Exhibit Laks-1

Minutes of the Eclipse Board Meeting
Sept 05th, 2002

The fourth meeting of the Eclipse Board was held from 9:30 AM to 4:30 PM CDT on Thursday, September 05, 2002. The location was The Hyatt Regency O'Hare at the Consular Room room, Chicago, Illinois.

The following are the minutes of this meeting.

Stewards in Attendance

Borland	Thornhill, Simon
ETRI *	Kim, Heung-Nam (delegate for Kim, Chae-Kyu)
Fujitsu	Alepin, Ronald
HP *	Rank, Mike
Hitachi	Takanuki, Ryuji
IBM	Nackman, Lee
Instantiations	Johnson, Mark (delegate for Taylor, Mike)
MKS *	Martin, Dave
MontaVista Software	Ready, Jim
QNX	Dodge, Dan
Rational	Bernstein, Dave
Red Hat	Tiemann, Michael
Scapa Technologies	Norman, Michael
Serena Software	Kapitanski, Boris
SlickEdit *	Hintz, Ed
Sybase	Reti, Karl
Telelogic	Chang, Tony
TogetherSoft	Olson, Todd
Trans-Enterprise Integration	Ricker, Jeffrey

* New Stewards elected at the June 5, 2002 Board Meeting

Stewards who voted electronically

MERANT	Pease, Dave
Instantiations	Taylor, Mike

Associate Members in Attendance

Academic	Barry, Brian

Eclipse Staff in Attendance

Eclipse Platform PMC	Wiegand, John
Eclipse Platform PMC	Thomson, Dave
Eclipse Tools PMC	Duimovich, John
Eclipse Technology PMC	Barry, Brian
Eclipse communications	Erickson, Marc
Eclipse Chairperson	McGaughey, Skip

Minutes of the Eclipse Board Meeting
Sept 05th, 2002

Agenda

1) Introductions
2) Individual Steward Update (quick discussion by each Steward about their experience of Eclipse and Critical Issues and focus items)
3) New Member Applications and Decisions
4) Current Eclipse Update and Status
   --- Review, modifications, approval of June 5 Eclipse Board Minutes
5) Technology
   5.1) Platform PMC status and review of Eclipse 2.0
   5.2) Tools PMC update, status, and approval of new tools projects
      Demo C/C++ Dan Dodge
      Demo COBOL Ronald Alepin
   5.3) Testing discussion
   5,4) Technology PMC Update
   5.5) Compliance and Certification discussion
6) Scaling Sub Committee
7) Marketing
   7.1) Marketing Update on visual imagery, Communication Plan, and Web Proposal

Business & Organizational Section

Selection of new Eclipse Member Organizations

The following organizations were approved for membership in the Eclipse Board: SlickEdit Inc., MKS Inc., ETRI (Electronics and Telecommunications Research Institute), HP Company. The list of Eclipse Member Organizations is provided at www.eclipse.org.

Selection of new voting members of the Eclipse Board (Stewards)

The following individuals were approved as Stewards and voting members of Eclipse Board:

Member Organization	Steward
SlickEdit Inc.	Hintz, Ed
MKS Inc.	Martin, Dave
ETRI	Kim, Chae-Kyu
HP Company	Rank, Mike

The Board unanimously agreed to extend an invitation to Oracle to join the Board. This is the same type of invitation that the Board extended to SUN and BEA after the March Board Meeting. Under this invitation, Oracle would be pre-approved to join the Board with the agreement that Oracle would meet the same selection criteria as any other Member Company and would sign the same Membership Agreement that all Eclipse Member Companies sign.

Minutes of the Eclipse Board Meeting
Sept 05th, 2002

Scaling Subcommittee Report

The following is a summary of the Scaling subcommittee presented to the Board for discussion: Lee Nackman reported the deliberations and recommendations of the scaling subcommittee. The subcommittee members included: Lee Nackman (chair), Dan Dodge, Karl Reti, Dave Thomson, David Pease, Dave Bernstein, Jeffrey Ricker, Todd Olson. Michael Tiemann and Skip McGaughey were added to the Scaling committee.

The problem statement for the subcommittee included: The Eclipse Board has grown from 9 members to 21. The membership crosses many time zones in Europe, North America, and Asia. The requests for board memberships are continuing. There are request and inquiries from analysts and vertical industry groups to join the board. The Board is facing a critical stage where the issues of size, criteria for membership, membership application process and manageability of the Board affects the ability to communicate, coordinate, and control the Board activities needs to be successful. At the June Board meeting, the Stewards began to address these issues by forming a Scaling Subcommittee. Lee Nackman reported that there were 2 different kinds of scaling that the subcommittee is addressing. The first is how to scale the size of the Board; the second is to determine "how to get the work done."

Each Steward defined the 3 highest-priority objectives for the eclipse.org Board. The summary and synthesis of this poll as presented to the Board included:

- Enable multiple tool providers to deliver Eclipse-based products
- Provide reliable core platform technology
  - Support large-scale, mission-critical, localizable development environments
  - Transparent integration from multiple vendors
- Balance platform functionality vs. commercial opportunities
- Establish critical mass
  - Eclipse legitimacy and ubiquity
  - Dominant (non-MS) tools platform for enterprise software development
  - Vibrant developer community contributing to the platform
- Enable company contributions to enhance reputation and visibility in enterprise software development market

The subcommittee identified two key enablers to the Stewards objectives. These included: 1) a healthy open source project with diverse participation, and 2) successful Eclipse-based commercial products, which, in turn, promote "Eclipse inside". These two enablers are both complementary and conflicting. The business desires to promote commercialization must be achieved without "tainting" the open source project. The two enablers require different skills and serve different communities/cultures. The subcommittee reaffirmed the need and importance of separating the consortium from the open source project.

These two enablers define Eclipse to be composed of 2 communities. The Eclipse Open Source Project and the Eclipse Consortium. The Open Source Community is composed of the PMC projects, which builds the technology and is run by a contribution-based meritocracy of developers and project leaders. The Eclipse Consortium is a community of companies shipping or planning to ship Eclipse-based products, which promotes Eclipse, and coordinates the commercial activities with the Open Source Project.
The operational model of the Consortium would be

Minutes of the Eclipse Board Meeting
Sept 05th, 2002

- Board Membership requires declaring support and intent
- Subcommittees do the real work
- Focus is on commercialization, joint marketing/advertising coordination, interoperability, promotion of eclipse technology in the commercial community
- Maintains supportive but arms length relationship to open source project
- Consortium speaks "about" the open source project – not "for" it.

The operational model of the Open Source Project would be:

- All contributors welcome – commercial, academic, open source, free software, large companies, individuals
- Consortium members influence by contributing and the influence is proportional to contribution
- Focused on making the technology better for all users and promoting Eclipse in the technical community
- Open Source Project speaks for itself
- Contributors may be a different group than consortium members

The Key question that the subcommittee identified was: "What is the organizational structure that will help us achieve the key enablers without limiting growth?"

The recommendations include:

- •Reaffirm separation of open source project and consortium and the purpose of each
- •Scale by establishing working subcommittees
  - –Chaired by a board member
  - –Participants can be delegates appointed by board members
  - –Membership subject to active participation
- •Current executive committee doesn't scale: transform into one or more working subcommittees

The discussion at the Board included:

The Board needs to be flexible as the transition occurs from a project that is primarily based upon technology to one with a larger scope. As Eclipse evolves, there need to be processes defined including as examples, technology submission, new member education and involvement, definition of organization structure, and creation of a legal entity. The roles of the subcommittees will change as Eclipse evolves and as the industry evolves. As Eclipse organically grows and develops, Eclipse needs to foster synergy across the communities and collaborative teams need to evolve to solve tangible problems that affect the success of Eclipse.

In the discussion there was consensus that the business of the Board needs to be defined. There was strong consensus that Eclipse needs a clear vision, goals, objectives, strategy, strategic direction, and Roadmap for Eclipse, which includes both the consortium, and the Open Source Project. The Board needs to think through how to construct the vision, "What does Eclipse want to accomplish." The discussion reaffirmed the fundamental desire to keep the barriers to entry low to bring people into the Eclipse community.

This roadmap on the Open Source Project would include the R3 for the Project PMC, the Tools roadmap, and the desired technological, academic initiatives, as well as a clear discussion of

interoperability. The roadmap needs more than features and dates. It needs to describe the level and nature of interoperability. Topics need to have their categories and goals. The roadmap needs to serve the needs of the individual member organizations and goes beyond particular subprojects of the next month or next Board meeting.

On the consortium side, Eclipse needs to assure that the current members and new members understand Eclipse direction, strategy, and how it plans to execute to achieve the vision. This includes all facets of Eclipse from membership, marketing, and organization, including legal, subcommittee structure, participation model, contribution models, and organizational structure.

There was agreement the Board needed to define their control mechanism. In general, the Board expressed a need to have control over what is done under the Eclipse auspices. For example the Board has approval rights over new projects, it can replace Eclipse staff. Board members can control Open Source Projects by investing in people to do the work. The control mechanisms need to be clearly articulated and agreed to by the Board.

On specific ideas for subcommittees:
There needs to be a clear definition of what the Board as a whole needs to do versus the authority and responsibilities of the subcommittees. Each subcommittee could be very different in constitution. There could be standing and temporary subcommittees. Each subcommittee needs to have a specific charter that is agreed to by the Board that defines the role, function, vision, and authority and time duration of the subcommittee . The Board and the subcommittees need to address the need to have the subcommittees be composed of active participants. The general recommendation is for the subcommittee chairperson to be pro active, to limit the participation to only active members or their delegates.
The scaling subcommittee suggested there would be a model with a larger number of subcommittees that are smaller in size and topical in focus. There was discussion that the Board could establish a technical subcommittee that would interact with the open source project. There needs to be a coordination mechanism to get the PMCs working together.

There was consensus that the current Executive Committee, with each company having one representative, was not working and did not scale to provide efficient or effective communication or management across the Eclipse communities.

The Board appointed the following Subcommittees and Chairpersons
Marketing --- Dan Dodge of QNX
Legal --- Mike Rank of HP
Scaling / Organization --- Lee Nackman of IBM
The formal election of each of the Subcommittee Chairpersons and the approval of the Subcommittee Charter will be discussed and decided at the December Board. In particular, it is envisioned that a formal process for nominating and electing Subcommittee Chairpersons will be developed and adopted at the December Board.

