Case No. 3:23-cv-00201-WHO

**REPLY IN SUPPORT OF DEFENDANT
MIDJOURNEY, INC.’S MOTION TO DISMISS
PLAINTIFFS’ COMPLAINT AND TO STRIKE
CLASS CLAIMS**

Date: July 19, 2023
Time: 2:00 p.m.
Courtroom: 2, 17th Floor
Judge: William H. Orrick

Trial Date: None
Date Action Filed: January 13, 2023

Restatement (Second) of Torts § 652C cmt. d (1977) 10

1 **I. INTRODUCTION¹**

2 Plaintiffs’ opposition to Midjourney’s motion to dismiss is a model of “diffusion.” Rather
 3 than clarifying the conclusory and often confusing allegations in their Complaint, Plaintiffs further
 4 obfuscate, misconstruing Midjourney’s arguments, disregarding established law, and inventing
 5 new, unpleaded theories—anything but identify *facts* to support their claims. Worse still, they say
 6 they do not have to. They claim they need not identify *any* registered work purportedly used to
 7 train Midjourney, *any* specific output that allegedly infringes a registered work, *any* example of
 8 Midjourney removing copyright management information, or *any* instance in which Midjourney
 9 has used their names to violate their publicity rights. Plaintiffs go so far as to argue that it is
 10 “immaterial” to their copyright claims whether Midjourney has ever been used to generate an image
 11 that is substantially similar in protected expression to any registered work. But none of this is
 12 consistent with the law or Plaintiffs’ pleading burden, which requires more than speculative
 13 grievance and finger-pointing. All claims against Midjourney should be dismissed.

14 **II. ALL OF PLAINTIFFS’ CLAIMS AGAINST MIDJOURNEY SHOULD BE DISMISSED**

15 **A. Plaintiffs Fail to Adequately Plead Copyright Infringement (Claims 1, 2)**

16 **1. Plaintiffs have not identified any registered works allegedly infringed**

17 Plaintiffs concede that Ortiz and McKernan have no “material that was registered” when
 18 they filed suit (Opp. 4 n.2) but carry on as if this concession is not fatal. (Opp. 6 (“Midjourney
 19 directly infringes ... *Plaintiffs’* work).) It is. Under well-settled authority, ignored in the Opposition,
 20 Ortiz and McKernan’s infringement claims are barred for lack of a copyright registration and cannot
 21 be amended, necessitating dismissal with prejudice. (*See* Mot. 7–8 (citing *UAB “Planner5D” v.*
 22 *Facebook, Inc.*, 2019 WL 6219223, at *7 (N.D. Cal. Nov. 21, 2019) (Orrick, J.).)

23 Dismissal is also required as to Andersen. The Complaint alleges that she owns registrations
 24 for “sixteen collections that include Works used as Training Images,” but never identifies any such
 25 “Works.” (¶ 28; Exs. 1–16.) It also cites a website purportedly showing that works she allegedly
 26 “created and owns a copyright interest in” were included in the LAION-5B training set (*id.* & n.1),

27 _____
 28 ¹ Unless otherwise stated, capitalized terms not defined herein are as defined in Midjourney’s
 motion to dismiss; citations to “¶ _” and “Ex.” are to the Complaint’s paragraphs and exhibits; all
 emphases are added; and internal citations and quotation marks are omitted.

1 but never alleges that any work appearing there is registered.² It is thus impossible to tell from the
 2 Complaint which of Andersen’s *registered* works, if any, were allegedly trained on by *any* Defendant,
 3 much less Midjourney. This falls well short of satisfying Rule 8. (*See* Mot. 8–10 (citing cases).)

4 Plaintiffs ignore Midjourney’s authorities, citing instead (at Opp. 4) to cases holding merely
 5 that plaintiffs need not allege “*every* copyright relied on, *every* individual image ... infringed, [and]
 6 *every* image ... that does infringe.” *Perfect 10, Inc. v. Cybernet Ventures, Inc.*, 167 F. Supp. 2d
 7 1114, 1120 (C.D. Cal. 2001). None holds that a copyright plaintiff can survive dismissal without
 8 identifying *any* allegedly infringed registered work, as Plaintiffs seek to do here. *See id.* at 1121
 9 (complaint alleged copyrights in specific pictures and “specifically identifie[d] websites where
 10 infringing conduct can be found”); *Microsoft Corp. v. My Choice Software, LLC*, 2017 WL 5643210,
 11 at *3 (C.D. Cal. Oct. 10, 2017) (“three specific instances” sufficient); *Facebook, Inc. v. Power*
 12 *Ventures, Inc.*, 2009 WL 1299698, at *4 (N.D. Cal. May 11, 2009) (finding sufficient allegations that
 13 Facebook owns copyright in all of its webpages and defendants copied the entire website).

14 2. Plaintiffs fail to state a claim for direct infringement

15 Plaintiffs assert that Midjourney committed direct copyright infringement in four ways:
 16 (1) by copying and training its model on unspecified “protected works”; (2) by “distributing Stable
 17 Diffusion”; (3) by “distributing” the Midjourney platform, which they claim “is itself an infringing
 18 derivative work”; and (4) by “generating and distributing output images which are infringing
 19 derivative works.” (Opp. 5.) None of these theories holds water.

