Synergies with O&G: Bitcoin Mining and How to Monetize Stranded or Wasted Energy Assets

Monday, 29 August 2022
3:40 pm–5:20 pm

George R. Brown Convention Center, General Assembly B

Description

Everyone has probably heard about Bitcoin at this point, but we'll set a level playing field with a brief introduction to Bitcoin, touch on "crypto," and then delve into Bitcoin mining, what miners actually do, and the environmental impacts of Bitcoin's negligible energy consumption. That's when it gets exciting as we continue to dig into Bitcoin mining's unique processes that utilize stranded and flared gas sources to problem solve some of the challenges for both industries. Hopefully, you will learn how every midstream company, oil producer, and power generator
