Keep your building secure

The Procare Keyless Entry, Interior Door Control and Biometric Fingerprint Check-in systems for daycare and child care centers allows you to take control of building access and security at your center.

Record real-time access, drop-off and pick-up records

Procare's Keyless Entry System keeps a live record of who enters your building, allowing you to monitor building access in real time or by printing a daily log. The Biometric Fingerprint Check-in Scanner gives you an accurate record of those picking up or dropping off children at your center.

Easily control security through your computer

For Keyless Entry, each ID code can be activated, changed, disabled or placed on a restricted list directly from your computer at any time, providing a safe, secure environment for children and peace of mind for parents. And you can use Procare's Interior Door Controller to provide secure access to designated doors.

Fingerprint technology to improve check-in security and keep children safe

The Biometric Fingerprint Check-in Scanner ensures only authorized caregivers can pick up or drop off the children in your care.

Eliminate the hassle of using keys or swipe cards

With Procare's Keyless Entry System, unique ID codes are assigned to each person, eliminating the cost and hassle of lost keys or magnetic swipe cards.

Improve the safety and wellbeing of children, staff and families with contactless QR code and GPS check-in

Ensure children in your care are safely and securely checked in to your center or school without the need for close, in-person contact. Parents can easily check their children in and out using Procare's smartphone app.

https://www.procaresoftware.com/features/child-care-security-equipment/

How does it work?

Curbside Contactless Sign-In/Out uses GPS technology that allows you to define a boundary where sign-ins can occur. When parents arrive within the GPS range you've specified, they'll receive a prompt on their smartphone through the Procare app that asks them to sign in their child. This means parents can answer kiosk questions and sign for their children without needing to enter the building or touch any devices.