20 **No Infringement by “Training”**: In support of their first theory of infringement (premised
 21 on how the Stable Diffusion and Midjourney models were trained), Plaintiffs falsely assert that
 22 Midjourney has “conceded” that the Complaint “set forth detailed facts showing Midjourney’s use”
 23 of their works “for training.” (Opp. 6 (citing Mot. 9).) Not remotely. As the Motion observes, the
 24 Complaint alleges that only *Stability*, *not* Midjourney, trained Stable Diffusion. (Mot. 9 (citing ¶¶
 25 1–3, 25, 27, 33, 57–58, 107).) No matter what Stable Diffusion was trained on, Plaintiffs cannot
 26 state a claim against Midjourney based on training in which it played no (alleged or actual) role.

27
 28 ² Plaintiffs use this same artful language—“created and owns a copyright interest in”—to refer to
 Ortiz and McKernan’s unregistered works (¶¶ 29, 30), negating any inference of a registration.

1 Plaintiffs also allege that Midjourney trained its AI model on, and thereby copied, a “subset
 2 of the images used to train Stable Diffusion”—“millions” of the “five billion” on which the latter
 3 was allegedly trained. (¶¶ 34, 57, 150, 152.) But they do not say what this subset consists of, much
 4 less identify *any* registered Work by Andersen it supposedly included. (See Mot. 9 (citing ¶¶ 144,
 5 152).) Plaintiffs insist they do not have to, urging that the Court can draw a “reasonable inference”
 6 that Midjourney trained its model on “*Plaintiffs’ art*” merely because Stability allegedly did. (Opp.
 7 6–7.) Such inference is not “reasonable” or even logical. See *Associated. Gen. Contractors of Cal.,*
 8 *Inc. v. Cal. State Council of Carpenters*, 459 U.S. 519, 526 (1983) (court may not assume that
 9 plaintiff “can prove facts that it has not alleged”); *Daniels-Hall v. Nat’l Educ. Ass’n*, 629 F.3d 992,
 10 998 (9th Cir. 2010) (courts need not “accept as true ... unwarranted deductions”). Nor is it even
 11 directed to the relevant inquiry: whether Midjourney trained its model on any *registered* Work of
 12 *Andersen*—the only named Plaintiff with a copyright registration. Absent well-pleaded allegations
 13 establishing that most basic fact, Plaintiffs’ training theory necessarily fails.³

14 **No Infringement by “Distribution”**: Plaintiffs’ second theory—that Midjourney infringes
 15 by “distributing Stable Diffusion, which contains compressed copies of the training images, as part
 16 of the Midjourney Product” (Opp. 5, 7)—is also untenable. Leaving aside the facially implausible
 17 assertion that Stable Diffusion “contains” billions of compressed image files,⁴ the Complaint
 18 nowhere alleges that *Midjourney* “distributes” Stable Diffusion. This unpleaded theory should be
 19 disregarded. See *Schneider v. Cal. Dep’t. of Corr.*, 151 F.3d 1194, 1197 n.1 (9th Cir. 1998) (on
 20 12(b)(6) motion, courts “*may not* look beyond the complaint to ... a memorandum in opposition”).

21 Even as to purported “distribution” of the Midjourney platform, the Complaint is devoid of
 22 well-pleaded facts. It includes a single conclusory allegation that Midjourney “distributes the
 23 Midjourney Product” (¶ 34), but any reference to “distribution” of a “product” is plainly a
 24 misnomer. As Plaintiffs correctly acknowledge, the Midjourney platform is a web-based

25 _____
 26 ³ Midjourney strongly disputes that training an AI model on publicly available images to enable the
 27 generation of new, never before-seen works is anything but fair use. Midjourney reserves all rights
 28 to assert fair use and other affirmative defenses should any claim ultimately survive dismissal.

⁴ This allegation betrays a striking lack of basic knowledge about how generative AI models work.
 As Plaintiffs allege, the Stable Diffusion software is freely available for download by the public. (¶
 53.) Had Plaintiffs bothered to inspect that software as part of a reasonable pre-suit investigation
 under Rule 11, they would have found no factual basis for this allegation.

1 subscription *service* offered through “an internet-chat system called Discord.” (¶ 136; *see also*
2 ¶ 135 (“Midjourney released the first version of its *service* in March 2022”); ¶ 137 (“Midjourney
3 allows anyone to sample its *service* for free”); ¶ 139 (“*subscribers* also receive access to the
4 Midjourney *web app*... which lets users access the Midjourney *service* through a *web interface*”).)

5 Under the Copyright Act, “distribution” requires “actual dissemination of a copy” by sale
6 or other transfer of ownership, or by rental, lease, or lending. *Perfect 10 v. Amazon.com, Inc.*, 508
7 F.3d 1146, 1162 (9th Cir. 2007); 17 U.S.C. § 106(3). Unless a copy “changes hands” in one of these
8 ways, no distribution has taken place. *Atlantic Recording Corp. v. Howell*, 554 F. Supp. 2d 976,
9 983 (D. Ariz. 2008). *Accord Fox Broad. Co. v. Dish Network, L.C.C.*, 905 F. Supp. 2d 1088, 1106
10 (C.D. Cal. 2012), *aff’d*, 747 F.3d 1060 (9th Cir. 2014). Even “making an unauthorized copy of a
11 copyrighted work available to the public does not violate a copyright holder’s exclusive right of
12 distribution” unless and until dissemination of one or more copies occurs. *Atlantic Recording*, 554
13 F. Supp. 2d at 983. Web-based services, like Midjourney, are accessed, not disseminated or
14 distributed via copies. Plaintiffs’ distribution theory, thus, fails as a matter of law.

