Description:

In late 2020, Kraken Oil and Gas and Crusoe Energy announced a partnership. Crusoe Energy started with deploying 18 Digital Flare Mitigation (DFM) modules between three different Kraken sites.

Kraken's DFM projects reduced natural gas flaring by millions of cubic feet per day, significantly curtailed emissions, and provided an innovative beneficial use for otherwise flared natural gas.

In this discussion, **Max Gagliardi** (https://digitalwildcatters.com/empower-energizing-bitcoin/max-gagliardi/) will talk to **Bruce Larsen** (https://digitalwildcatters.com/empower-energizing-bitcoin/bruce-larson-2/) and **Cully Cavness** (https://digitalwildcatters.com/empower-energizing-bitcoin/cully-cavness/) about their project and how they are pioneers in solving the oil and gas industry's flaring problem.