Minutes of the Eclipse Board Meeting
Sept 05th, 2002

Approval of Minutes from June 2002 Board Minutes

The Stewards unanimously approved the minutes of the June 2002 Eclipse Board Meeting.

Open Source Project Section:

Update on Platform / Project PMC--- John Wiegand & Dave Thomson.
The R2.0.1 Maintenance release has been shipped. The team is working to make this the sustainable platform for the next 12 months. The current view is this will represent a 12 to 18 month release cycle. John Wiegand provided a high level overview of the architecture, which is available on www.eclipse.org.

Update on Tools PMC.

Update on Tools PMC: C/C++ Project--- John Duimovich
The teams are working together and the expectations are being met. Sebastian Marineau of QNX is providing the leadership. QNX, Rational, MontaVista, Red Hat, and IBM support the project. The project is up and running on http://www.eclipse.org/cdt/

Update on Tools PMC: GEF Project--- John Duimovich
The project is becoming close to product quality; it is intended to be shipped in products. There are plan synchronization issues between the platform and GEF that are being worked. There are many users in the newsgroups. Details of the project are on http://www.eclipse.org/gef/

Update on Tools PMC: Server Tooling --- John Duimovich
Many companies are interested in server based tooling. The activity level is low and the present developers are not as active in the project due to the other obligations.

Authorization of Tools PMC: Create New Project for COBOL
The Eclipse Tools PMC Leader, **John Duimovich**, recommended approval of the creation and starting of the COBOL Project. The Board approved. Fujitsu has assumed the leadership role and has defined the project including roadmap on the www.eclipse.org site.

Authorization of Tools PMC: Create New Project for Collaboration Server
The Eclipse Tools PMC Leader, **John Duimovich**, recommended approval of the creation and starting of the Collaboration Server Project. The Board reaffirmed the importance of collaboration. The Board referred this to the Technology PMC and asked Brian Barry to work with Instantiations to clarify this project.

Minutes of the Eclipse Board Meeting
Sept 05th, 2002

Authorization Tools PMC: Create New Project Eclipse Modeling Framework (EMF)

The Eclipse Tools PMC Leader, **John Duimovich**, recommended approval of the creation and starting of the EMF Project. The Board approved.
EMF is an Eclipse Modeling Framework

- Java/XML mechanism for model-driven tool development
- Generate tools and apps from XML models
- EMF provides:
  - A uniform programming model. A suite of tools/products that share a model can integrate through the Java interfaces to that model. This allows much tighter integration and better developer feedback than file interchange.
  - Uniform XML interchange of objects among the tools .
  - Reduced learning curve to add new tools to the suite.

Details of project are on www.eclipse.org

Authorization of Tools PMC: Pursue new Project for Testing and Trace

Mike Norman led discussion of this Testing Framework . It is a collaborative effort between Scapa, IBM, Rational, and Telelogic. The project addresses the issue that today, Eclipse is currently primarily used as an IDE . Eclipse can become an Integrated Test and Trace Environment (ITTE) supporting:

- Application trace capture
- Trace to test conversion
- Automated functional tests
- Automated load/stress tests
- Non-automated test activity definitions
- Test management tools
- Trace and test analysis tools

The Eclipse Tools PMC Leader, John Duimovich, recommended the PMC pursue the creation and starting of the Test and Trace project. The Board approved. Details of project will be on www.eclipse.org shortly.

Update on Technology PMC: Eclipse Research Fellowship and University Programs.

The Eclipse Technology PMC leader, **Brian Barry**, lead the discussion of this project. This project is starting with an initial funding by IBM. There are 12 projects from all over the world. The hope and expectation is other companies will also provide funding as we move forward. Because it is a technology project no Board approval is necessary.

Update on Technology PMC: Creation XML Schema Project

The Eclipse Technology PMC leader, **Brian Barry,** lead the discussion of this project. The project is primarily lead by IBM. This project is:

--- Java model for XML Schema edit, modify
--- Uses EMF runtime components
--- Uses common API's for all XML tooling

Because it is a technology project no Board approval is necessary.

Minutes of the Eclipse Board Meeting
Sept 05th, 2002

Compliance and Certification discussion

Tony Chang of Telelogic presented and lead discussion of issues relating to the need for certification programs for skills and product compatibility. This discussion included proposed goals for a certification program, the limits of Eclipse participation (as a program enabler rather than implementer), and issues relating to the interoperation of plug-ins running on an installed developer platform. There was no action on this proposal at the board meeting.

The Marketing Team presented a summary of recommendations for establishing an identity to associate commercial Eclipse based offerings. This included both a graphic symbol and word marks.

The objective is to provide a consistent way for Eclipse based offerings to identify their association with Eclipse in the marketplace. They differ from the multiple versions of artwork used by the open source community in that they are: consistent, easy to reproduce in a variety of monochrome and color media, used to identify commercial rather than open-source activities of our consortium.

The symbol was received well by the board, Members confirmed the need for separate word marks for products that are created from Eclipse distributions, and for products that plug-in to Eclipse platforms.

Michael Tiemann raised concerns about the establishment of formal use rules for the symbol and word marks. He indicated the need to carefully protect symbols and their meaning, as well as the need to avoid interfering with member brand establishment and equity. Michael agreed to assist the marketing committee by reviewing rules for proposal at the next board meeting.

Adjournment:

The next Board meeting will be Dec 4, 2002 in Dallas, Texas.
The meeting ended at 5:45PM CDT.

Exhibit Laks-2

Eclipse Board Meeting Minutes May 28, 2003

The seventh meeting of the Eclipse Board of Stewards, held at the Hyatt Regency O'Hare (9300 W. Bryn Mawr, Rosemont, Illinois...) conference center in Chicago, Illinois, was called to order on May 28, 2003 at 9:30AM CST, Skip McGaughey, Eclipse Chairperson presiding.

These are the minutes of this meeting.

Stewards in Attendance in person or by phone:

ASC	Dave Orme
Borland Software Corp.	Todd Olson
CanyonBlue	Allister Yu
Catalyst Systems Corporation	Long Nguyen delegate for Tracy Ragan
Ensemble-systems info	Jun Terado
Ericsson	Ronald Ingman
Flashline Inc.	Adam Wallace
Fujitsu Software Corp.	Ronald Alepin
Genuitec	Todd Williams
Hewlett-Packard Company	Michael J. Rank
Hitachi, Ltd., Software Division	Ryuji Takanuki & Koichi Yokota
IBM Corporation	Lee Nackman
Instantiations, Inc.	Michael Taylor
INNOOPRACT	Jochen Krause
Intel	Sharon Foye and Jonathan Khazam
M7 Corporation	Jawahar Malhotra
MicroFocus	Don Schricker
Oracle	Ted Farrell
Parasoft Corporation	Roberto Scaramuzzi delegate for Roman Salvador
QA Systems	Wim Van de Brug
QNX Software Systems Limited	Dan Dodge
Red Hat, Inc.	Michael Tiemann
SAP AG	Michael Bechauf
Scapa Technologies Limited	Michael Norman
Serena Software, Inc.	Boris Kapitanski
SilverMark, Inc.	Michael Silverstein
Sybase, Inc.	Karl Reti
Teamstudio Inc.	Ian D. Smith
Telelogic	Jean-Louis Vignaud
TimeSys Corporation	Manas Saksena
Tensilica	Chris Songer
Wasabi systems	Ross Harvey
WindRiver	Tomas Evensen

Associate Members in Attendance:

Object Management Group, Inc.	Richard Mark Soley, PhD

Eclipse Board Meeting Minutes May 28, 2003

Academic Representative Brian Barry

Eclipse Representatives in Attendance:

Eclipse Independent Entity Chair	Dave Bernstein
Eclipse Project PMC	John Wiegand
Eclipse Project PMC	Dave Thomson
Eclipse Tools PMC	John Duimovich
Eclipse Technology PMC	Brian Barry
Eclipse Secretary	Linda Campbell
Eclipse PR	Marc Erickson
Eclipse Chairperson	Skip McGaughey

The Preliminary agenda

Membership Committee and new members elections	Skip McGaughey
Independent Entity Report	Dave Bernstein
SWT / Swing Interoperability Update	Dave Thompson
Project Review Committee	Michael Tiemann
	Lee Nackman
Open Source Project	
Platform PMC	John Wiegand
Tool PMC	John Duimovich
Technology PMC	Brian Barry
Legal Advisory Committee	Mike Rank
Marketing Committee	Mike Taylor
Finance Committee	Ian Smith

Membership

Selection of New Eclipse Member Organizations

Pursuant to electronic votes completed on May 16, 2003, the following organizations and Stewards were approved as members of the Eclipse board:

Company	Board Steward
Advanced System Concepts	David Orme, Chief Architect
Genuitec	Todd E. Williams, VP of Technology
INOOPRACT	Jochen Krause, CTO
Unisys	Sumeet Malhotra, Director of Technology and Architecture

Pursuant to electronic votes completed on May 24, 2003, the following organizations and Stewards were approved as members of the Eclipse board:

Company	Board Steward
Tensilica	Chris Songer, Director of Platform Engineering
Canyon Blue	Allister Yu, VP Business Development
Ensemble Systems	Jun Terado, VP of Engineering
Wasabi	Ross Harvey, Chief Architect, IDE

	Products

Change of Steward at Ericsson
The Board Steward for Ericsson, Steward Ronald Ingman, was unanimously elected. He replaces Jaak Urmi.

Reelection of Academic Representative as Associate Member
The Eclipse Academic Representative, Brian Barry was re-approved for a 1 year term unanimously.

Selection of New Eclipse Member Organizations
Intel, Micro Focus and WindRiver were approved as Member Companies on the Eclipse board.

Selection of New Voting Members of the Eclipse Board (Stewards)
The following individuals were approved as Stewards and voting members of the Eclipse Board:

Intel	Jonathan Khazam, General Manager, Intel Software Development Solutions Group
Micro Focus	Don Schricker, Director of Standards
Wind River	Tomas Evensen, Senior Director of Engineering

Independent Entity Report

Dave Bernstein updated the board on the status of the Independent Entity Formation sub-committee that he chairs.