15 **No Infringement of “Derivative Work” Right:** Plaintiffs’ third theory is factually
16 unsupported. The Midjourney platform cannot be an unauthorized “derivative work” if it was never
17 trained on any registered Work by Andersen, a fact Plaintiffs fail to plead, as discussed above.

18 The theory is also legally unsound. The Second Circuit considered and rejected a virtually
19 identical characterization of the derivative work right in *Authors Guild v. Google, Inc.*, 804 F.3d
20 202 (2d Cir. 2015). There, an organization representing thousands of published authors claimed
21 that a Google search feature, which relied on digital scans of plaintiffs’ entire books as inputs to
22 generate snippets and data about the books as outputs, infringed their right to prepare derivative
23 works. *Id.* at 225. The Second Circuit disagreed, explaining that because the digital copies created
24 by Google were hidden from access by the public, and the search function did not permit access
25 “in any substantial way to a book’s expressive content” other than the snippets, the program was
26 beyond the “statutory definition of a derivative work, or of the logic that underlies it.” *Id.* at 226.

27 Here, Plaintiffs never explain how a complex AI software model that was trained on
28 millions of images, “relies on complicated mathematics, linear algebra, and a series of algorithms[,]”

1 and requires powerful computers and computer processing to recognize underlying relationships in
2 the data” (¶ 70), substantially borrows from the protected expression of any (unidentified)
3 registered work by Andersen. Even if the Court were to entertain Plaintiffs’ far-fetched allegation
4 that the Midjourney platform stores “compressed copies” of those training images (¶¶ 18, 58, 65,
5 134), *Authors Guild* counsels that the derivative works right is not implicated by a web application
6 that relies on publicly inaccessible copies of copyrighted works to generate outputs that themselves
7 do not substantially borrow from the protected expression of those works. 804 F.3d at 226–27. (*See*
8 *also* Mot. 10–11.) At most, Plaintiffs’ unfounded theory of Midjourney-as-image-database is just
9 a recasting of their first (defective) theory of direct infringement by copying. (*See supra*, pp. 2–3.)

10 **No Infringement by “Output”**: Plaintiffs’ final theory is that any output of Stable
11 Diffusion, and in turn Midjourney, must be “infringing derivative works.” (Opp. 8.) They argue
12 that they can avoid identifying any examples of purportedly infringing Midjourney output by
13 alleging “direct copying” and can jettison the firmly established substantial similarity requirement
14 altogether. (Opp. 8–9.) Such arguments reflect a miscomprehension of applicable law.

15 Plaintiffs conflate whether they need to plead examples of infringement with whether they
16 need to prove substantial similarity, but *they need to plead both*. **First**, it is well-settled that a
17 copyright plaintiff must plead at least some representative examples of infringement. *See Becton,*
18 *Dickinson & Co. v. Cytek Biosciences Inc.*, 2020 WL 1877707, at *4 (N.D. Cal. Apr. 15, 2020)
19 (dismissing claim for failure to plead examples); *MultiCraft Imports, Inc. v. Mariposa USA, Inc.*,
20 2017 WL 5664996, at *3 (C.D. Cal. Sept. 14, 2017) (same); *Blizzard Ent., Inc. v. Lilith Games*
21 *(Shanghai) Co.*, 149 F. Supp. 3d 1167, 1175 (N.D. Cal. 2015) (same). There is no exception to this
22 requirement in cases alleging “direct copying,” and Plaintiffs cite no decision holding otherwise.

23 Here, Plaintiffs do not identify any Midjourney output supposedly constituting an infringing
24 derivative or copy of any registered Work of Andersen. *Not one*. This is remarkable, considering
25 Plaintiffs’ allegations that Midjourney’s service is accessible through Discord, where “*everyone*
26 *can see each other’s Text Prompts, and the images that result*” (¶ 136), and that “Imposters” have
27 sold “Fakes” of Andersen’s works. (¶¶ 171–73.) If Plaintiffs had any facts to support their output-
28 based claims, they should have pleaded them. Dismissal is required on this basis alone.

1 **Second**, Plaintiffs argue that they need not plead substantial similarity of output, but that is
2 wrong. “In order to infringe the derivative right, *there must be substantial similarity in protectible*
3 *expression between the parties’ works.*” 4 PATRY ON COPYRIGHT § 12:13 (collecting cases). The
4 Ninth Circuit has rejected the exact argument Plaintiffs advance here, namely, that a “derivative
5 work” is defined to encompass “any work based on a copyrighted work,” such that substantial
6 similarity need not be alleged. *Litchfield v. Spielberg*, 736 F.2d 1352, 1357 (9th Cir. 1984).

7 Undeterred, Plaintiffs cite several cases holding that a showing of substantial similarity is
8 not required for claims based on wholesale “direct copying.” *See Range Rd. Music, Inc. v. E. Coast*
9 *Foods, Inc.*, 668 F.3d 1148, 1153–54 (9th Cir. 2012) (entire song performed); *ITC Textile Ltd. v.*
10 *Wal-Mart Stores Inc.*, 2015 WL 12712311, at *4 (C.D. Cal. Dec. 16, 2015) (“undisputed evidence”
11 that defendant “copied each of ITC’s designs in their entirety”). Plaintiffs apparently confuse the
12 concept of “direct copying” for something like “copying directly.” But, as their own cited cases
13 make clear, “direct copying” occurs only when a work is reproduced “*in toto.*” *ITC Textile*, 2015
14 WL 12712311, at *5. No analysis of substantial similarity is needed in that context as *everything*
15 is copied—protectible and unprotectible elements. In all other instances, a showing of substantial
16 similarity is required. *See Narell v. Freeman*, 872 F.2d 907, 910 (9th Cir. 1989) (infringement can
17 be found “without application of a substantial similarity analysis ... only when the defendant has
18 engaged in virtual duplication of a plaintiff’s entire work”). Indeed, “*even where the fact of copying*
19 *is conceded*, no legal consequences will follow from that fact unless the copying is substantial.”
20 *Newton v. Diamond*, 388 F.3d 1189, 1192–93 (9th Cir. 2003).

