

EXHIBIT B

3/6/17

FBI trying to determine what is behind ADUS tweets, possibly of computer server at Alpha Bank as reported by Breitbart news.

- dredged up minor of denied FISA - June/July + successful in Oct.

- refers to server - first brought to FBI att by atty / ~~attorney~~ re: Alpha Bank opened by Michael Friedman - an oligarch off of Putin Admin. Allegation was they had seen suspicious activity between server for Alpha Bank + Trump ~~Company~~ ^{Hotel group} Attorney brought to Jim Baker + d/r say who didn't use. Said computer researchers saw the contact. Said media orgs had the info including NY Times. Jim + Bill

NY Times was trying to get info they were going to publish. We said hold off while we look into it + could not confirm, so NY Times d/r published

— spoke to NY Times.

FBI determined the Trump Hotel Group used company in FL to admin domain for hotel group. Server housed in Philly. Trump Hotel told admin did not need server + asked them to turn off, yet still on lookup tables until FBI told them ^{+ long} to shut down. Last ~~the~~ spring, saw that Alpha Bank was among those attempting to contact server. The server had been used to put out advertising/marketing emails. Can't say what had occurred historically between Alpha Bank + Trump server.

Some variant of this story would be behind Breitbart allegations.
