

10. Counterclaim Plaintiffs therefore bring these counterclaims to obtain a declaration
that certain provisions of the Apple IPA are unenforceable. They likewise seek restitution and an
injunction prohibiting Apple from enforcing certain provisions of the Apple IPA against them and
other similarly situated current and former Apple employees in violation of California law.

1 ||

# JURISDICTION AND VENUE

| 2  | 11. Counterclaim Plaintiffs assert these counterclaims under Rule 13 of the Federal Rules             |  |  |
|----|---|--|--|
| 3  | of Civil Procedure. Apple's principal place of business is in this District and it has consented to   |  |  |
| 4  | jurisdiction and venue in this District by filing suit against Counterclaim Plaintiffs in this Court. |  |  |
| 5  | 12. This Court has supplemental subject matter jurisdiction over these counterclaims                  |  |  |
| 6  | pursuant to 28 U.S.C. § 1367 because they arise out of the same occurrence that is the basis for      |  |  |
| 7  | Apple's Defend Trade Secrets Act ("DTSA") claims and form part of the same case or controversy.       |  |  |
| 8  | 13. Venue is proper in this District under 28 U.S.C. §1391(b) because a substantial part              |  |  |
| 9  | of the events or omissions giving rise to these counterclaims occurred within this district.          |  |  |
| 10 | THE PARTIES   |  |  |
| 11 | 14. Counterclaim Plaintiff Rivos is Delaware corporation with a principal place of                    |  |  |
| 12 | business in Santa Clara, California. Rivos is a startup that is developing a SoC using open-source    |  |  |
| 13 | architecture. Although other SoCs exist in the marketplace that rely on proprietary system            |  |  |
| 14 | architecture, Rivos aims to be one of the first companies to successfully build and commercialize an  |  |  |
| 15 | SoC for servers in data centers using the open-source RISC-V architecture. Since its founding in      |  |  |
| 16 | May 2021, Rivos has attracted engineers from around Silicon Valley and the world to work on its       |  |  |
| 17 | innovative technology. Rivos currently employs Counterclaim Plaintiffs Wen, Hardage, Ye, Pinot,       |  |  |
| 18 | 8 Rajamani, and Wang.   |  |  |
| 19 | 15. Counterclaim Plaintiffs Wen, Ye, and Rajamani are residents of San Jose, California.              |  |  |
| 20 | Counterclaim Plaintiffs Hardage and Wang are residents of Austin, Texas. Counterclaim Plaintiff       |  |  |
| 21 | Pinot is a resident of Los Gatos, California.   |  |  |
| 22 | 16. Counterclaim Defendant Apple is a California corporation with a principal place of                |  |  |
| 23 | business in Cupertino, California.  |  |  |
| 24 | GENERAL ALLEGATIONS   |  |  |
| 25 | <b>Rivos Is a Promising Startup Developing Server SoCs Using Open Source Architecture</b>             |  |  |
| 26 | 17. Rivos was founded in May 2021 by Puneet Kumar, Belli Kuttanna, and Mark Hayter,                   |  |  |
| 27 | three successful engineers with long track records and a history of significant accomplishments in    |  |  |
| 28 | the industry and SoC development. Kumar briefly worked for Apple beginning in 2008 after Apple        |  |  |
|    | -4- Case No. 5:22-CV-2637-PCP   |  |  |
|    | DEFENDANTS AND COUNTERCLAIM PLAINTIFFS' COUNTERCLAIMS AGAINST APPLE INC.                              |  |  |

#### Case 5:22-cv-02637-PCP Document 277 Filed 09/22/23 Page 6 of 18

acquired Kumar's previous employer, PA Semi, Inc., but Kumar spent his last eleven years at
 Google before leaving to found Rivos. Hayter followed the same track—working for Apple for a
 few months in 2008 after Apple acquired his employer PA Semi, and then working for Google for
 eleven years before co-founding Rivos. Kuttanna never worked for Apple, and spent most of his
 career at Intel.