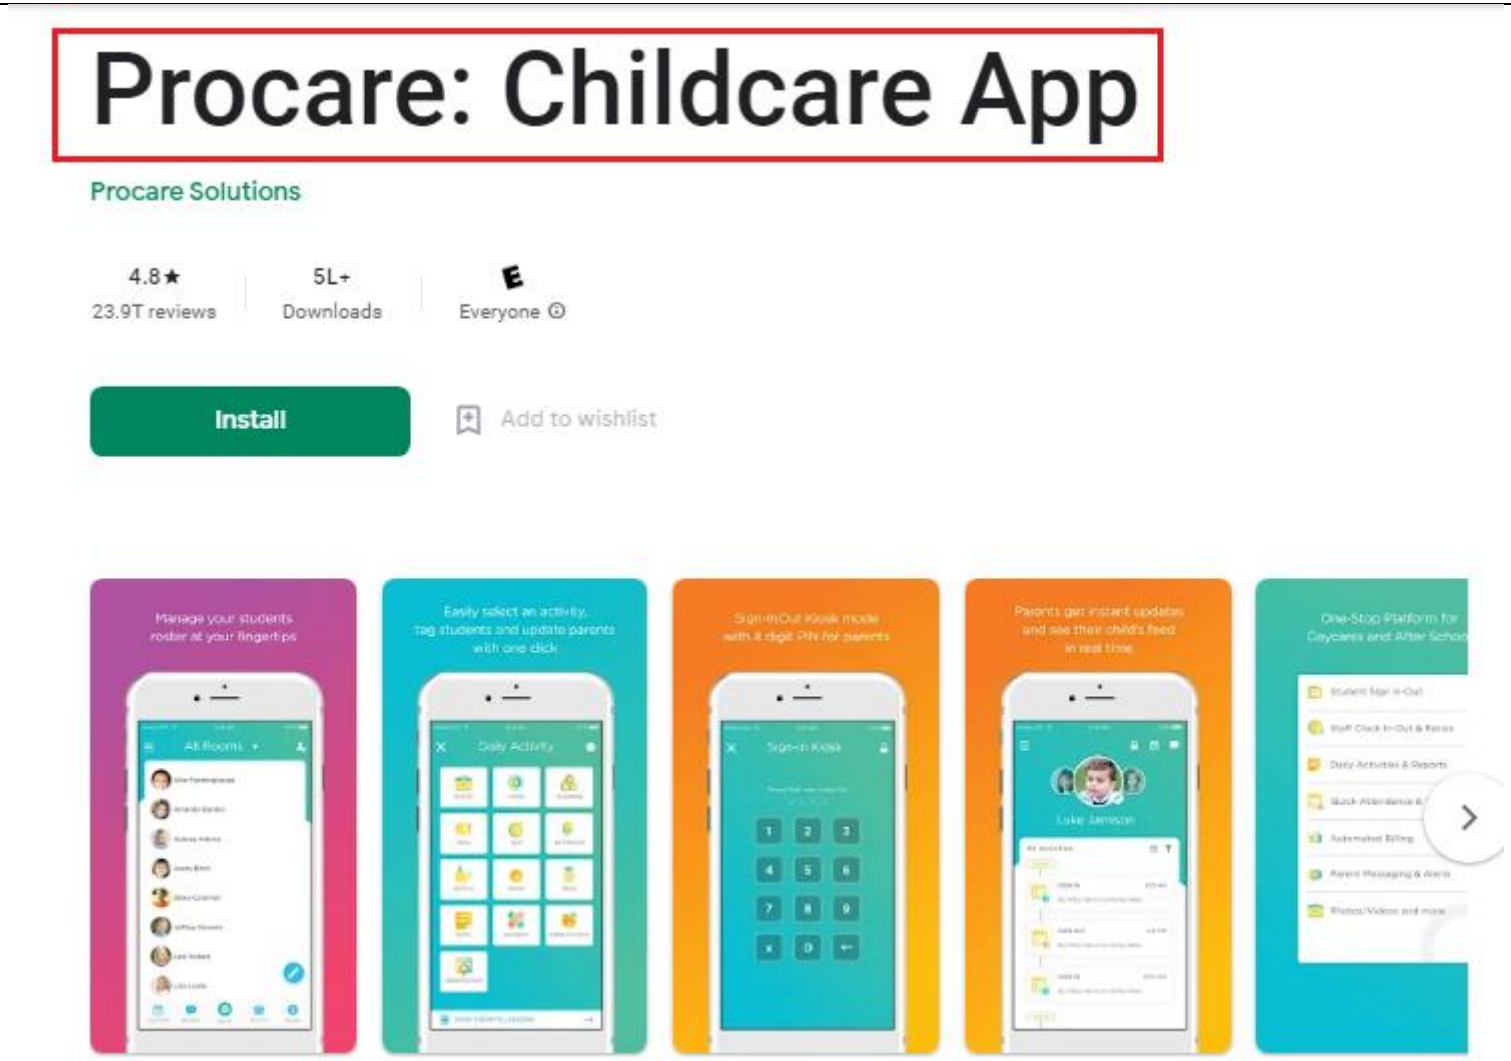

Child care centers can select the radius of their pick-up area.