The Independent Entity Committee is composed of: Dave Bernstein, Jochen Krause, Howard Lewis, Skip McGaughey, Michael Tiemann, Lee Nackman, Mike Rank, Ian Smith, Mike Taylor

The objectives of the Eclipse Independent Entity were reaffirmed and supported by the Board. These objectives include:

1) Synergistically support the Eclipse Open Source Project,
2) Encourage development of an Eclipse ecosystem
3) Provide:
   3.1) A funding model to allocate administrative costs among member companies
   3.2) Legal entity status to collect and disburse funds,
   3.3) Independent legal counsel
   3.4) Formal trademark and liability protection

There was a discussion about the Eclipse mission and member company expectations, which increase as Eclipse becomes more central to a company's portfolio of offerings.

A more lasting structure is needed to ensure that required resources and energy are available in a neutral and consistent organization that is focused on Eclipse, moving its roadmap forward.

Dave Bernstein and the committee surveyed the Stewards, several industry analysts, and Eclipse Open Source community; they identified the following 6 critical issues that needed to be addressed.

1. Eclipse's image in commercial end-user organizations
Eclipse was widely recognized within the tool community. This included tool providers such as tool vendors and tool builders. However, there was minimum awareness and confused identity within the end user community. Eclipse is often construed as a standard rather than a platform for tool integration. Eclipse is also viewed as inconsistent with OMG standards. Eclipse is perceived as dominated by IBM.

2. Articulated vision, progress roadmap
The need for an industry neutral roadmap is a key factor that is slowing Eclipse investment. If tool producers and providers cannot see the roadmap, they cannot work out where they will be investing resources. There is a related concern with being able to increase the number of contributors to the open source project.

3. Eclipse needs to work with other Java providers to help unify the Java tools market.
The perceived fragmentation of Java inhibits the adoption of Java based solutions. The name "Eclipse" might offend Sun/Solaris users. Eclipse needs to work closely with industry standard groups and be an implementer of industry standards.

4. Increase Open Source Project participation by consortium members.
There are not enough resources to provide evangelism, development, coordination of projects, and enablement.

5. Current organization is becoming more awkward with growth.
Eclipse Board has grown from 9 members to over 40 members. The adoption of the technology is in 125 countries, with over 450,000 unique organizations and millions of download requests. This growth has placed great stress on the membership, the management, and the administrative funding. The current management structure of committees based upon volunteers is not able to provide the communication, coordination, and control to sustain the growth.

6. Improve support for C/C++
The primary initial focus of the Language Tooling has been on a Java IDE. There was uniform agreement to make the C/C++ IDE into the leading IDE for this market.

The Board discussed these issues and agreed these were the appropriate issues for the Independent Entity to address:

Eclipse Board Meeting Minutes May 28, 2003

Dave Bernstein reported that the Independent Entity Committee would focus its work in following five solution areas

Solution 1: Reposition and promote Eclipse as a neutral, open development platform for tool integration and interoperability
This includes formulating and creating a clear vision. This vision would position Eclipse as a neutral, open development platform for tool integration and interoperability. An Open Source community of tool providers would build Eclipse. Eclipse would operate under an Open Source model with a license that grants royalty-free source code and worldwide re-distribution rights. Eclipse would target the full spectrum of execution environments.

A powerful ingredient brand would be created that confers value on the end-user products that incorporate Eclipse Technology. Eclipse would work with the appropriate Standards organizations to provide documentation and reference implementation code (e.g. add-in APIs) to OMG and other standards bodies. Eclipse would aggressively recruit development contributions required to achieve the vision. These additional contributions would come from consortium members, non-consortium members and Open Source developers. Eclipse would attract and enable plug-in providers who would provide tooling, documentation, and technical support. Partners would be created to provide promotion. Service providers would be recruited and supported.

Solution 2: Add organizational structure populated by a tiered membership and directed by a Board of Directors

Eclipse would create an Eclipse.org Board of Directors, which would approve strategy, plans and policies. A tiered membership model would be based upon the member's contributions. Directors would be from member companies and the open source project. The current Board of Stewards for the consortium would remain and be responsible for building the ecosystem.

The Open Source Project would be responsible for building the Platform for tool integration and interoperability. An Architecture board would be created. The Architecture Board would be chaired by a member of the management organization and be populated by Open Source Project committers chosen by the architecture board chairperson.
A very preliminary typology of membership classes was presented:

- Tier-1 members
  - Companies strategically committed to building their application development tooling on the Eclipse platform
  - Large annual contribution ($ and/or staff on assignment to open source projects and management positions)
- Tier-2 members
  - Companies whose products incorporate Eclipse
  - Moderate annual contribution ($ and/or staff on assignment to open source projects and management positions)

- Tier-3 members
  - Companies whose products are Eclipse plug-ins or services
  - Nominal annual contribution

The concept of Tiered membership will be discussed extensively with the current Board Members and evolved to meet the financial, organizational and technical needs of the Eclipse community.

Solution 3: Create a Management Organization

Eclipse would employ an Executive Director who would report to the Board of Directors. The Executive Director would be responsible for the Eclipse Vision and its attainment. The Executive Director, with the approval of the Board of Directors, and supported by an architecture board, will create and maintain the roadmap, release plan and deliver the technology.

Eclipse would have 2 major functional sub-organizations. The first is the Eclipse Consortium. The second is the Open Source Projects.

The Consortium: builds the Eclipse Ecosystem, which includes membership recruiting, membership criteria enforcement, promotion, and management of ecosystem related committees. A member of the management team reporting to the Executive Director would chair the consortium.

The Open Source Project builds the Eclipse Platform. The Chair of the Architecture Board is appointed and responsible to the Executive Director.
The development leadership is responsible to attract, facilitate, coordinate, harvest and assess technology. In this proposal, the existing PMC structure disappears, and is replaced by development teams operating under open source paradigms that report to the Eclipse board. The Open Source Project is responsible for 1) the project infrastructure, including configuration / change management and Eclipse web site. 2) Platform management including requirements analysis, key use cases. 3) Platform marketing including positioning, evangelism, promotion, PR, & event 4) academic / research outreach and programs 5) enablement services including jump-start programs and education & training curriculum and services.

Solution 4: Help Unify the Java Community

The Independent Entity Committee will approach and attempt to recruit Sun and its community.
The emphasis of the SWT/SWING will be upon an interoperability approach rather than a competitive positioning. The desire is to have Sun publicly commit to SWT and rapid approval of a JSR incorporating SWT "by reference". Eclipse would re-affirm its commitment to support JCP and other standards. The goal is for Sun to join as a major contributor to Eclipse. Under these conditions, the name "Eclipse" would be replaced with an attractive but neutral name as part of its transition to an independent legal entity.

To present a unified Java community Borland, BEA, and Oracle would be asked to play major leadership roles. Eclipse architecture would be extended to provide vendor-neutral J2EE Application Server and J2ME Micro Edition tooling.

The Stewards engaged in discussions and debate. A summary of the key conversations is:

--- There was discussion concerning if the Eclipse Tier 1 companies would publicly commit to build ALL of their application development tooling on the Eclipse platform. The Board endorsed the policy that each company would adopt the Eclipse Technology based upon their self-interest.

--- There was concern about Eclipse branding and its relationship to the brands of offerings by member and non-member companies and individuals. Concerns include identifying a single "Eclipse", compatibility and standards adoption. The ingredient brand positioning is needed to make it clear that we are not trying to establish Eclipse as a commercial end user product in competition with members and others.

--- There are powerful advantages to everyone for commercial products being instances of Eclipse, including: interoperability, packaged add-ins, alternate offerings – leading to a much larger total available market for services and offerings and much easier end user adoption. There are technical challenges to maintain that level of integration. The benefits are huge from this.

--- An independent entity will require the budget for professional organization including operational costs and staffing, web hosting and first cycle of spending on marketing. This adds up to about $3M for the first year. If 5 Tier 1 companies will bear this, the cost to each will be $600K annually plus additional resources.

Board Decision:
The Board ratified the above-recommended solutions and directed Dave Bernstein to proceed. The goal is to have the Membership Agreement and By-laws ready for approval by the next Board meeting.

SWT/Swing Interoperation

Dave Thomson presented SWT / Swing Interoperation discussion. This included discussion about whether promoting SWT is good for the consortium and relations with other companies with existing and vested interests in other technology.

There are two issues: 1) The relationship with other companies, and 2) the technical interoperation of the SWT and SWING frameworks. The Board directed that Eclipse must focus on efforts for interoperability. Solving the technical problem of interoperation is dependent upon changes to the source code of some virtual machines. This will require help from VM vendors. Member Company IBM is committing resources to work with the IBM VM teams, but cannot do anything to fix it for Jrocket or Sun VMs or others. Stewards need to tell their VM vendors that this interoperability is important.

There is no marketing agenda relating to SWT right now. Eclipse is focused on implementing and enabling SWT. Members of the board would like an article published on how SWT and Swing work together.

The market development team is very resource limited. There are already opportunities for articles that Eclipse is unable to fulfill.

There was discussion of proposing a JCP JSR for SWT. Yet, a JSR itself won't solve the problem. There must be technical cooperation between Sun and Eclipse to get the technologies to interoperate.

There was consensus of the Stewards that Eclipse should not promote SWT right now. The Board does not want to emphasis any potential conflicts that would prohibit Sun from joining the Board or would demonstrate perceived Java fragmentation.

Project Review Committee (PRC)

Michael Tiemann provided a RPC report.

At the Eclipse March 2003 Board Meeting the Stewards authorized the PRC Terms of Reference, which established the role and responsibilities of the PRC. Specifically, the Board delegated to the PRC the approval responsibility for the creation of new Open Source Projects. These new projects would operate under the authority of the PMC Charters.

The PRC presented a high-level Project Approval Process. The goal is to have a transparent and objective process. There would be a two phased process: 1) Project definition and circulation to PRC members. 2) The PRC would conduct a formal vote to approve. The Project Creation Criteria includes:

- vendor neutral
- validated by existing PMCs for (1) technical direction and (2) role of particular project
- reasonable expectation of quality leadership and sufficient participation
- not redundant (no competing effort at eclipse.org)
- hosted on eclipse.org
- consistent with current state of roadmap and architecture

There was significant discussion concerning the issues relating to the division between open source activity supported by Eclipse, and what is left for the commercial vendors to do. It was decided that the PRC would support an open process and selection criteria based upon the technological merits not business considerations. The PRC is not giving business advice.