18. 6 Kumar, Kuttanna, and Hayter founded Rivos with the goal of creating novel technical 7 solutions for today's computing industry. To that end, Rivos is working to develop a high 8 performance server SoC using the open-source RISC-V architecture. Because Rivos is building 9 SoCs for use in large enterprise servers in data centers, as opposed to small consumer-based 10 products, its SoCs are optimized for different features, and contain different components, than 11 Apple's SoCs. For example, while mobile phones need to optimize for battery life, servers are 12 plugged in and so optimize for speed or large storage capacities. Mobile phone SoCs need entire 13 modules for graphics or camera systems; server SoCs do not. While Rivos does not yet have a product on the market, it has received considerable attention as a result of the prominence of its 14 15 founders and the talent it has been able to attract.

16 19. Since its founding, Rivos has hired talented engineers from Google, Intel, AMD, and
17 Apple, amongst others. These engineers were attracted to Rivos for a variety of personal and
18 professional reasons, including its cutting edge work on the RISC-V platform, the opportunity to try
19 something new that the more established companies were not doing, and the excitement of building
20 a new product from the ground up. And in the case of employees who joined from Apple, many of
21 them left Apple because they were frustrated that their work at Apple had grown stale, and they
22 were excited to look for new opportunities.

23

## **Restrictive Covenants Are Illegal in California**

24 20. With limited exceptions, California law declares "*every* contract by which anyone is
25 restrained from engaging in a lawful profession, trade, or business of any kind is to that extent
26 void." Cal. Bus. & Prof. Code § 16600. The California Legislature and California courts have
27 made clear that agreements that limit competition or employee mobility, including overbroad non-

disclosure agreements and non-solicitation agreements, are unlawful, against public policy, and
 void.

3 21. An overbroad non-disclosure agreement restricts employees from practicing their 4 trade by improperly restricting the information they may use in their new employment. For 5 example, a non-disclosure agreement that prohibits employees from using or disclosing all information or know-how "learned" at their past employer-regardless whether it is a trade secret-6 7 is for all intents and purposes a covenant not to compete. Similarly, an employment agreement that 8 purports to prohibit *former* employees from soliciting their former coworkers after they leave 9 restricts employees from practicing their trade by restricting the people with whom they may work. 10 Agreements with these provisions are contrary to California public policy.

11 Apple Requires Employees to Sign a Broad and Improper IPA as a Condition of Employment

12 22. Counterclaim Plaintiffs Wen, Hardage, Ye, Pinot, Rajamani, and Wang were each
13 required to sign the Apple IPA at the commencement of their employment with Apple. Wen,
14 Hardage, Ye, Pinot, Rajamani, and Wang's executed Apple IPAs are attached to Apple's Third
15 Amended Complaint as Exhibits A-F. Dkt. 256. The Apple IPA is a contract of adhesion and the
16 employees have no opportunity to modify it. The Apple IPA imposes expansive restrictions that
17 purport to bind employees *forever*, even long after they leave Apple.

18 23. The Apple IPA defines "Proprietary Information" as "any information of a
19 confidential, proprietary, and secret nature that may be disclosed to you or otherwise learned by you
20 in the course of your employment at Apple, including but not limited to any confidential information
21 of third parties disclosed to Apple." Apple IPA at 2.0. The Apple IPA further expands the
22 definition of Proprietary Information as follows:

Such confidential, proprietary, and secret information includes, but is not limited to, information and material relating to past, present, or future inventions, marketing plans, manufacturing and product plans, technical specifications, hardware designs and prototypes, business strategies, financial information and forecasts, personnel information, and customer lists.

25

26

### Case 5:22-cv-02637-PCP Document 277 Filed 09/22/23 Page 8 of 18

24. For employees within the Hardware group, including Wen, Hardage, Ye, Pinot,
 Rajamani, and Wang, Apple reinforces—and even tries to expand—the impermissibly broad reach
 of the Apple IPA through an "exit checklist" it provides departing employees on their way out the
 door. An example is attached hereto as Exhibit A. That "checklist" states,

Apple makes no attempt to separate properly protected trade secret
information from any other information an employee may have learned or "worked on" during his or
her employment at Apple.

8 25. These provisions violate California law, which specifically allows "a former
9 employee [to] use general knowledge, skill, and experience acquired in his or her former
10 employment." *Ret. Grp. v. Galante*, 176 Cal. App. 4th 1226, 1237 (2009). "[G]eneral knowledge in
11 the trade or [...] special knowledge of those persons who are skilled in the trade" are not trade
12 secrets, even if they are learned through work at Apple. *Agency Solutions.Com, LLC v. TriZetto*13 *Grp., Inc.*, 819 F. Supp. 2d 1001, 1017 (E.D. Cal. 2011).