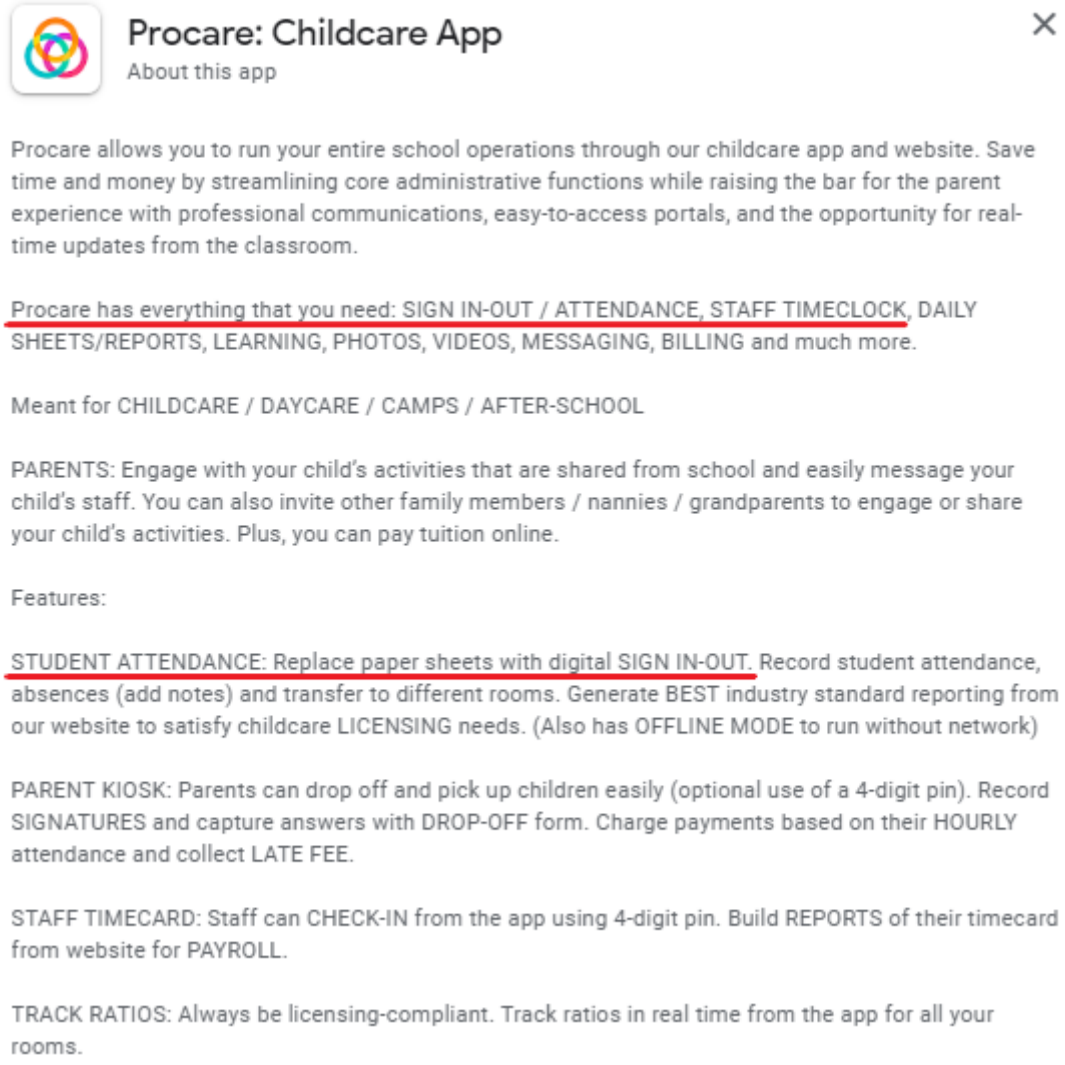

Parents will get a prompt to allow their child care center to use their location for GPS-enabled check-in.

Procare: Childcare App

About this app

Procare allows you to run your entire school operations through our childcare app and website. Save time and money by streamlining core administrative functions while raising the bar for the parent experience with professional communications, easy-to-access portals, and the opportunity for real-time updates from the classroom.

Procare has everything that you need: SIGN IN-OUT / ATTENDANCE, STAFF TIMECLOCK, DAILY SHEETS/REPORTS, LEARNING, PHOTOS, VIDEOS, MESSAGING, BILLING and much more.

Meant for CHILDCARE / DAYCARE / CAMPS / AFTER-SCHOOL

PARENTS: Engage with your child's activities that are shared from school and easily message your child's staff. You can also invite other family members / nannies / grandparents to engage or share your child's activities. Plus, you can pay tuition online.

Features:

STUDENT ATTENDANCE: Replace paper sheets with digital SIGN IN-OUT. Record student attendance, absences (add notes) and transfer to different rooms. Generate BEST industry standard reporting from our website to satisfy childcare LICENSING needs. (Also has OFFLINE MODE to run without network)