The Stewards discussed the need for a roadmap and vision for Eclipse. The RPC articulated that an Eclipse Roadmap would include: an integration platform and a set of reusable components for implementing software life cycle tools and environments. A

growing suite of best of breed tools that validate and showcase the platform, including compilers, test tools, modeling tools, IDEs, application life-cycle tools, and application frameworks.

The PRC is incrementally developing a roadmap which focuses upon forward looking, evolving, technology areas that include: platform (kernel), language IDEs, GUI frameworks, modeling, design, performance analysis and test, common Frameworks and Java tools (J2SE, J2EE, J2ME)

The PRC articulated the following principles

- The PRC does not give business advice. The PRC makes technical decisions.
- The roadmap changes over time. For example community feedback, innovative project proposals, and new technology can and will influence the future direction of Eclipse.
- If a project meets the criteria and is consistent with the architecture and roadmap, the PRC should accept it.

The PRC addressed commoditization. There was concern about commoditization becoming a problem issue, because being selected as an Eclipse project can give the perception of legitimacy. The PRC acknowledged that Commoditization concerns some members.
Virtually any open source project can commoditize someone's existing product. These projects will occur in some open source environment. Hosting the project at eclipse.org provides an opportunity for Eclipse to influence project direction. Eclipse must not protect some product areas while commoditizing others. Protectionism will stifle growth of eclipse.org.
The conclusion of the Board is that commoditization is not a project rejection criteria.

The Stewards discussed and debated the following areas:

--- The technology PMC is for technology incubation, allowing duplication, innovation and later adoption to take place.

--- Given the market position and the resources available to member companies in particular areas, the opportunity exists to create integration frameworks and reference implementations. Commercial companies are taking these reference implementations and producing banded and supported commercial products and offerings. The open community could be more helpful with testing.

---- Many of the tools that we know today will become a commodity at some point in time.

--- Eclipse mission should be limited to the creation of a platform. Eclipse should NOT create open source tools or reference implementations.

---- With a detailed roadmap of what we want Eclipse to be and what function will be included as part of Eclipse, the Stewards could make more informed judgments. The Eclipse projects need to better define the technology, which is included and excluded as part of the open source project.

The Stewards identified the following issue:

> Eclipse needs a defined process for establishing a new project. This was assigned to the PRC with support from independent counsel, Michael Tiemann and Lee Nackman.

The PRC reported that it is in the process of setting up a PRC mailing list.

Web Tools Project

The PRC reported on the creation of a Web Tools project. This project met the project selection criteria including:

- –Vendor neutral
- –Validated (by existing PMCs) for
  - •Technical direction
  - •Role of particular project
- –Reasonable expectation of quality leadership and sufficient participation
- –Not redundant (no competing effort at eclipse.org)
- –Hosted on eclipse.org
- –Consistent with roadmap

The Web Tools Project Goals are:

- Web application oriented tooling platform and common set of tools that both validate and showcase the platform
- widespread active leadership and involvement
  - takes time and investment to build community
  - not a re-labeling of an existing code base
- Vendor Neutral
- Built on Standards
- Cool Tools for Web applications

The first steps of the Web Tools project are:

- talk to interested developers and their organizations to build a team
- establish technical block diagram/roadmap
- collect initial code contributions
- review code /create initial subprojects and components

This project resulted in extensive debate and discussions by the Stewards. The debate centered on the fact that this project represented a significant Eclipse Project. There was very little time to review. The PRC was just created. "Web Tools" is the first project; it is one of the most central and controversial of the Eclipse projects. The processes associated with the PRC had not been defined and not communicated prior to the Board meeting. There was general consensus that this project needed more clarification and

definition. Genuitec's Steward, Todd Williams, requested that the minutes reflect his opposition to this project and the manner in which it was created.

PMC Updates:

Eclipse Platform Project Management Committee Report

John Wiegand presented the summary of Eclipse Platform PMC operations in the past quarter.

The Platform PMC delivered Eclipse R2.1 on time with downloads available March 28, 2003. Their work continues with ongoing maintenance for Eclipse 2.x including a planned maintenance release R2.1.1 for June 2003.

Work is starting on Eclipse R3.0. John presented the roadmap for this work.

Eclipse 3.0 will contain significant new work, including consolidation, new function and an Eclipse R3.0 porting guide. The initial drafts of the Eclipse plan were posted December 20, 2002 on the website identified as "Eclipse R2.2". The same open process as used in R2.1 will be used as we continue to evolve the plan, including new contributions. Development is now underway.

The Eclipse R3.0 platform will include a new user experience theme, which improves interaction from the point of view of the end user. An additional theme will focus on making it easier to write Eclipse plug-ins that keep the User Interface responsive. We'll see additional rich client platform features in a theme that will help generalize Eclipse into a platform for building non-IDE applications.

In Eclipse R3.0, the Java Development Tools team will extend the Java family theme by generalizing JDT to handle more than just Java source files. An improved user experience will be developed for end users writing Java code. Early J2SE 1.5 features (this is not yet committed due to awaiting 1.5 finalization) are also planned.

Our team continues to help users to use Eclipse more effectively, and welcomes member company help: to enter defect reports; to develop plug-ins; answer newsgroup questions, work with component teams, help triage defects, participate in mailing list discussions, provide patches, write user documentation and more.

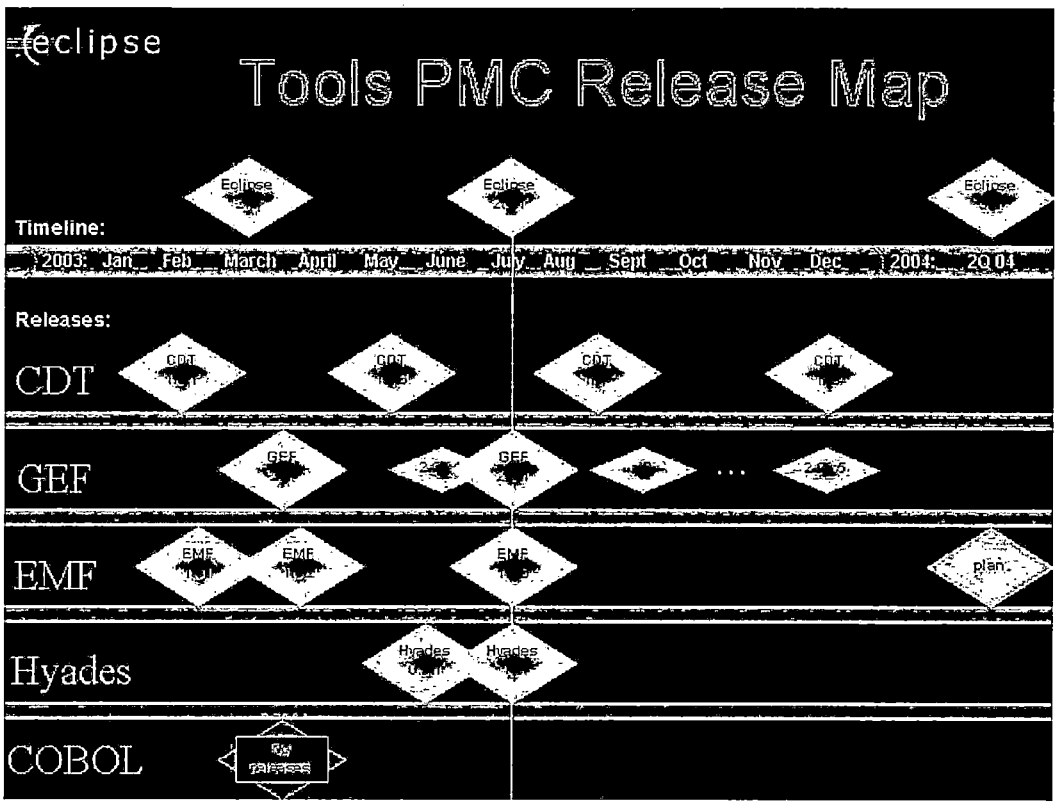

The platform team has planned an offsite session at JavaOne, and invites member companies to show Eclipse based technology at this event Wednesday, June 11, from 7PM to 10PM. There will be poster sessions where you can describe the technical characteristics of your project or plug-in. Send proposals to news@eclipse.org.

Eclipse Tools Project Management Committee Report

John Duimovich presented the Tools PMC report.

The C/C++ IDE, GEF, EMG and Hyades projects have been very active during the past quarter. COBOL has been inactive. Projects that address UML2, Bugzilla and collaboration technology areas are now proposed, and a Web Applications server tools project is forming.

The enclosed release map incorporates current plan information from the various tools sub-projects:

Sub-Projects:

C/C++ Development Tools

The C/C++ Development tools project has worked to deploy a better CDT than JDT including enhancements to the editor (basic functionality, syntax highlighting, code compilation), debugger (APIs and Default Implementations using GDB) and launcher (APIs and default implementation, launcher as an external application). CDT is working toward releasing R1.1.0 May 2003.

Current work addresses creation of the CDOM (an object model that is the "holy grail" for CDT, which drives all advanced features). The next milestone "M1" will include the next revision of CDOM, leveraging a new parser and delivering enhancements to search, replace and rename logic – all due August 2003. "M2" anticipates full CDOM support and the class browser in December 2003. Other improvements include a build model from TimeSys and remote debug.

The GEF team released 2.1 March 28th. A R2.2 draft plan was posted April 2nd, requesting submission of reasonable 2.2 requirements. Milestones are planned monthly through December. 2.1.1 is planned to coincide with Eclipse R2.1.1, and current activity primarily addresses JavaDoc. Over 20 IBM and Rational products currently use GEF.

Plans for R2.1.1 include" NLS national language frameworks available for certain languages; completely document the entire API in JavaDoc; Publication of articles on using GEF; Palette UI enhancements including support for truncation of large words using an ellipsis, vertically aligning text with large icons, and better sizing of drawers when 2 or more are open; Zoom enhancements to address rounding errors in change bounds requests like resize, move and align; Auto scroll enhancements that will allow more tools and drag trackers to take advantage of this feature and fixes for any remaining GTK problems, removing workarounds where possible.