14 26. Having provided such an expansive definition and interpretation of "Proprietary
15 Information," the Apple IPA then prohibits Apple employees from using or disclosing such
16 information without the "written consent" of Apple. Specifically, the Apple IPA provides:

You understand and agree that your employment by Apple requires you to keep all Proprietary Information in confidence and trust for the tenure of your employment *and thereafter*, and that you will not use or disclose Proprietary Information without the written consent of Apple, except as necessary to perform your duties as an employee of Apple.

IPA at 2.0(a).

21 27. As one court explained when invalidating a provision similar to this one, complying
with restrictions like these would essentially require departing employees to "perform a prefrontal
lobotomy on himself or herself" or to completely exit their chosen field of work. *Fleming Sales Co., Inc. v. Bailey,* 611 F.Supp. 507, 514 (D.C. Ill. 1985). While Apple might prefer this regime for its
departing employees, California law prohibits it.

26 27

28. In short, the Apple IPA prohibits Apple employees from using or disclosing information that Apple in its sole discretion deems to be "of a confidential, proprietary, and secret

-7-

nature" that is "learned" or "disclosed" during their employment with Apple, regardless of whether 1 2 the information is trade secret. And as its actions against Rivos and the Apple employees who went 3 to work for Rivos have shown, Apple apparently defines "confidential" and "proprietary" in an 4 outrageously overbroad and self-serving way. Apple evidently includes within that definition 5 employees' children's homework, tips for leg exercises, open source scripts downloaded from the internet, employees' personal tax filings that include information about their compensation from 6 7 Apple, partial screenshots devoid of context or substantive meaning, and thousands of other absurd 8 examples. This provision—in the expansive manner that Apple interprets it, attempts to enforce it, 9 and threatens its employees with—serves no legitimate purpose to Apple. Rather, Apple uses it 10 only to make it functionally impossible for someone to leave Apple and find new work elsewhere 11 without facing Apple's retaliation. 12 29. Similarly, the Apple IPA provides that employees are not allowed to share personnel 13 information without the written permission of Apple-in express violation of Labor Code section 14 232.5. The Apple IPA also prohibits the solicitation of Apple employees for one year 15 30. following the termination of employment. Specifically, the Apple IPA provides: 16 During your employment and for a period of one (1) year following 17 your termination date, you will not, directly or indirectly, solicit, 18 encourage, recruit, or take any action intended to induce Apple employees or contractors to terminate their relationship with Apple. 19 IPA at 3.0(d). 2031. These provisions of the Apple IPA are unlawful and have the effect of impeding 21 employee mobility and restraining Wen, Hardage, Ye, Pinot, Rajamani, Wang, and other Apple 22 employees from engaging in their choice of lawful profession, trade, or business. Thus, the 23 provisions are void pursuant to California Business and Professions Code section 16600. 24 **Apple Becomes Concerned that Talented Engineers Will Leave Apple to Work for Rivos** 25 32. Dan Murray, Vice President of Silicon Engineering at Apple, learned of Rivos in 26 May 2021 after a conversation with one of Rivos' founders, Puneet Kumar. Apple knew that Rivos 27 was being funded by two of the investors who had also funded NUVIA, a start-up co-founded by 28 Gerard Williams, a former Apple Senior Director of Platform Architecture who Apple had sued in Case No. 5:22-CV-2637-PCP -8-DEFENDANTS AND COUNTERCLAIM PLAINTIFFS' COUNTERCLAIMS AGAINST APPLE INC. 2019 for purported breach of the Apple IPA and trade secret misappropriation. *See Apple v.* Williams, Case No. 19-CV-352866, Santa Clara Superior Court.

3 33. Unsurprisingly, the Court correctly recognized that Apple's trade secret
misappropriation claims against Williams were wholly unsupported. On September 29, 2021, the
court in the *Williams* case denied Apple's requested preliminary injunction in full, finding, *inter alia*Apple's misappropriation narrative consisted of "whack-a-mole scenarios" that amounted to "an
evidentiary stretch, dissipating into speculation and conjecture." Sept. 29, 2021 Order at 17.