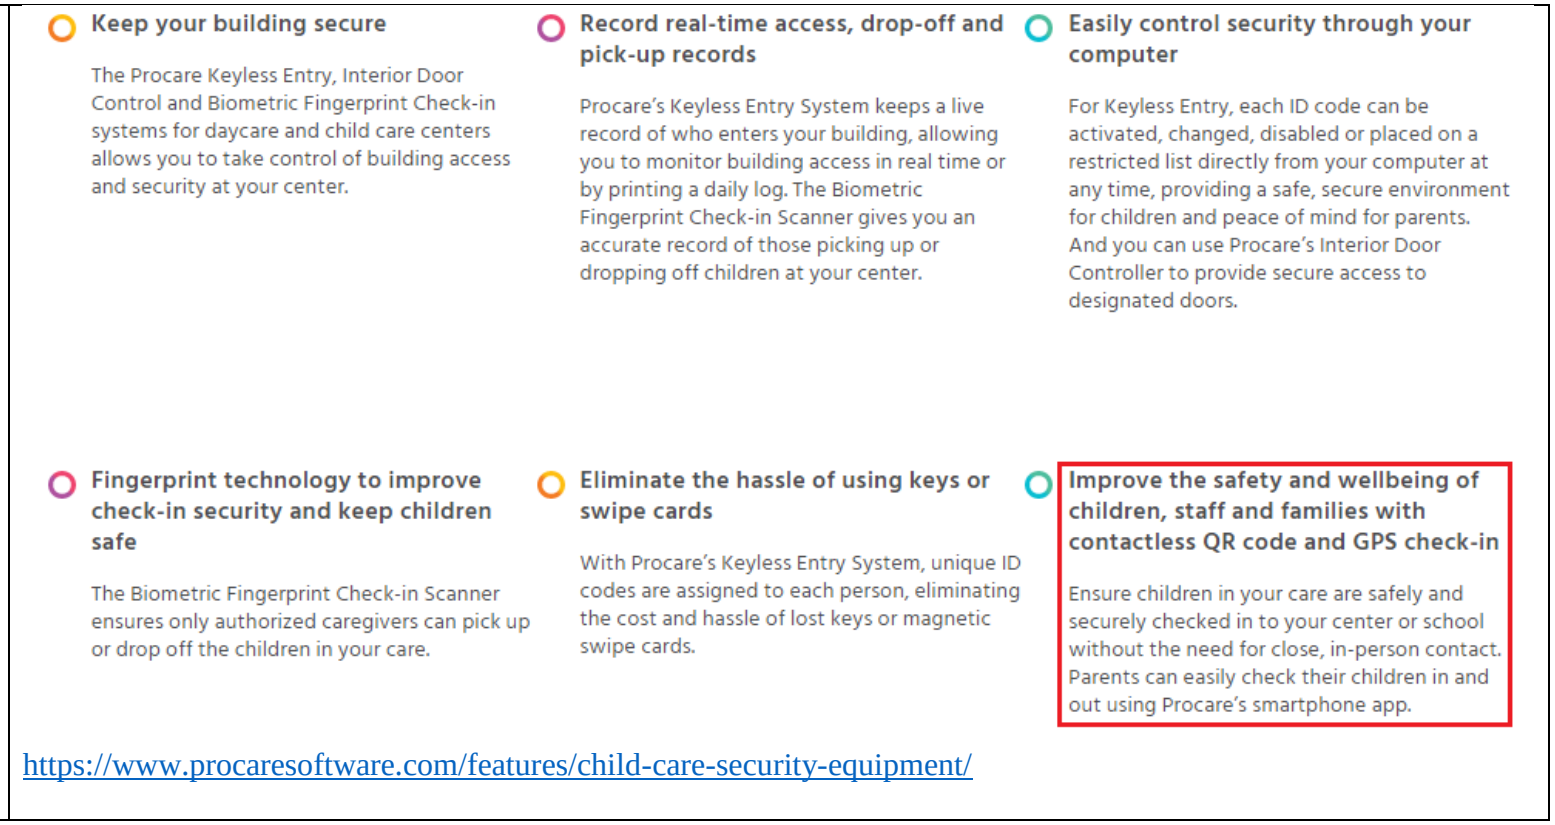

PARENT KIOSK: Parents can drop off and pick up children easily (optional use of a 4-digit pin). Record SIGNATURES and capture answers with DROP-OFF form. Charge payments based on their HOURLY attendance and collect LATE FEE.

STAFF TIMECARD: Staff can CHECK-IN from the app using 4-digit pin. Build REPORTS of their timecard from website for PAYROLL.