21 Here, Plaintiffs do not allege that Midjourney’s platform duplicates entire copyrighted
22 works as output, much less point to any example of that. Nor have they otherwise attempted to
23 show that any Midjourney output is substantially similar to any registered Work of Andersen. *See*
24 *Fuzzy Logic Prods., Inc. v. Trapflix, LLC*, 2015 WL 12791508, at *4 (C.D. Cal. Nov. 20, 2015)
25 (dismissing copyright claim that was “devoid of any comparisons of protectable elements”).
26 *Plaintiffs allege just the opposite*—that no output “is likely to be a close match” for any training
27 image (¶ 93) and that output is so visually *dissimilar* as to be unrecognizable absent CMI (¶¶ 192,
28 193). Thus, Plaintiffs have not only failed to plead the requisite substantial similarity as to

1 Midjourney output; they cannot do so without contradicting their own allegations—a fatal defect
 2 that cannot be cured by amendment. (See Mot. 10–11 (citing *Airs Aromatics, LLC v. Victoria’s*
 3 *Secret Stores Brand Mgmt., Inc.*, 744 F.3d 595, 600 (9th Cir. 2014)).)

4 **3. Plaintiffs fail to state a claim for vicarious infringement**

5 Midjourney cited authority (Mot. 14) requiring dismissal of the vicarious infringement
 6 claim on the ground that it improperly seeks to hold Midjourney both directly and vicariously liable
 7 for the same conduct, i.e., creating allegedly infringing output. Plaintiffs’ Opposition does not
 8 address this argument, conceding the point. See *Papasan v. Dometic Corp.*, 2017 WL 4865602, at
 9 *18 (N.D. Cal. Oct. 27, 2017) (collecting cases). Dismissal with prejudice is appropriate.

10 Even if Plaintiffs could maintain contradictory claims for direct and vicarious infringement,
 11 their vicarious liability claim would still fail. **First**, they have not pleaded any act of direct
 12 infringement by Midjourney users—an essential element, as the Opposition concedes (at 10). See
 13 *also Perfect 10*, 508 F.3d at 1173. Plaintiffs try to sidestep this defect by appealing to the same
 14 argument debunked above, namely, that they do not need to identify any examples of infringement
 15 because every output—no matter what it looks like—is necessarily a derivative work. (Opp. 10.)
 16 Plaintiffs cite no authority for that position, and it is not the law. (*Supra*, pp. 6–7.) **Second**, any
 17 contention that Midjourney had the “right and ability” to stop purported direct infringement through
 18 an unspecified redesign or simply ceasing to operate altogether is inconsistent with the law. See
 19 *Schneider v. YouTube, LLC*, 2023 WL 114226, at *2 (N.D. Cal. Jan. 5, 2023). Were it otherwise,
 20 this element would always be satisfied. **Third**, as explained in the Motion (at 13), that Midjourney
 21 receives “flat periodic payments for service” from its users, without more, is insufficient to show
 22 the requisite direct financial interest in the alleged infringement. *Ellison v. Robertson*, 357 F.3d
 23 1072, 1079 (9th Cir. 2004). Plaintiffs’ only response is to recite their (inadequate) allegations that
 24 Midjourney receives subscription fees (Opp. 11), without confronting Midjourney’s authority.
 25 (Mot. 13.) That does not save their defective claim.

26 **B. Plaintiffs Fail to Adequately Plead a Violation of the DMCA (Claim 3)**

27 Plaintiffs claim “Midjourney knowingly removed or altered CMI from Plaintiffs’ Works”
 28 and “distributed copies of the Works” with altered or removed CMI in violation of 17 U.S.C. §

1 1202(b). (Opp. 13.) However, there are no facts to support these conclusory allegations, and the
 2 facts Plaintiffs do allege negate any claim.⁵ Dismissal should be with prejudice.

3 **No Alteration:** Although the § 1202(b)(1) claim is ostensibly premised on allegations that
 4 Midjourney “removed or altered” CMI, Plaintiffs do not plead that their CMI has ever appeared in
 5 “altered” form. Rather, their theory (albeit unfounded) is that “Defendants ‘train[ed] Stable
 6 Diffusion on [Plaintiffs’ Works] and design[ed] it to omit any CMI as part of the output.” (Opp.
 7 13 (quoting ¶ 183); see also ¶ 184.) Plaintiffs’ claim, thus, is for “removal of CMI,” not alteration.

8 **No Removal:** Plaintiffs also fail to plead facts to establish that Midjourney removed CMI
 9 in violation of § 1202(b)(1). To the extent Plaintiffs claim that CMI was removed in training Stable
 10 Diffusion (Opp. 13), once again, only *Stability* is alleged to have done that training. (¶¶ 1–3, 33.)