Eclipse Modeling Framework

Release 1.0.2 was made available March 26th. A tutorial, "Generating a EMF model using XML Schema" was made available May 1st. EMF R1.1.0 will be released to coincide with Eclipse R2.1.1, with stable builds available weekly. Many IBM and Rational products use EMF. Sybase PowerDesigner 9.5.2, with GA in mid-April, also uses EMF as does Omondo.

R2.2.0 is planned to include: Eclipse 2.1 support, migration from R1.02, new XSD to Ecore mappings, new features including faster and more compact execution, significant bugs fixed, internationalized support (UTF-8 fixes) and backward compatibility. We recommend that you regenerate models, but it's not a fixed requirement.

The project is addressing some current issues. The code is still not in the Eclipse CVS yet. Source is included as downloads, and development is being done on a separate site with shadowing of source in external repositories. There are currently only IBM committers.

Hyades

Hyades R1.0 is to be released alongside Eclipse R2.1.1. Translation will be provided as a separate download, with internationalization to follow. Commercial products will start to appear in late summer.

Current participation includes: IBM Rational/ADT/Research/Tivoli; Scapa Technologies; SAP; FOKUS and SilverMark.

Hyades R1.0 features:

EMF model implementations, U2TP test, Java Specific traces, test execution histories and the statistical model. Eclipse glue is implemented to plug-in Uis. This includes communications glue to remote systems and simple model viewers and editors. Samples of Java profiler, Junit test execution and HTTP test execution are also included.

The 1.0 release is early code, and some components are still very specific; for example to Java or to certain test execution logic. Most of the pieces need fleshing out, and compliance points have not yet been clarified. "It's a bit raw", but the team went from R0.0.1 to R1.0.0 in 6 weeks, a very aggressive schedule. Watch for more improvements and further progress.

COBOL

The COBOL project is inactive. There is no public activity, no communications of progress or plans. The PMC will have to actively manage the team to energize the current team and recruit a new team or cancel the project.

New Projects include:

UML2

A project for EMG generated API (interfaces) for UML (Unified Modeling Language) 2.0. This creates a general schema for UML2 model interchange, custom tools which are used to generate the interface (as EMF templates), a simple editor to create UML2 models and other related tools.

BugZilla

This project will work to integrate Bugzilla tooling into the Eclipse IDE. It extends the current code base with a search pane, viewer and "Bugzilla favorites", where interesting bugs can be saved for future reference. In the future, bug editing will occur within Eclipse, entering bugs from within Eclipse and Bugzilla bugs as tasks in a task list.

Collaboration

This project will work to integrate developer level "collaboration" into the Eclipse IDE, including instant messaging, screen sharing and improved distance extreme programming (XP) features.

Server Tooling

The server tooling project will work to support J2EE application server tooling in an application server neutral framework for creating, deploying and running applications. There will be plug-in "server personalities", one of which will be an open-source Tomcat support plug-in. Lite versions of plug-ins for commercial vendor products will also be included.

This project is in an early stage, and overlaps with some member company current products. We assume technical coordination, since many players have code already. The intent is to move this project to the Web Tools PMC.

Eclipse Technology Project Management Committee

Dr. Brian M. Barry presented the Technology PMC report.

There are several on-going projects, including: AJDT; AspectJ; Stellation; XSD; Koi (Collaboration Tools); Equinox

New projects have recently been approved, including: GMT (Generative Model Transformer); Smalltalk

New projects are now under review, including: education tools and content; Eclipse Technology Network which is currently under discussion: AOSD tools; and an Business Application Platform.

Technology Projects are typically less formally organized than Tools or Platform projects, and our summaries reflect this lack of formality. Resources may not be fully committed, development approaches vary and not all projects post formal plans. Those that do vary in level of detail, and milestones are fluid (or non-existent). Our management approach is to encourage and support rather than prescribe. All of these projects are innovative and enrich the Eclipse eco-system.

Technology Sub-Projects

AspectJ

AspectJ is a seamless extension to the Java programming language which supports aspect oriented programming (AOP). This project formerly existed as aspectj.org.

The project is now finalizing the AspectJ 1.1 release. The AspectJ team was very visible at AOSD 2003 in Boston. Work is actively continuing, mainly bug fixes. Good synergy and interaction with AJDT project.

There is no posted plan, and plan discussions take place on their mailing list.

Releases are scheduled: AspectJ 1.1 RC2 May 13 and AspectJ 1.1 RC1 Mar 15.

Participants include: IBM; ISC; PARC; with project leads: Jim Huginin (PARC) and Gregor Kiczales (ISC).

Here is an overview for your background on Aspect-Oriented Programming. Aspects are separable concerns or functional threads. AOP allows aspects to be factored out and treated as modules (analogous to OOP). It provides a complementary reuse mechanism which is orthogonal to Objects. Typical examples include code for logging and error handling. Leading research groups like AspectJ (PARC), HyperJ (IBM Research), Filters (U. Twente), and DemeterJ (Northeastern) are active in aspect oriented programming. Most research groups now use Eclipse as an R&D platform.

AJDT

The AspectJ development tools project works to provide an IDE for AspectJ which delivers a user experience on a par with the JDT, by developing an integration layer between the AspectJ Development Environment Framework and Eclipse/JDT extension points.

Work proceeds in parallel with AspectJ project. Some work is on bug fixes but much of the work focuses on enabling new features in AspectJ release. There is a lot of synergy and interaction with the AspectJ project.

A new plan has recently been posted, with active plan discussions taking place on the mailing list. The release schedule includes: AJDT 1.1.2 May 14; AJDT 1.1.1 Mar 14. Project team participants include: IBM; ISC; PARC; with project lead: Adrian Colyer (IBM).

Koi

The Koi project works to enable dynamic, fine-grained collaborative activities among multiple Eclipse users. The Koi infrastructure is built around a client/server architecture using a Web Services RPC model.

Several problems have been identified and fixed: for example, in the area of distributed exception handling. The current project focus is on providing support for permission handling. Future plans call for automatic generation of boilerplate code for RPC. There has been discussion of emulating the Koi server with CVS (or other SCM) and on security but no real work on either of these topics.

The KOI high level plan has been posted. Updates are posted to CVS, with the first release "in the works". Participants include: Instantiations with project lead Tim O'Connor (Instantiations) who recently replaced Allen Wirfs-Brock.

Stellation

This project works to implement tools for a software configuration management system designed as an extensible platform for research on tools and systems that exploit fine-grained management of artifacts.

Activity this quarter has been focused on: a port to Windows, based on Firebird RDB; adding support for task-based CM; self-hosting. Longer term features under development include ACLs, fine-grained artifact support, Eclipse support (Stellation as an alternative to CVS).

The project plan is posted with release on Jan 17, 2003. Participants include: IBM Research; EMC; CRYPTOCard; EDS; UBC; with project lead Mark Chu-Carroll (IBM).

XSD

The XML Scheme Infoset Model is a library providing an API for manipulating (examining, creating or modifying) XML Schemas.

Work focused on Release 1.1, which provides bug fixes and improvements, as well as new plugins for XSD to Ecore conversion. Additional documentation is being prepared.

There is not yet a posted plan, with XSD 1.1.0 Stable Builds available May 1, 13, 19

Participants include: IBM with project leads, Ed Mercks (IBM).

Equinox

This project is working to investigate the use of Eclipse as a runtime platform for application delivery (eg, handheld devices, desktop applications). In this context, it will explore requirements and prototype possible solutions.

Work activity this quarter focused on support for dynamic plug-ins, and exploring alternative runtime models. Adding a services model, security, and tools have been identified as future work items.

The project plan is posted, with no releases available yet. Participants include: IBM Ottawa Labs; IBM Research; IBM Lotus; aQute. The project lead is Jeff McAffer (IBM).

Smalltalk

This project will provide an IDE for the Smalltalk programming language and environment, based on Eclipse. The intention is to support multiple Virtual Machines and Class Libraries.

Internal development work is continuing on an initial Beta release, pending formal approvals which are required to release code under the CPL.

There is no posted plan and have not yet been releases. Participants include IBM, with project leads John O'Keefe (IBM) and John Duimovich (IBM).

GMT (New)

This project works to construct and assemble a set of tools for model driven software development. In parallel, to encourage research in this area.

This genesis of this project was a workshop at OOPSLA 2002. The project was approved and the GMT web site was launched May 20. Technical work is just starting.

A plan has been posted, with no releases yet. Participants include: SoftMetaware (NZ); Bronstee.com (Neth); Thales Research (UK); Vanderbilt Univ; U Alabama; U Nantes, with Project Leads Jorn Bettin (SoftMetaware); Ghica van Emde Boas (Bronstee.com);

Projects currently under Discussion

Education Project

This project works to develop Eclipse plug-ins to support SCORM and GLSS standards for e-Learning and to develop modular training materials for Eclipse and Java. We're working to understand if we can we combine these and get some synergy and find additional participants are needed.

Eclipse Technology Network

This is an IBM proposal led by the Center for Advanced Studies (CAS). The vision is to create a project to manage and encourage interactions with the research/academic community including: conference events, speakers, grants and workshops. It is open to all Eclipse members.

Technology PMC Issue List
We're now working on merging AspectJ and AJDT projects, with Jim Hugenin stepping down after Rel 1.1. Work tends to be very integrated. We've had discussions with the development team at AOSD 2003 and plan to follow up in June during a visit to IBM Hursley. Several projects have not been successful in diversifying their participation.

What does Eclipse offer Researchers?

Eclipse offers several advantages to researchers. This includes an extensible platform for integrating components, open source with a generous non-viral license, running on most OS/GUI combinations and allows real "write once run anywhere" Java. There are already commercial quality IDEs and components based upon Eclipse. Eclipse helps improve project visibility due to broad based industry support. Serendipitously Eclipse has exactly what researchers and academics want and need to save time and effort through reuse and focused skills acquisition.

This idea is not obvious, and needs to be promoted within the academic community through programs like: Eclipse Fellowships, Eclipse Innovation Grants (new program) and Events at Research Conferences.

Time spent at the University is a quality time in the "developer life cycle". Normally developers may have to devote days or weeks to learning new technology (and employers begrudge even that). But as students they are prepared to devote months or years to an effort. Eclipse members benefit if students learn and prefer Eclipse. This student learning translates downstream to make developer skills easier to find, and creates a large base of users who prefer Eclipse technology.