8 34. In truth, Apple had no *legitimate* gripes with NUVIA or Williams, but instead was
9 upset that Apple employees saw better opportunities working for NUVIA, and Apple wanted to
10 scare any of its employees who might think to leave. With that sore spot from NUVIA in mind, and
11 seeing that Rivos and NUVIA were funded by the same investors, Apple became concerned that
12 Rivos would become NUVIA 2.0. And so Apple decided to unleash its hostility against Rivos and
13 its employees using the same playbook it had deployed against Williams and NUVIA.

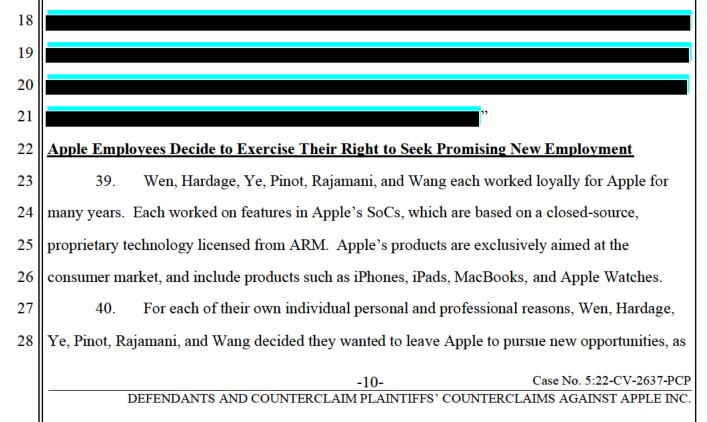

14 35. Indeed, Apple has a history of acting illegally to prevent employees from leaving 15 Apple. On March 17, 2011, in an action brought against it by the U.S. Department of Justice, Apple 16 stipulated to a final judgment that barred Apple from, among other things, "pressuring any person in 17 any way to refrain from soliciting, cold calling, recruiting, or otherwise competing for employees" 18 of its industry competitors. See Final Judgment, United States v. Adobe Sys., Inc. et al., Case No. 19 1:10-cv-01629-RBW (D.D.C. Mar. 18, 2011). Apple's sweeping imposition of the Apple IPA and 20its improper anticompetitive provisions is a further attempt to restrict employee mobility and 21 competition in the same way the Department of Justice barred it from doing more than a decade ago. 22 36. In keeping with this playbook, by June 2021, before a single Apple employee had left 23 to join Rivos, Apple began holding regular meetings to strategize how to stop Rivos in its tracks, 24 including by improperly obstructing employee mobility in violation of California law and California 25 public policy. When employees began to announce their resignations to join Rivos, Apple rushed 26 those employees out the door—usually without any formal exit interview or meaningful instruction 27 at all-while knowing that Apple information likely remained in their possession. For example,

28 Apple was well aware that its policy of allowing (and often effectively requiring) Apple employees

to store Apple documents in their personal iCloud accounts and iMessage histories was fraught with
security concerns, yet Apple took no steps to inspect the iCloud accounts or iMessages of its
departing employees before they left. Nor did Apple provide any instruction to employees about
how to find copies of files that iCloud or iMessage might automatically generate on synced
devices—which copies the departing employees would not even know about because they were
automatically generated by the background operation of the Apple systems that Apple had its
employees use.

8 37. Apple thus allowed, or at least failed to take reasonable measures to prevent, the
9 retention of Apple documents by departing employees. This may have been due to Apple's neglect,
10 or because Apple knew it could use that retention to punish Rivos and the employees who dared
11 leave Apple to join Rivos.

38. In any event, Apple's wrongful actions against Rivos and its employees were
motivated by Apple's desire to stop the loss of its engineering talent. Even though employees are of
course perfectly free to pursue new employment, and Apple employees unsurprisingly wanted to
leave for better opportunities with better employers elsewhere, Apple knew that employees leaving
was causing it to fall behind its competitors in developing new technology. As David Williamson,
Apple's Senior Director of Engineering (CPU) told Dan Murray in an November 17, 2021 email: "1

is their right. Some were frustrated that they were stuck iterating on the same products at Apple and
 were eager to try something new and innovative. Others were impressed by the talented engineers
 that founded Rivos, and that Rivos had recruited to create a new vision for server SoCs.