11 The Complaint also fails to identify any work by any Plaintiff that Midjourney allegedly
 12 used to train its own model (and from which it could have removed CMI). Plaintiffs claim that they
 13 identified such works “with specificity,” citing allegations purportedly amounting to an admission
 14 that Midjourney “is trained on data sets comprised of licensed materials which include Plaintiffs’
 15 works.” (Opp. 15.) But the cited paragraphs from the Complaint say no such thing. Paragraphs 2
 16 and 101–110 allege that *Stability* (not Midjourney) used training images from the LAION dataset,
 17 and paragraphs 148–151 merely quote Midjourney’s founder as confirming that it used “open data
 18 sets that are published” to train its model; there is no mention of Plaintiffs. Accordingly, there is
 19 no basis for any claim that *Midjourney* removed Plaintiffs’ CMI, whether in training or from output.

20 **No Distribution:** Plaintiffs plead no facts showing “distribution” of altered CMI in violation
 21 of § 1202(b)(2) (Opp. 13 (quoting ¶ 189)), and “[t]hreadbare recitals” of statutory language “do not
 22 suffice.” *Ashcroft v. Iqbal*, 556 U.S. 662, 678 (2009); see *Doe 1 v. GitHub, Inc.*, 2023 WL 3449131,
 23 at *12 (N.D. Cal. May 11, 2023) (dismissing claim as “Plaintiffs plead no specific facts regarding
 24 the allegedly inaccurate CMI Copilot once produced alongside output”). Again, Plaintiffs’
 25 allegation is that Midjourney “omit[s] any CMI.” (¶ 183.)

26 **No Distribution of Plaintiffs’ Works with CMI Removed:** Plaintiffs identify no Works

27 _____
 28 ⁵ *Mollman v. Zoetop Bus. Co.*, 2022 WL 17207103 (C.D. Cal. Sept. 16, 2022), is no help to
 Plaintiffs. There, plaintiff survived dismissal by pleading a specific instance in which defendants
 removed CMI from an otherwise identical work. *Id.* at *3. There are no similar facts here.

1 that Midjourney allegedly distributed as output without their CMI, mandating dismissal. (*See* Mot.
 2 15 (citing *Free Speech Sys., LLC v. Menzel*, 390 F. Supp. 3d 1162, 1175 (N.D. Cal. 2019) (Orrick,
 3 J.) (dismissing for failure to “identify which photographs had CMI removed”).) Tellingly,
 4 Plaintiffs do not address this Court’s holding in *Menzel*. Nor do they refute the myriad other cited
 5 cases from this Circuit requiring a showing that CMI was removed from otherwise *exact copies* of
 6 works. (Mot. 15.)⁶ They *cannot* plead such facts without contradicting themselves. As the Motion
 7 calls out, and Plaintiffs do not dispute, their DMCA claim is based on allegations that output is so
 8 dissimilar to their Works as to be unrecognizable without their CMI. (Mot. 15 (citing ¶¶ 192–93).)

9 Plaintiffs also misinterpret § 1202(b)(3) by arguing that creating copies in training an AI
 10 model somehow constitutes “distribution.” (Opp. 13.) It does not. As explained above, “distribution”
 11 in the copyright context refers to public *dissemination*, not private acts. (*Supra*, pp. 3–4.)

12 **No Scierer**: Absent facts showing that Midjourney removed or altered CMI, there is no
 13 plausible allegation of scierer: an act never allegedly performed cannot have been performed with
 14 culpable intent. Nor can Plaintiffs plausibly plead that Midjourney “knows or has a reasonable basis
 15 to know” that removing CMI “will aid infringement,” *Stevens v. CoreLogic, Inc.*, 899 F.3d 666,
 16 674–75 (9th Cir. 2018), when they fail to identify *even one* allegedly infringing image ever
 17 produced on its platform. Plaintiffs cannot overcome this pleading defect by appealing to how
 18 Stable Diffusion was trained (which reflects no conduct or state of mind of Midjourney); their faulty
 19 premise that every output is an infringing derivative work (which, as discussed above, is contrary
 20 to law); or misrepresentations that Midjourney has “acknowledged the dubious legality” of its
 21 service (Opp. 17) (which is not alleged and contradicted by their own pleading). (*Cf.* ¶ 146–49
 22 (attributing statements to Midjourney’s founder that the platform was trained on “open data sets,”
 23 this is “okay,” and “no laws” prohibit such training). The only logical inference such allegations
 24 permit is that Midjourney acted in the belief that its conduct complied with the law.

25 Plaintiffs argue that Judge Tigar’s decision in *GitHub* supports their request for an inference
 26 of scierer from wholly conclusory allegations. (*Id.* at 16–17.) It does not. The *GitHub* complaint

27 _____
 28 ⁶ Plaintiffs misconstrue *ICONICS, Inc. v. Massaro*, 192 F. Supp. 3d 254, 272 (D. Mass. 2016), to
 argue that they need not plead CMI removal from exact copies. In *ICONICS*, however, defendant
 allegedly made an exact copy of plaintiff’s code and replaced the original CMI with its own. *Id.*

1 included examples of allegedly infringing output from which CMI was removed and extensive
 2 allegations concerning defendants’ knowledge of the DMCA, including having published articles
 3 on the topic. 2023 WL 3449131, at *12. Plaintiffs do not even attempt to allege similar facts here.