Selection of Eclipse products can become the path of least resistance for Customers. Eclipse offers a lot, but it requires significant intellectual investment. In order to capture the focus of students, capture that of their Professors! Professors follow top researchers and educators, who are the thought leaders in academia. Students and Professors like exciting technology

Eclipse should aggressively court the research community.

Standing Committee Reports

Eclipse Finance Committee

Ian Smith presented the Finance Committee Report

The finance committee has worked to address issues relating to collection and dispersal of funds. Right now, Eclipse is an informal consortium and there is no mechanism to

collect or disperse funds. We don't have the ability to enter into contractual or service agreements and thus cannot employ professional help to resolve consortium needs. There is currently no budget.

The Board decided and authorized the Finance committee to work in partnership with OMG to utilize the corporate structure and facilities of OMG to collect, manage and disperse funds on behalf of Eclipse until Eclipse is established as a legal entity.
The basis for this decision includes consideration that:

- The arrangement ceases once the Eclipse Independent Legal Entity is operational
- There is no charge from OMG
- OMG will process Eclipse transactions through a separate account
- All funds dispersed by OMG on behalf of Eclipse will require 2 signatures, the relevant Eclipse committee chair and Skip McGaughey
- All transactions under this arrangement will be accounted for by OMG to allow quick and precise financial statements to be produced

Cash requirements include:

- Establishment of independent counsel (to do legal entity work)
- Employ necessary consultants and organizations to assist Independent Entity Creation
- Establishment of independent accountants (to complete forecasts/budgets)
- Ongoing PR expenditure ($10k per month)

The Board authorized the Finance Committee to obligate and make expenditures to: employ an independent counsel; employ independent entity start up consultants and advisors; employ independent accountants ; continue to employ the existing public relations company as appropriate.

This expenditure is subject to the following processes and limitations:

- These obligations will not exceed the availability of projected cash funds
- All obligations capped at $100,000
- All disbursements will require the signature of Skip McGaughey and the Chair of the relevant sub-committee listed below:
- These obligations will be based upon the recommendation of the chairs of each sub committee
    - Expenditure on the independent legal council – Mike Rank
    - Expenditures for Independent Entity start up consultants and advisors. – Dave Bernstein
    - Expenditure on independent accountants – Ian Smith
    - Expenditure on public relations – Mike Taylor

Eclipse Legal Committee

Mike Rank presented the report of the Legal Advisory Committee:

The Legal committee includes members: HP: Michael Rank (Chair, 2003); IBM: Tom Callan; OMG: Jamie Nemiah; SAP: Michael Bechauf .

Work within the committee has lead to the following accomplishments during the past quarter:

- CPL Section 1, Definition of Contribution

Rational proposed new language to clarify that Eclipse add-ins are not considered Contributions ("derivative works issue"). This has been resolved via CPL FAQ on website (T. Callan).

- Independent legal counsel for Eclipse.org

Eclipse needs the ability to provide company-independent advice on legal issues affecting Eclipse. This will be resolved by a board steward resolution proposed below.

- Eclipse trademark protection

Eclipse needs to obtain trademark search and legal advice securing protection for Eclipse name and logo. This is an element of the entity formation project, including work on Eclipse logo usage and agreement terms.

- Reciprocal Publicity Rights

The current membership agreement does not provide for reciprocal Member publicity rights with respect to Eclipse-based offerings. This is also an element of entity formation project.

Current Issues before the Committee

- CPL license update

New members and end-customers have recommended changes to CPL Section 7. Changes are in progress with CPL license steward (IBM) to create an EPL (Eclipse Public License) that will contain substantive changes to Section 7 of the CPL. These changes will require re-submitting Eclipse contributions under the new license. License creation, license language and license stewardship will be submitted for approval as an e-vote to board stewards in the next 30-60 days.

- Outside Counsel for Eclipse

The legal subcommittee has submitted and interviewed five prominent, full-service legal firms to support key Eclipse.org objectives: General Counsel expertise; Proven track-record launching high-tech consortia; IP (patents, trademarks, copyrights etc); Antitrust law expertise; open source transactional information exchange, including administrative issues (for example, storage of formal papers; establishing the guidelines and documentation around operational procedures and establishing Q&A on licensing issues). Two firms (Brown Raysman, Baker Hockstetler) are undergoing final review and reference checks. The committee expects to recommend a firm to Board in the next 14-21 days.

The Eclipse Board approved and authorized Mike Rank to engage outside legal counsel that will be authorized to represent, advise and act on legal matters for Eclipse.org and the Board Stewards.
The legal subcommittee unanimously recommended and the Eclipse Board approved the following recommendation:

- Authorize the legal and entity formation subcommittee chairpersons to jointly sign an engagement letter on behalf of the Board Stewards with a reputable, full service legal firm establishing them as Eclipse outside counsel. An engagement letter will only be signed after due diligence has been completed by and a majority recommendation formulated by the Eclipse legal subcommittee.
- Authorize the legal and finance subcommittee chairpersons to disburse funds to pay for reasonable and customary outside counsel legal services incurred by the selected outside counsel for both entity formation services and routine legal transactional services
- Authorize the legal and entity formation subcommittee chairpersons at their option to engage a consulting firm specializing in entity formation if recommended by the outside counsel.
- Authorize the legal and entity formation subcommittee chairpersons to prepare articles of incorporation and other documentation as needed to establish Eclipse.org as a non-profit Delaware corporation through the outside counsel. Materials will NOT be executed until the Board Stewards have voted to establish a legal entity.

Marketing Committee

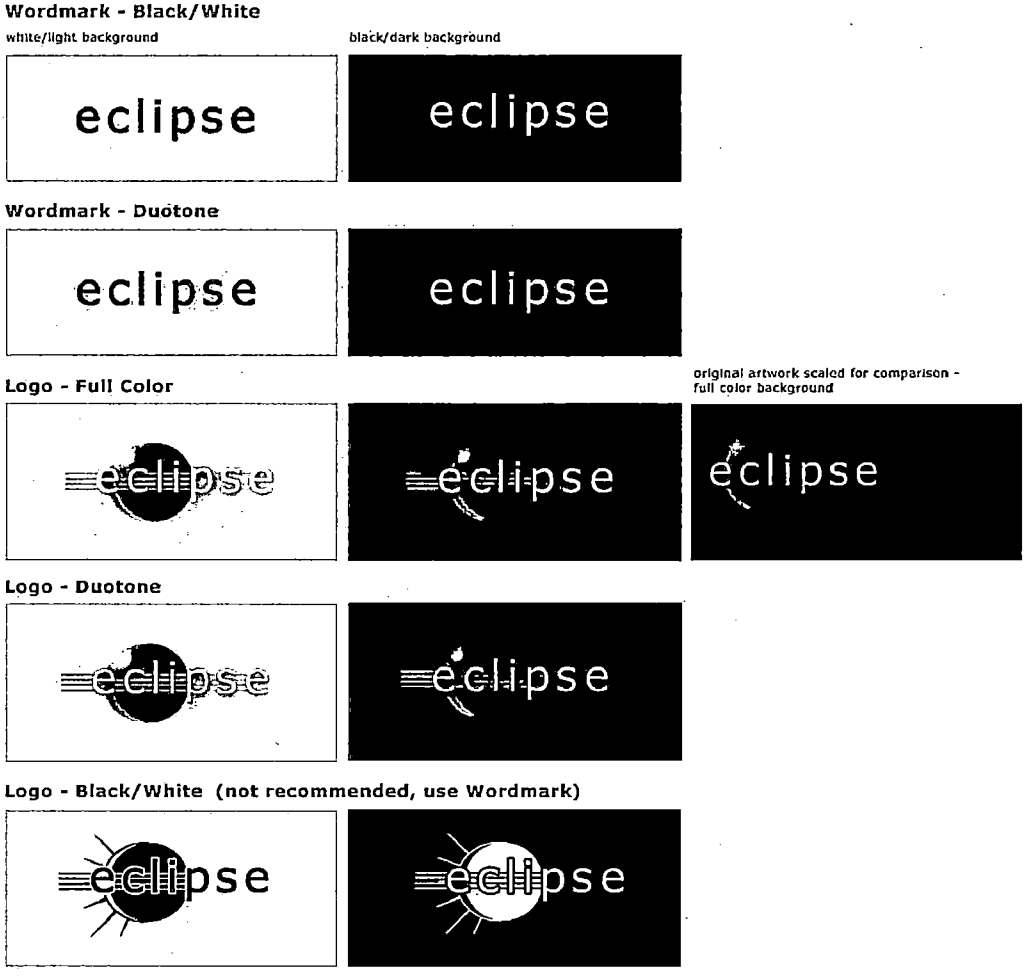

Mike Taylor presented the Marketing Committee report.

The Marketing Committee pursues the mission of driving the commercial and open source success of Eclipse by developing and implementing strategies and programs that establish and communicate the value of the Eclipse Platform for the developer and consumer communities. The purpose of the Marketing Committee is to engage in the marketing activities of the Eclipse consortium and to support the Eclipse-related marketing activities of the member organizations; specifically, helping the member companies to publicly endorse and promote the Eclipse Platform and acknowledge its use in their products.

The committee was formed 12/2002 with active participation from: Catalyst; Flashline; Hewlett Packard; IBM; Instantiations and MKS. ; We also host the public relations subcommittee (lead by Mark Johnson Instantiations), The Events Subcommittee (Steve Tallent, HP); and the Website Subcommittee (Patrick Egan, Catalyst). Our operations meetings take place weekly.

Eclipse Artwork Revision

The Eclipse Board decided to accept the following recommendations of the Marketing Committee and the PMCs to consolidate our artwork and make it consistent.

The Events Subcommittee presented details of activities for JavaOne. This included a "passport" style program, which gave away T-Shirts to attendees that visited each participating company and obtained a "stamp". The shirts were distributed at participating booths. Participating companies included: Catalyst; IBM; Hitachi; HP; SAP; and SlickEdit.

The committee coordinated Eclipse Signage for member companies and also participated in the Eclipse BOF.

The WebSite subcommittee has entered into an agreement with PMC on website structure and responsibility allowing direct editing of Eclipse Consortium website to begin.