TRACK RATIOS: Always be licensing-compliant. Track ratios in real time from the app for all your rooms.

	Schools will now have the option to reduce unnecessary foot traffic and follow distancing guidelines by using the Curbside Contactless (GPS) to allow parents to sign children in and out. This geofencing solution works by only allowing parents to sign their children in or out when the parents' devices register that they are present at the school. By using GPS, Procare ensures that the parents are within the radius that the school has set before the parents are able to sign their children out from their own device. https://help.procareconnect.com/en/articles/4162923-curbside-contactless-gps-sign-in-out

How To Enable Curbside Contactless (GPS) Sign-In/Out

The first step to enabling the curbside GPS sign-in/out is to go to School Settings > Settings > Enable Curbside Contactless (GPS) Sign In/Out > Setup Geo-Fence.

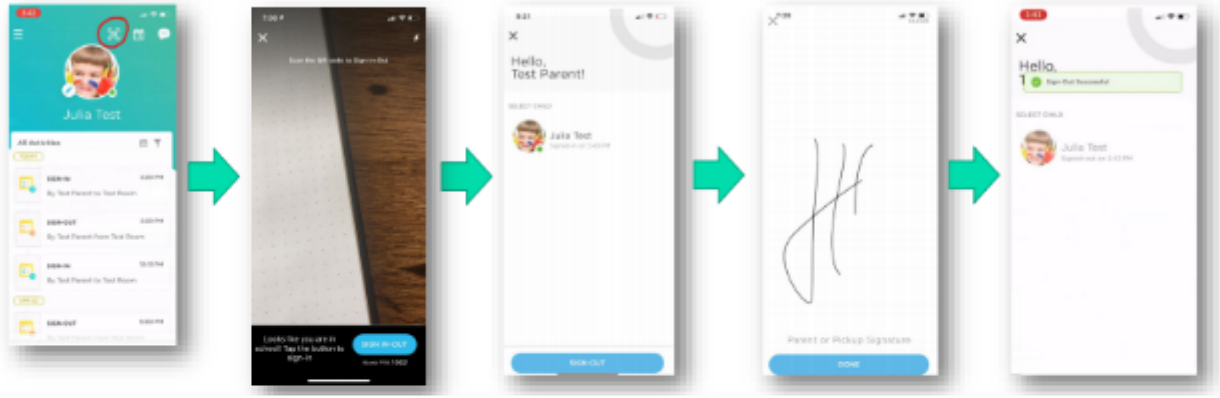

https://help.procareconnect.com/en/articles/4162923-curbside-contactless-gps-sign-in-out

https://help.procareconnect.com/en/articles/4162923-curbside-contactless-gps-sign-in-out

The sign-in button will only be highlighted when the parents are within the designated perimeter.