4 **C. Plaintiffs Fail to Plead Any Violation of their Publicity Rights (Claims 4, 5)**

5 Plaintiffs retreat from claiming publicity rights in artistic “styles” and refashion their claims
 6 around Midjourney having “designed its [platform] to respond to the names of any artist.” (Opp.
 7 18; *see id.* at 20 (claims are based on “use of Plaintiffs’ *names*—not their *styles*”).) This tactical
 8 shift cannot salvage the claims from dismissal, due to copyright preemption or otherwise.

9 **First**, despite the refocused emphasis on purported name appropriation, the gravamen of
 10 Plaintiffs’ claims remains that Midjourney allegedly designed its platform to allow users to create art
 11 in Plaintiffs’ styles. (¶¶ 204–212; Opp. 18 (highlighting “functionality ‘to create images based on
 12 ‘in the style’ prompts”).) In attempting to block use of their names as touchstones for particular art
 13 styles, Plaintiffs impermissibly seek to create a backdoor regime for “state-law protection for fixed
 14 ideas” in contravention of the Copyright Act. *Montz v. Pilgrim Films & Television, Inc.*, 649 F.3d
 15 975, 979 (9th Cir. 2011). The Ninth Circuit has repeatedly held that assertion of name-based
 16 publicity rights to police “unauthorized distribution and republication” of works, rather than
 17 “exploitation of [one’s] likeness on an unrelated product or in advertising,” is pre-empted under 17
 18 U.S.C. § 301. *Maloney v. T3Media, Inc.*, 853 F.3d 1004, 1008, 1016 (9th Cir. 2017) (dismissing
 19 claim and collecting cases). (*See* Mot. 18–19; Dkt. 50 (DeviantArt) at 14–15 & n.11.)

20 **Second**, Midjourney’s designing its platform to respond to any permutation of text prompts
 21 in a manner “akin to a text query passed to an internet search engine” (¶ 24) is not “use” of
 22 Plaintiffs’ names, much less an actionable one. That a Midjourney user *could* enter a text prompt
 23 containing Plaintiffs’ names does not mean they ever have. Plaintiffs plead no such example,
 24 despite Midjourney prompts and output being publicly available. (¶ 136.) In any event, name
 25 appropriation occurs where defendants take “advantage of [plaintiff’s] reputation, prestige, or other
 26 value associated with [her identity], for purposes of publicity.” Restatement (Second) of Torts
 27 § 652C cmt. d (1977). Publicity rights are concerned with public-facing exploitation of a person’s
 28 name or likeness for promotion or to falsely imply endorsement. *See Perkins v. LinkedIn Corp.*,

1 53 F. Supp. 3d 1190, 1216 (N.D. Cal. 2014) (finding appropriation where emails implied
2 endorsement by plaintiffs); *Fraley v. Facebook, Inc.*, 830 F. Supp. 2d 785, 810 (N.D. Cal. 2011)
3 (finding appropriation where “sponsored stories” used names to imply endorsement). Plaintiffs
4 allege nothing like that here, and courts have outright rejected theories akin to the one they advance.

5 In *Brooks v. Thomson Reuters Corp.*, 2021 WL 3621837 (N.D. Cal. Aug. 16, 2021), for
6 instance, the court rejected plaintiffs’ publicity claims, reasoning that users’ ability to search
7 defendant’s online subscription platform for “detailed cradle-to-grave dossiers” on millions of
8 individuals did not amount to use of plaintiffs’ names “for promotional purposes.” *Id.* at *1, *3–4.
9 Likewise, in *In re Facebook, Inc. Consumer Privacy User Profile Litig.*, the court dismissed, with
10 prejudice, a claim predicated on Facebook’s alleged disclosure of plaintiffs’ personal information
11 to app developers, finding such conduct “categorically different from the type of conduct made
12 unlawful by this tort, such as using a plaintiff’s face or name to promote a product or service.” 402
13 F. Supp. 3d 767, 803 (N.D. Cal. 2019). Under these cases, the fact that Midjourney allegedly
14 designed its platform to understand and generate visual works in response to user prompts of all
15 kinds, including prompts referencing artists, is “categorically different” from use or appropriation
16 of any Plaintiff’s name for promotional purposes. Dismissal with prejudice is appropriate.

17 **Third**, to the extent these claims are based on any other purported “use” of Plaintiffs’ names,
18 dismissal is likewise warranted. Nowhere in the Complaint, Opposition, or even the new materials
19 they submit with it (Dkt. 68) do Plaintiffs identify a single time Midjourney has ever used *Plaintiffs’*
20 *names*, in advertising or otherwise, in its “apps, website, [or] social media posts.” (Opp. 18 (citing
21 ¶ 205 (charging in conclusory fashion that Midjourney “used Plaintiffs’ names to advertise art ‘in
22 the style’ of Plaintiffs’ work” without any supporting facts)); *see also* Reply RJN, submitted
23 herewith.) That is not surprising; Midjourney never has. But the dissembling does not end there.
24 Plaintiffs next argue that Midjourney misrepresents that it “does not promote the ability of its AI
25 Image Product to respond to specific artist’s names.” (*Id.*) The Motion does not say that, and the
26 argument is a digression. The question is not what general functionality Midjourney has touted,
27 but whether it has ever promoted that functionality using *Plaintiffs’ names*. As no such use is
28 alleged, this claim must be dismissed.