4 41. Although Apple claims to care deeply about ensuring that its so-called confidential 5 and proprietary information does not leave Apple, Apple's conduct upon learning that an employee was resigning to join Rivos shows otherwise. When an employee announced his or her intention to 6 7 leave, Apple conducted only cursory exit interviews, if it conducted one at all, during which Apple 8 forced its departing employees to sign an "exit checklist" without providing any meaningful 9 explanation of how the employees were expected to comply with the items on the list, or even 10allowing the employees time to do so. Apple's failure in this regard is particularly notable given 11 that Apple's own policies encourage (and its day-to-day work practices effectively require) the 12 intermingling of personal and work-related materials on personal iCloud accounts and iMessage 13 conversations. Despite knowing that Apple work-related materials are often stored in each employee's personal iCloud account, iMessage chats, and any synced locations that Apple's systems 14 15 may automatically generate, Apple took no steps at the time the employees left to review these sources with the departing employees who were joining Rivos, or otherwise to explain to those 16 17 employees how to segregate their personal information from work-related information.

18 42. After the employees left, however, it was a completely different story. Apple (or an 19 outside vendor it hired) systematically scoured these departed employees' computers, files, and 20communications for any sign of retained materials. In response to concerns from Apple's 21 employees that Apple was reading their personal communications, one Apple Vice President who 22 was especially upset about employees leaving for Rivos confirmed that Apple employees' concerns 23 about Apple's intrusion on their personal communications were well founded; he said that 24 And despite recognizing that 25 , looking for anything it could 26 use against the former employees. 27 28 Case No. 5:22-CV-2637-PCP -11-DEFENDANTS AND COUNTERCLAIM PLAINTIFFS' COUNTERCLAIMS AGAINST APPLE INC.

43. It did not stop there. Apple looked at files on employees' personal iCloud accounts 1 2 and Time Machine backups, including photos, tax returns and other personal financial or family 3 documents. Apple meticulously read through employees' web search histories. Apple may not have 4 been specifically hunting for personal information, but it had no qualms whatsoever about looking at 5 its former employees' personal communications and files in the course of its anticompetitive efforts. 44. 6 Meanwhile, Apple did not only want to punish Rivos and the engineers who left 7 Apple to work at Rivos, Apple also wanted to threaten its current employees about the consequences 8 if they dared to leave. Apple began giving threatening presentations aimed at scaring its employees 9 about what would supposedly happen to them if they joined Rivos or other promising startups. 10 Apple's Conduct Creates A Concrete and Justiciable Controversy 45. The Apple IPA, and the way Apple interprets it and tells employees to understand it, 11 12 harms competition and is unlawful. 13 46. There is a concrete and justiciable controversy over the legality and enforceability of the Apple IPA as it relates to Rivos' recruitment and/or employment of Wen, Hardage, Ye, Pinot, 14 15 Rajamani, and Wang. 47. There is a concrete and justiciable controversy over the legality and enforceability of 16 the Apple IPA as it relates to Rivos' recruitment and/or employment of other current and former 17 18 Apple employees for employment in California. 19 48. Wen, Hardage, Ye, Pinot, Rajamani, and Wang have standing to seek both 20 declaratory and injunctive relief with respect to Apple's enforcement of the Apple IPA against them. 21 49. Rivos has standing to seek both declaratory and injunctive relief with respect to this 22 controversy on behalf of itself and for the benefit of the public. 23 50. Evidence of the controversy between Apple and Counterclaim Plaintiffs over the Apple IPA includes the following: 24 25 a. On April 29, 2022 Apple filed suit against Rivos, Wen, and a former Rivos employee in this Court; 26 27 28 Case No. 5:22-CV-2637-PCP -12-DEFENDANTS AND COUNTERCLAIM PLAINTIFFS' COUNTERCLAIMS AGAINST APPLE INC.