The critical issue of funding for public relations work was discussed. Funding for Public Relations programs runs out June 15. No action was taken by the Eclipse Board.

Next Board Meeting

The next Board Meeting will be September 03, 2003 in Chicago.

Exhibit Laks-3

Abridged Minutes of the Board Meeting of the Eclipse Foundation, Inc.
June 25, 2003

Attendees

Michael Bechauf (SAP)
Dan Dodge (QNX)
Bjorn Freeman-Benson (Committer representative)
Boris Kapitanski (Serena)
Jonathan Khazam (Intel)
Rich Main (Add-In Provider representative)
Dave Thomson (IBM)
John Wiegand (Committer representative)
Todd E. Williams (Add-In Provider representative)
Mike Milinkovich (Executive Director)

Not in attendance

Ronald Ingman (Ericsson)
Michael J. Rank (HP)
Jim Ready (MontaVista)

Add-In provider questions/issues:

Rich Main and Todd Williams solicited their constituents for questions and concerns regarding the status and operations of Eclipse. Three main issues were discussed:

- There is a concern that we need to have more ecosystem content on the website.

  The Board discussed this issue at some length. It was agreed that historically the website has been focused on acting as the focal point for the Eclipse open source project. Additional resources need to be allocated to provide content for the ecosystem, while carefully maintaining the development focus and non-commercial nature of the open source community pages. To accomplish this, the EMO will be focusing on the following objectives:
  - Need to provide some immediate content for the ecosystem on the existing website. However, in the short term, this will be still be quite minimal.
  - Eclipse requires its own web infrastructure, and a project to migrate it from its current IBM home will commence ASAP.
  - In the future, the eclipse.org website will support two distinct zones: one for the open source community and one for the ecosystem.

- Need to have more communication to the ecosystem
  - Quarterly conference calls – Rich and Todd to work with Skip McGaughey to schedule and set agenda. These calls are to be scheduled within 30 days after the Board meetings.
  - A summary of the Board meeting will be posted in advance of the meeting, so that Add-in Providers will have an opportunity to review and comment.

- People would like to have access to the list of contributors to the ecosystem.
  - Subject to privacy laws and any liability disclaimers, we will make this data available in the future

John Wiegand and Bjorn Freeman-Benson will poll the Committer community for questions and issues for future meetings.

Board Items:

- A number of resolutions were reviewed and approved by the Board. These resolutions included:
  - Approval of the minutes of the previous Board meeting held on April 15 and 16.
  - Establishment of regular Board meetings on the third Wednesday of the last month of each calendar quarter, except for meetings in December which will be held on the second Wednesday of the month.
  - Establishing the Finance Committee has called for in the Bylaws. The Finance Committee will be chaired by Jonathan Khazam of Intel. Dave Thomson of IBM will also sit on the Finance Committee.
  - Establishing an ad hoc committee of the Board to focus on the migration of Eclipse's licensing from the Common Public License (CPL) to the Eclipse Public License (EPL). This committee will be chaired by Rich Main of SAS Institute. John Wiegand, elected Committer representative will also support
  - Establishing the official office of record to be the offices of our attorneys in New York.
  - Appointing Mike Milinkovich to the office of Secretary of the Corporation.
  - Authorizing the Executive Director to take action to:
    - Acquire insurance for the Corporation; and
    - Migrate Eclipse's IT and website systems from their current IBM-supported infrastructure to an Eclipse controlled site
    - Open bank accounts on behalf of the Corporation
  - Approve the charter for the Web Tools Project
  - Accepting the resignation of Skip McGaughey as the Secretary of the Corporation.
  - Establish spending authorization limits for the Executive Director and for managers working for the Corporation.
- In order to foster better communication with the Eclipse community, a summary of the Board meetings will be reviewed and approved by the Board by electronic means within 30 days of this and all future Board meetings.

Eclipse Foundation Administration:

- Budget overview

  The Board reviewed and approved the 2004 budget as provided by the EMO.

  The 2004 budget is based on expectations of $1.6M in membership revenue, and approximately $1.2M in expenses. The surplus will be carried forward to assist in funding operations in 2005.

  Not all of the Members have been invoiced for their membership dues. This will be a high priority for July and August.

  The Marketing budget as prepared by the Eclipse Marketing Committee was reviewed and approved with modifications. The Marketing Committee had requested funding of approximately $250,000. Eclipse will budget $100,000 in 2004, and is currently forecasting expenditures of $225,000 in 2005.

- Staffing plans

  The Board reviewed and approved the 2004 staffing plans as provided by the EMO. Priorities include IT infrastructure, web content development and marketing.

- IT infrastructure migration

  The Board discussed the requirement to migrate the current web site infrastructure from its current IBM hosting facility. The key points discussed included:
  - the current bandwidth is insufficient and needs to be expanded
  - the current bandwidth costs at the Ottawa facility appear to be significantly more expensive than other providers
  - a realistic timetable for this migration is to complete the plan over the next calendar quarter and to complete the migration next quarter

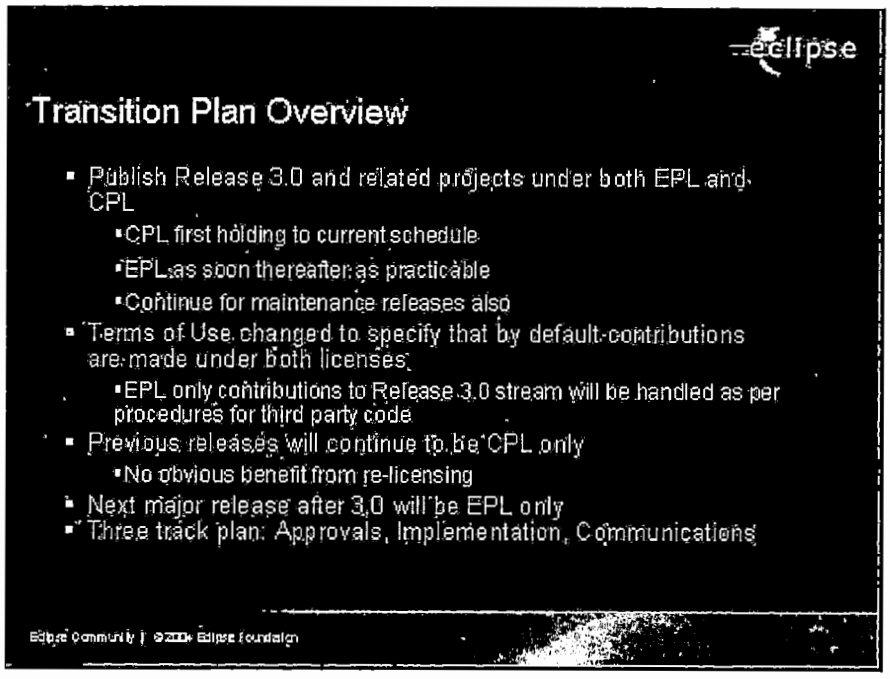

- CPL to EPL license migration plans

  As per the Bylaws, the Foundation is to move from using the Common Public License (CPL) to the Eclipse Public License (EPL). This transition will require planning to ensure that it is executed smoothly and with minimal interruption to both the open source projects and the ecosystem.

  The Board discussed the steps required to migrate the open source project from its current use of the Common Public License to the Eclipse Public License.

  - It was noted that the approval of the EPL by the Open Source Initiative (OSI) has been completed and is now visible on their website.
  - The proposed plan was approved, and the Executive Director is authorized to execute the plan. The plan essentially calls for a re-submission of the existing intellectual property, and a dual licensing of releases under both the CPL and EPL for a well communicated transition period.
  - The Board has constituted an ad hoc committee of the Board to approve any changes to the plan, and to provide a communications vehicle for key stakeholders supporting the transition project.
  - It was agreed that a communication plan for the migration would be key to its success. We need to ensure that there is no confusion in the community or the broader marketplace regarding what is happening, why and when.

  Note that the plan continues to evolve and that what was presented at the Board meeting is subject to change.

eclipse
Transition Plan Overview
Publish Release 3.0 and related projects under both EPL and CPL
CPL first holding to current schedule
EPL as soon thereafter as practicable
Continue for maintenance releases also
Terms of Use changed to specify that by default contributions are made under both licenses
EPL only contributions to Release 3.0 stream will be handled as per procedures for third party code
Previous releases will continue to be CPL only
No obvious benefit from re-licensing
Next major release after 3.0 will be EPL only
Three track plan: Approvals, Implementation, Communications
Eclipse Community | ©2004 Eclipse Foundation

eclipse
Approval Track
Issue Draft Plan (June 2)
Obtain Board Approval
Circulate for comment by Platform, PDE, JDTY, CDT leads
Approval by leads
Circulate to other development leads
Incorporate feedback
Publish Final Plan on Eclipse web site
Eclipse Community | ©2004 Eclipse Foundation

- Legal Advisory Working Group

  It was decided by the Board to establish a working group of interested board members and their legal advisors whereby issues relevant to the Foundation and its board

members can be discussed. This group will be chaired by the Executive Director. It will be implemented as a closed mailing list where specific topics can be discussed amongst the interested board members.

- EclipseCon update

  It was agreed that the EMO should immediately begin organizing EclipseCon 2005. The current goals are to hold this event in the month of March in the Bay Area, California. The Board and the EMO anticipate a significant growth in attendance over last year.

- Executive Director MBOs

  The MBOs for the Executive Director were discussed and approved for Q3 2004. The main focus areas were agreed to be:
  - Grow the membership base, including expanding the number of strategic members of the Board.
  - Improve the marketing effectiveness of the EMO.
  - Implement the new development process. Specifically, create the Requirements, Planning and Architecture Councils and organize their initial meetings.
  - Plan for migrating the Eclipse website from the current IBM infrastructure to one which is managed directly by Eclipse.
  - Establish the Eclipse administrative systems such as banking, invoicing, payroll, etc.
  - Plan for migrating the Eclipse community from the Common Public License to the Eclipse Public License.

Eclipse Ecosystem Update:

- Membership review

  The Board was pleased to welcome three new members to the Foundation: Acucorp, Aonix and Kinzan have all now joined Eclipse as Add-In providers.

  The Board also reviewed a presentation submitted by Actuate (www.actuate.com) who has indicated a desire to join Eclipse as a Strategic Developer. Actuate's area of technical expertise is in enterprise reporting. They will be proposing a new project at Eclipse in the coming months.