1 **D. Plaintiffs Fail to State a Claim for Unfair Competition (Claim 6)**

2 **1. Plaintiffs fail to state a claim under the Lanham Act**

3 To Midjourney’s surprise, Plaintiffs claim that the Complaint’s references to the Lanham
4 Act were deliberate and reimagine they have pleaded that Midjourney “falsely designated” outputs
5 “in a manner likely to cause confusion, mistake, or deception as to their origin, sponsorship, or
6 approval ... by the Plaintiffs.” (Opp. 20–21.) They do not. Nor, in decrying the “proliferation of
7 AI-generated art created without Plaintiffs’ consent but associated with Plaintiffs’ names” (Opp.
8 20 (citing ¶ 212)), do they cite a single example. In any event, any Lanham Act claim is barred. As
9 the Motion notes (at 20) and Plaintiffs ignore, the Supreme Court has held that the Lanham Act
10 does not authorize a claim for failure to provide attribution for the expression of ideas—precisely
11 what Plaintiffs claim here—lest it disrupt the “carefully limited and focused” attribution right under
12 the Copyright Act and create a “species of mutant copyright law.” *Dastar Corp. v. Twentieth Century*
13 *Fox Film Corp.*, 539 U.S. 23, 34, 37 (2003). This claim should be dismissed with prejudice.

14 **2. Plaintiffs fail to state a claim under the UCL**

15 **Unlawful prong:** Plaintiffs implicitly concede that their UCL claim is pre-empted under 17
16 U.S.C. § 301 to the extent based on alleged copyright infringement. (Mot. 20; Opp. 21 (urging
17 their claim is “predicated on unlawful acts independent of” infringement). However, the only other
18 “unlawful” conduct they allege is violation of the DMCA, which they fail to plead, as discussed
19 above. Their UCL “unlawful” claim thus fails for lack of a predicate violation.

20 **Unfair prong:** Plaintiffs claim they have “alleged Midjourney’s unlawful misappropriation
21 and copying of their art for their own commercial gain without attribution o[r] permission.” (Opp.
22 21.) That is just a repackaged claim for “copyright infringement,” which is preempted. Further,
23 under the UCL, an “unfair” act must be one that either (1) “threatens an incipient violation of an
24 *antitrust law*, or violates the policy or spirit of one of those laws” or (2) “otherwise significantly
25 threatens or harms competition.” *Cel-Tech Commc’ns, Inc. v. L.A. Cellular Tel. Co.*, 20 Cal. 4th
26 163, 186-87 (1999). The “harm” must be to competition in the market generally, not Plaintiffs. *Id.*
27 Plaintiffs have not alleged conduct that violates antitrust law or harms competition.

28 **Fraud prong:** Plaintiffs’ effort to invoke the fraud prong also fails, as “fraud” is nowhere

1 pleaded (or mentioned) in the Complaint. Moreover, a UCL plaintiff must plead their own reliance
 2 on the fraudulent conduct. *See Equinox Hotel Mgmt., Inc. v. Equinox Holdings, Inc.*, 2018 WL
 3 659105, at *13 (N.D. Cal. Feb. 1, 2018) (explaining that most courts conclude that plaintiffs must
 4 allege their own reliance, not reliance by third parties). Plaintiffs do not and cannot do so.

5 **3. Plaintiffs fail to state a claim for unfair competition under common law**

6 Plaintiffs assert that Midjourney appropriated their “property,” and that this suffices to plead
 7 common law unfair competition. (Opp. 22.) Not so. Plaintiffs do not identify the “property” at
 8 issue, but if they mean their artworks (as suggested by their citation to ¶¶ 155–59, i.e., their
 9 copyright claim), this claim is pre-empted by 17 U.S.C. § 301. Otherwise, if by “property” Plaintiffs
 10 meant their names, they would merely be restating their defective common law right of publicity
 11 claim (Claim 5). *See Eastwood v. Sup. Ct.*, 149 Cal. App. 3d 409, 420 (1983) (describing elements).

12 **E. Plaintiffs’ Claim for Declaratory Relief (Claim 7) Is Duplicative and Improper**

13 Plaintiffs have no good response to Midjourney’s arguments for dismissal of the duplicative
 14 declaratory relief claim. They correctly cite Federal Rule of Civil Procedure 57 as providing that
 15 the “existence of another adequate remedy does not preclude a declaratory judgment *that is*
 16 *otherwise appropriate*,” but courts have held that such relief is *not* appropriate where, as here, it is
 17 purely duplicative of other claims, and defective ones at that. (Mot. 21.) Plaintiffs’ reliance on a
 18 cherry-picked quote from *Maryland Casualty Co. v. Witherspoon*, 993 F. Supp. 2d 1178 (C.D. Cal.
 19 2014), is even more puzzling. It noted that courts “possess discretion in determining whether ... to
 20 entertain” a claim for declaratory relief “even when the suit otherwise satisfies the subject matter
 21 jurisdictional prerequisites,” acknowledged that courts should “avoid duplicative litigation,” and
 22 stayed the declaratory relief claim in favor of a state court action involving overlapping issues. *Id.*
 23 at 1182–85. Finally, the examples Plaintiffs provide of declaratory relief the Court *could* grant
 24 (declaring unlawful that Midjourney allegedly “stores copyrighted material” or “removes [CMI]”
 25 or “uses artists’ names” (Opp. 23)), serve only to illustrate that this claim is needlessly duplicative.