b. On August 29, 2023, Apple filed a Third Amended Complaint in this Court alleging, 1 2 among other things, that Wen, Hardage, Ye, Pinot, Rajamani, and Wang breached 3 their broad nondisclosure obligations as stated in the Apple IPA. 4 c. With respect to Rivos, Apple alleges that, by recruiting Apple employees for 5 employment at Rivos, and by supposedly employing them in positions that are similar to their positions at Apple, Rivos has misappropriated Apple trade secrets 6 7 because the individuals will inevitably disclose and/or use Apple's alleged trade 8 secrets given the similarity of their work. 9 51. In support of its claims against Rivos, Apple specifically relies upon Rivos' alleged 10 "targeting," "soliciting," and employment of Wen, Hardage, Ye, Pinot, Rajamani, and Wang. See TAC ¶¶ 3, 47, 160, 193, 197. 11 12 52. Apple's claim relies on a theory of inevitable disclosure of trade secrets, which has 13 been soundly rejected by courts in California, and indeed is sanctionable in California. See Whyte v. Schlage Lock Co., 101 Cal. App. 4th 1443, 1464 (2002) (rejecting inevitable disclosure theory as 14 15 inconsistent with Business and Professions Code section 16600 and noting that "the inevitable 16 disclosure doctrine cannot be used as a substitute for proving actual or threatened misappropriation 17 of trade secrets."); see also Bayer Corp. v. Roche Molecular Sys., Inc., 72 F. Supp. 2d 1111, 1120 (N.D. Cal. 1999) ("California trade-secrets law does not recognize the theory of inevitable 18 19 disclosure; indeed, such a rule would run counter to the strong public policy in California favoring 20employee mobility."). 21 **Counterclaim Plaintiffs Injury-In-Fact as to Apple** 22 53. The Apple IPA, and Apple's interpretation and overreaching application of it, have caused Rivos, Wen, Hardage, Ye, Pinot, Rajamani, and Wang injury-in-fact and have caused them 23 24 to lose money and property within the meaning of California's unfair competition law. 25 54. For example, Rivos retained the law firm of Quinn Emanuel Urquhart & Sullivan, LLP to defend it and its employees against Apple's claims. Rivos is paying its employees' defense 2627 costs. 28

Case No. 5:22-CV-2637-PCP

55. A significant portion of the defense costs incurred arise directly from Apple's claims 1 2 relating to the Apple IPA, and these defense costs would not have been incurred but for Apple's 3 non-trade-secrets claims for relief. For example, Counterclaim Plaintiffs have both served and 4 answered discovery relating to allegedly confidential (as opposed to trade secret) materials, 5 reviewed and produced allegedly confidential (as opposed to trade secret) documents, and conducted legal and factual research necessary to defend against Apple's non-trade-secret allegations. 6 7 FIRST CAUSE OF ACTION 8 (Declaratory Relief Concerning the IPA) 9 56. Counterclaim Plaintiffs incorporate paragraphs 45-55 above as though fully set forth herein. 10 11 57. An actual controversy has arisen regarding the validity of certain provisions of 12 Apple's IPA. Specifically, Apple has asserted that Wen, Hardage, Ye, Pinot, Rajamani, and Wang 13 have violated the Apple IPA. 14 58. Rivos also has an interest in the Apple IPA, as Rivos employes employees purportedly 15 subject to the IPA. Moreover, the Apple IPA generally inhibits Rivos' ability to recruit, hire, and employ Apple's current and former employees, including because employees are concerned about 16 17 Apple enforcing its overbroad non-disclosure obligations and non-solicit obligations. 59. Business and Professions Code § 16600 renders every contract in restraint of trade 18 19 void. Business and Professions Code §§ 17200 et seq. renders violations of Business & Professions 20 Code § 16600 unfair and unlawful business practices. 21 60. The interests of employees in their own mobility and betterment in providing services 22 to a California-based employer are deemed paramount to the competitive business interests of 23 employers who seek to prevent competition. 24 61. Accordingly, Counterclaim Plaintiffs seek a declaratory judgment that Apple's IPA is 25 unenforceable because it contravenes Business & Professions Code § 16600. Counterclaim 26 Plaintiffs also seek a declaratory judgment that Apple's IPA is unenforceable to the extent it 27 prohibits them, after their employment with Apple ends, from soliciting other Apple employees to 28 leave Apple. Case No. 5:22-CV-2637-PCP -14-