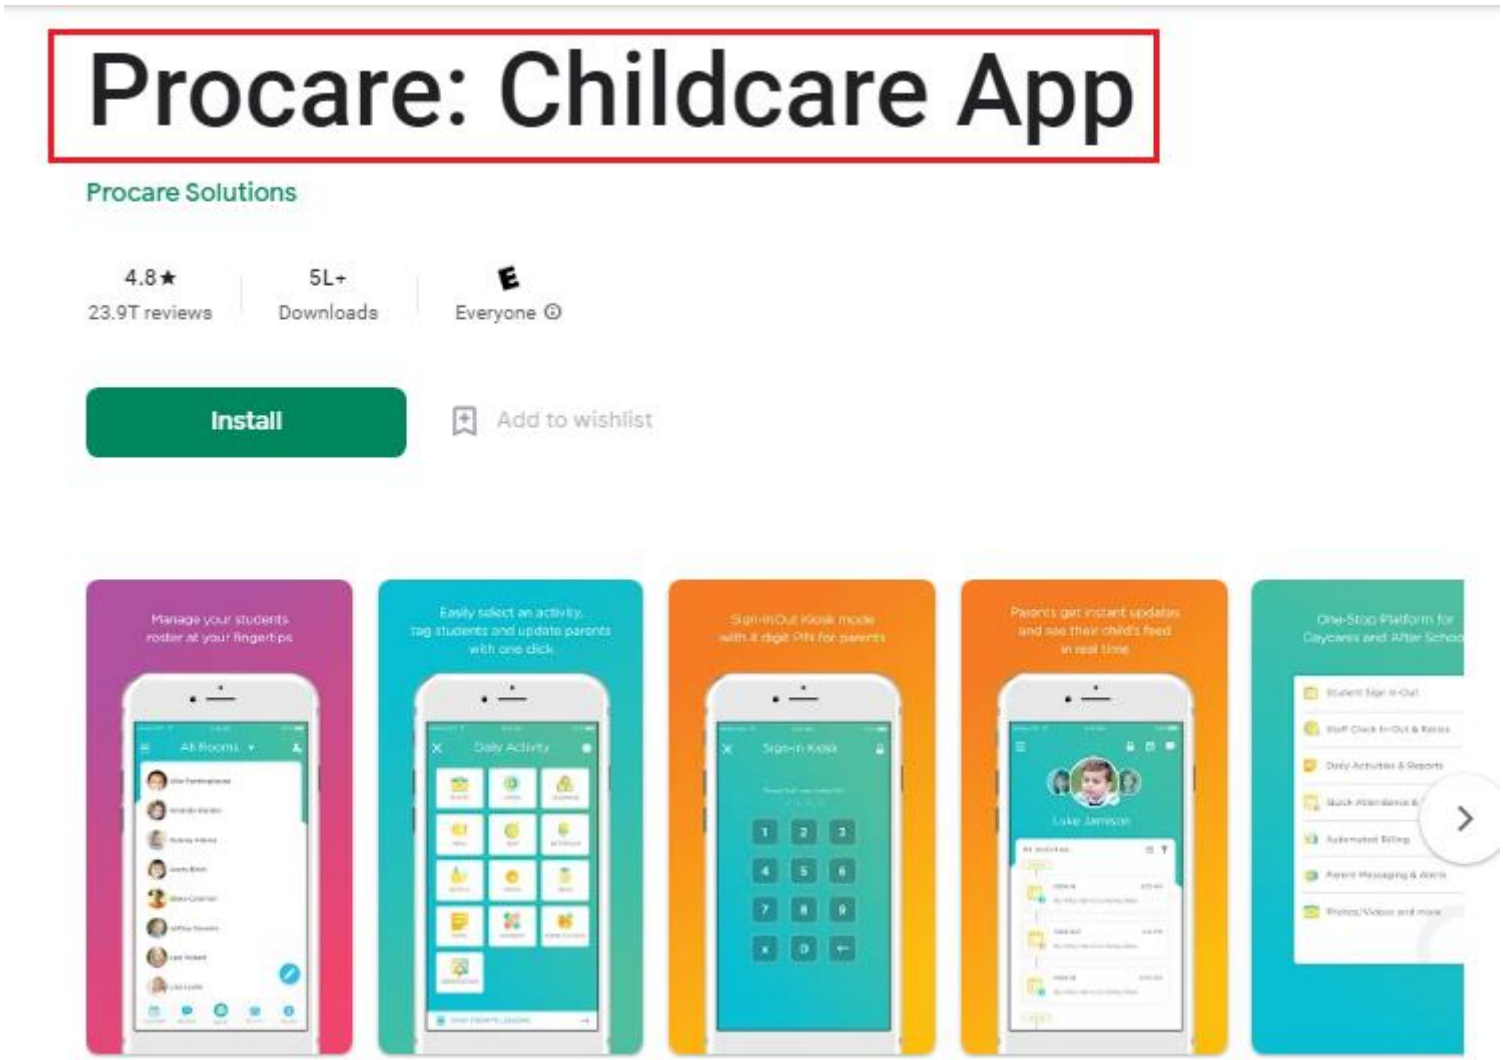

Parents will then be prompted to complete the same steps as if they have entered their four-digit pin into the kiosk, or if they had scanned the school's QR Code.

You also have the option to require parents to submit answers to questions from their own devices by using the Parent Kiosk Forms. This is a great way to track the health data of your children, and staff can view the answers right from the mobile app!

Please note: that this feature will require parents to allow the Procare app to have access to GPS on their mobile devices.