26 **III. PLAINTIFFS’ CLASS ALLEGATIONS SHOULD BE STRICKEN UNDER RULE 12(F)**

27 **The “Damages Class” Should Be Stricken:** Plaintiffs’ defense of the alleged “Damages
 28 Class” amounts to little more than a bare assertion that common issues predominate. (*Id.* at 24.) They

1 do not, and it is inconceivable that they could. Common issues do not even prevail among *named*
 2 *Plaintiffs*. On the threshold issue of ownership, two of the three Plaintiffs admit they have no
 3 registration, precluding standing to pursue a copyright claim. (Opp. 4 n.2.) Beyond that, numerous
 4 other fact-intensive, individualized issues must also be addressed for each work: (1) is it a “foreign
 5 work” exempt from the registration requirement; (2) is it sufficiently original to warrant copyright
 6 protection; (3) who owns the copyright; (4) whether use was licensed or otherwise authorized; (5)
 7 whether any output generated by Midjourney users is substantially similar; (6) whether the output is a
 8 fair use; and (7) in assessing damages, the value of the work.⁷ (Mot. 23–24.) And that’s just for the
 9 copyright claims; other claims will be subject to individualized proof over separate subject matter.

10 Plaintiffs do not deny that each of these issues will need to be determined for each of the
 11 *millions* of at-issue images and innumerable putative class members. Instead, they argue that because
 12 “much of the information related to the scope of the works infringed is primarily in Midjourney’s
 13 control,” it would be premature to strike their class claims before discovery. (Opp. 24.) This is a
 14 red herring. Plaintiffs allege that Midjourney “appropriat[ed] millions of copyrighted images” from
 15 publicly accessible datasets to which Plaintiffs have equal access, and that all prompts and at-issue
 16 outputs are publicly available. (¶¶ 103, 136, 144, 149.) No amount of discovery could change the
 17 overwhelmingly individualized and fact-intensive nature of the claims pleaded, or the impossibility
 18 of pursuing millions of individuals’ disparate claims on a class-wide basis.

19 Notably, Plaintiffs cite no precedent in which like claims received class certification and do
 20 not meaningfully engage with Midjourney’s cited cases. (Mot. 22–24.) For example, the same
 21 issues that doomed class certification in *Football Association Premier League Ltd. v. YouTube,*
 22 *Inc.*, 297 F.R.D. 64 (S.D.N.Y. 2013)—namely, “validity and ownership of the copyright, its
 23 licensing ... (including by way of implied licenses and equitable estoppels) and amount of injury
 24 and damages, as well as the over-arching questions of substantial similarity and fair use”—are all
 25 at issue here, too, and then some. *Id.* at 66. Likewise, certification was denied in *Vulcan Golf LLC*

26 _____
 27 ⁷ Plaintiffs gesture at the availability of statutory damages as a means of avoiding individualized
 28 damages assessments (Opp. 24 n.10), but the fact that some putative plaintiffs with timely
 registered copyrights could elect them in lieu of actual damages, 17 U.S.C. § 504(c), only highlights
 further individualized issues and ignores that statutory damages are often grounded in estimates of
 actual damages or defendant’s alleged illicit profits. See 6 Patry on Copyright § 22:174.

1 v. *Google Inc.*, 254 F.R.D. 521 (N.D. Ill. 2008), because, as here, adjudicating secondary
2 infringement claims against Google on a class-wide basis would have necessitated “potentially
3 millions” of individualized inquiries concerning ownership of the at-issue works. *Id.* at 528. And
4 Plaintiffs’ attempt to distinguish *FPX, LLC v. Google, Inc.* 276 F.R.D. 543, 551 (E.D. Tex. 2011),
5 is unavailing. Class claims could not be maintained there due to the “highly fact-intensive analysis
6 involved in determining the validity of a registered trademark.” (Opp. 25.) Assessing the validity
7 of a registered copyright (ownership and originality) is no less fact-intensive and individualized.

8 Just a few weeks ago, Judge Donato denied certification in a putative copyright and CMI
9 class action, decrying such claims as “poor candidates for class-action treatment.” *Schneider v.*
10 *YouTube, LLC*, 2023 WL 3605981, at *6 (N.D. Cal. May 22, 2023). To wit, “[e]very copyright
11 claim” not only “turns upon facts which are particular to that single claim of infringement,” but “is
12 also subject to defenses that require their own individualized inquiries.” *Id.* The decision also
13 noted “obvious barriers to classwide proof” for CMI claims, finding that the individualized inquiry
14 necessary to determine copyright ownership was, alone, “enough to deny certification,” not to
15 mention that, to prove double-scienter, “each putative class member would need to show, with
16 specific evidence for each work-in-suit, how the removal of [CMI] induced, enabled ... or
17 concealed an identifiable infringement.” *Id.* at *11-13. None of these findings turned on the record
18 or any discovery in that case, and they plainly apply here. Allowing Plaintiffs to pursue class-wide
19 claims that, by their very nature, can never be certified would serve no legitimate purpose.

20 **The “Injunctive Relief Class” Should Be Stricken:** The “Injunctive Relief Class” fails
21 for the same reasons, and because it is coextensive with the “Damages Relief Class,” which seeks
22 individualized damages awards. Plaintiffs do not refute, and thereby concede, that Rule 23(b)(2)
23 “does not authorize class certification when each class member would be entitled to an
24 individualized award of monetary damages.” *Wal-Mart Stores, Inc. v. Dukes*, 564 U.S. 338, 360–
25 61 (2011); *see also Ellis v. Costco Wholesale Corp.*, 657 F.3d 970, 986–87 (9th Cir. 2011).

26 **IV. CONCLUSION**

27 The Complaint fails to state any factually or legally cognizable claim against Midjourney.
28 All claims against Midjourney should be dismissed, and the class claims stricken.