62. Ancillary to this declaratory judgment, Counterclaim Plaintiffs seek an order 1 enjoining Apple from entering into such contracts and requiring Apple to modify the Apple IPA so 2 3 that its employees are free to provide services in California or to a California-based employer. 4 THIRD CAUSE OF ACTION 5 (Violation of Cal. Bus. & Prof. Code § 17200 et seq.) 63. 6 Counterclaim Plaintiffs incorporate paragraphs 46-56 above as though fully set forth 7 herein. 8 64. Business and Professions Code § 16600 renders every contract in restraint of trade 9 void. Business and Professions Code §§ 17200 et seq. renders violations of Business & Professions 10 Code § 16600 unfair and unlawful business practices. 65. 11 California has a strong interest in protecting the freedom of movement of persons 12 whom California-based employers wish to employ to provide services in California, regardless of 13 the person's state of residence. 14 66. California employers have a strong and legitimate interest in having broad freedom to 15 choose from a national applicant pool in order to maximize the quality of the product or services they provide. The State of California has a strong interest in protecting California-based employers 16 17 and their employees from anti-competitive conduct, such as Apple's, that interferes with the freedom of Rivos and its employees. 18 19 67. Apple engages in unfair competition when it requires employees to enter into the 20 Apple IPA in order to deter the recruitment and movement of its current and former employees. 21 68. Apple's unfair competition has injured, and will continue to injure, Apple employees 22 like Wen, Hardage, Ye, Pinot, Rajamani, and Wang who have a desire to leave their employment at 23 Apple and work for a company that Apple views as a competitor. 24 69. Apple's unfair competition has injured, and will continue to injure, Rivos, which has 25 incurred costs, diverted resources, and spent excessive management and attorney time as a result of 26 Apple's unfair competition. Counterclaim Plaintiffs seek all monetary and non-monetary relief 27 allowed by law, including restitution of sums Counterclaims Plaintiffs expend as a result of the 28 conduct alleged in their counterclaims.

| 1  | 70.   | Unless enjoined by the Court, Apple will continue to engage in the foregoing unfair      |  |
|----|---|--|--|
| 2  | business practices. Counterclaim Plaintiffs therefore request an order enjoining Apple from     |  |  |
| 3  | engaging in the unfair business practices described herein.                                     |  |  |
| 4  | PRAYER FOR RELIEF   |  |  |
| 5  | WHEREFORE, Counterclaim Plaintiffs Rivos, Wen, Hardage, Ye, Pinot, Rajamani, and                |  |  |
| 6  | Wang pray for judgment and relief as follows:   |  |  |
| 7  | a.  | For a declaratory judgment on their counterclaims;                                       |  |
| 8  | b.  | For restitution on their counterclaim for violation of Business and Professions Code     |  |
| 9  |   | §§ 17200 et seq.;  |  |
| 10 | с.  | For appropriate injunctive relief ancillary to the declaratory judgment;                 |  |
| 11 | d.  | For appropriate negative injunctive relief under Business and Professions Code §§        |  |
| 12 |   | 17200 et seq., both as to Rivos and its employees, and to the public. The negative       |  |
| 13 |   | injunctive relief includes, but is not limited to, a public injunction prohibiting Apple |  |
| 14 |   | from: (i) forcing employees to sign illegal contracts of adhesion that purport to        |  |
| 15 |   | impose restrictions on them that are inconsistent with California law, (ii) seeking to   |  |
| 16 |   | enforce the Apple IPA against its current and former employees as described herein,      |  |
| 17 |   | and (iii) engaging in threatened or actual anti-competitive litigation against Rivos and |  |
| 18 |   | other California employers arising from its illegal and unenforceable non-               |  |
| 19 |   | competes/NDAs as reflected in the Apple IPA;   |  |
| 20 | e.  | For attorneys' fees and costs in this action as allowed by law; and                      |  |
| 21 | f.  | For such other and further relief as the Court deems just and proper.                    |  |
| 22 |   | DEMAND FOR JURY TRIAL  |  |
| 23 | Counterclaim Plaintiffs hereby demand trial by jury for all causes of action, claims, or issues |  |  |
| 24 | in this action that are triable as a matter of right to a jury.                                 |  |  |