- Review of Eclipse 3.0 launch activities

  The Board reviewed the marketing activities surrounding the Eclipse 3.0 announce. It was generally agreed that the PR activities at Eclipse were executing successfully.

Eclipse V 3.0 Announcement Major Themes

- Improved developer productivity and user experience in the V3 Java IDE
- Support for Rich Client Platform
  - SWING / SWT Integration
- Continue to deliver tools and other projects
  - C/C++ development tools improvements
  - Hyades integration framework and extensible tools for application verification and optimization
- Support for multiple platforms including
  - Mac OS X
  - Photon
  - Linux (GTK,MOTIF)
  - Windows
  - AIX
  - HP/UX
  - Solaris
- 12 Supporting Member Quotes
- News Release June 21, 2004
- GA on or before June 30, 2004

5

3.0 Outreach Program

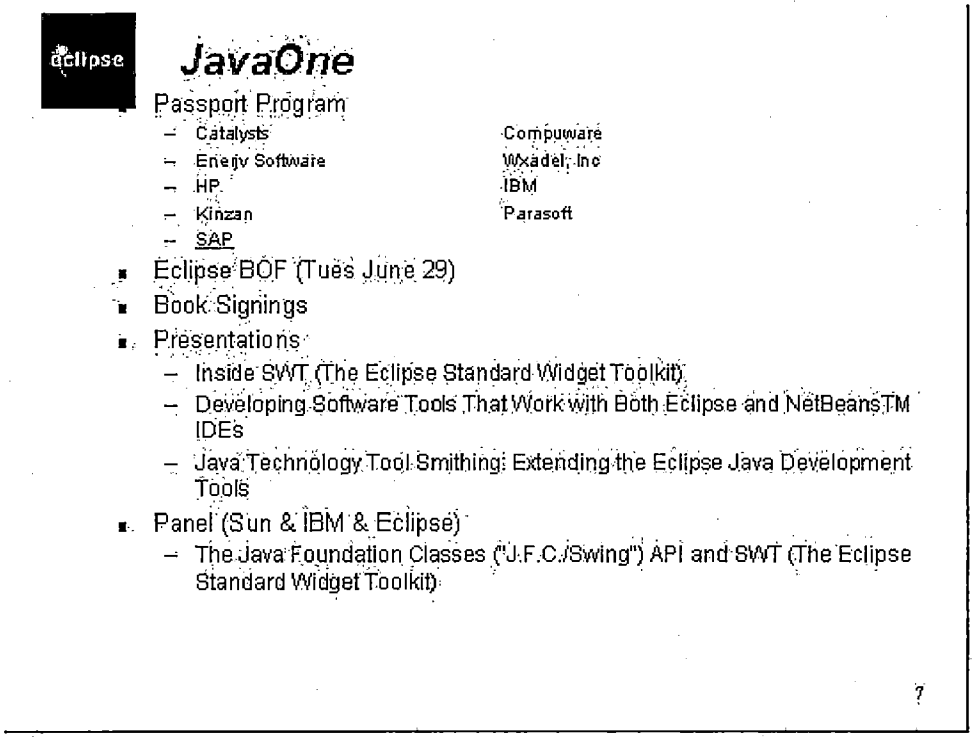

- **Analysts**
  - Amy Wohl's Opinion, Amy Wohl
  - Burton Group, Anne Thomas Manes
  - D H Brown, Pierre Fricke
  - Gartner Group, Mark Driver and Michael Blechar
  - Forrester, John Rymer and Mike Gilpin
  - Meta Group, Tom Murphy
  - Ovum, Bola Rotibi
  - RedMonk, James Governor
- **Publications and News Services**
  - Target Press Segments
    - IT, Software Development, Middleware, Java, Linux, Embedded and Technical
  - Actual publications:

Application Development Trends	InfoWorld
CNET News	Internet News
ComputerWorld	iSeries
Dr. Dobb's Journal	JavaPro
Electronic Design	SD Times
eWeek	WebSphere Advisor

6

- JavaOne marketing activities

  The Board reviewed the marketing activities proposed for the upcoming JavaOne conference in San Francisco.

In addition to the presentations listed above, there were two additional events of note:

- At JavaOne, there will be a presentation entitled "What's New with Eclipse"
- There will also be a presentation by John Weigand and Erich Gamma at Apple's Worldwide Developers Conference the same week as JavaOne.

- The Board reviewed the current schedule for press and marketing activities.

Eclipse Project Update:

- The Board reviewed the status of the Eclipse 3.0 release, including Platform and CDT project updates
- The Board reviewed the WebTools project overview and charter. Based upon input from the EMO, and from Bjorn Freeman-Benson and John Wiegand, the charter for the WebTools Platform Project was approved unanimously by the Board.
- Due to time constraints, the Board agreed to a continuance of its meeting to review and approve the Test and Performance Project (formerly Hyades) at a later date.
- The Board reviewed and approved the plans for the creation of the Requirements, Architecture and Planning Councils, as detailed below.
    - Michael Bechauf of SAP will chair the Requirements Council
    - Mike Milinkovich will chair the Planning and Architecture Councils.

Timeline

- July
    - Nominations for positions
    - Formation by EMO
    - Scheduling of initial meeting
- August
    - Initial meetings take place
    - Process to drive to Roadmap defined
- Q4
    - Roadmap v1.0

Not expected to influence Eclipse 3.1

Exhibit Laks-4

Abridged Minutes of the Board Meeting of the Eclipse Foundation, Inc.
September 15, 2004

Attendees

Mark Cogins (Actuate)
Dan Dodge (QNX)
Bjorn Freeman-Benson (Committer representative)
Ronald Ingman (Ericsson)
Rich Main (Add-In Provider representative)
Michael J. Rank (HP)
Tyler Thessin representing Jonathan Khazam (Intel)
Dave Thomson (IBM)
John Wiegand (Committer representative)
Todd E. Williams (Add-In Provider representative)
Mike Milinkovich (Executive Director)

Not in attendance

Michael Bechauf (SAP)
Boris Kapitanski (Serena)
Jim Ready (MontaVista)

Location: American Airlines Admiral Club at O'Hare Airport.

Board Items:

A number of resolutions were reviewed and approved by the Board. These resolutions included:

- Michael Bechauf will be taking over from Bjorn Freeman-Benson as Chairman of the Compensation Committee.
- The Board will hold a meeting via teleconference Thursday, September 30, 2004 in order to review and approve the Business Intelligence and Reporting (BIRT) top-level project charter and the Executive Director MBOs
- The next two face-to-face Board meetings will be held on Wednesday, December 8, 2004 and Monday, February 28, 2005
- Authorizing the Executive Director to take action on selecting the event management company and other organizational items related to EclipseCon 2005.

Committer Community Issues and Update

Bjorn Freeman-Benson and John Wiegand raised a number of issues of interest to the Committer community at Eclipse.

- There are numerous requests for enhancements to the eclipse.org web-site. Some examples include: project statistics, event repository for project-specific "What's new" items, trouble ticket tracking for infra requests, and more.
- More visibility into the workings, plans and directions of the Eclipse Foundation.

- More and better documentation on the processes in effect at Eclipse. Some examples: process for proposing a new project, process for becoming a committer, checklist for including third-party software, and more.
- Need for making the development process operational. E.g. doing a better job of shepherding new projects, establishing and running the Councils and more.

The Board discussed these issues at length. It was generally agreed that more emphasis needed to be placed on addressing the needs of the committer community at Eclipse. It was clearly recognized that without the continuing efforts of our committers, Eclipse would not be successful. In the short term, the Eclipse Foundation will be focusing on the following key efforts:

- Taking over responsibility and management for the Eclipse.org website. Our infrastructure is currently hosted and managed by IBM. Migrating to an EMO-managed location is a prerequisite to making any major investments (both software and hardware) to improve the site. In the interim, the currently dedicated IBM staff will make whatever incremental improvements which can reasonably done.
- Documenting the Eclipse processes and providing clear documentation for our development and intellectual property guidelines and processes.
- EclipseCon is the premier gathering of our community. In addition to ensuring that this event is well-planned and well-attended, it is important to ensure that the contributions of the committer community to Eclipse is well recognized during this event.

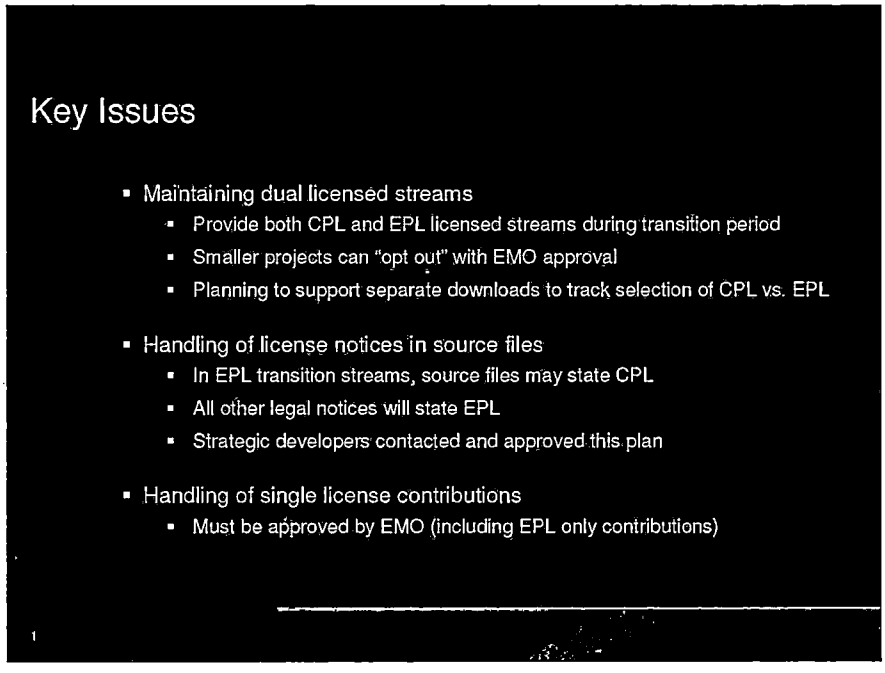

Web Tools Project Creation Update

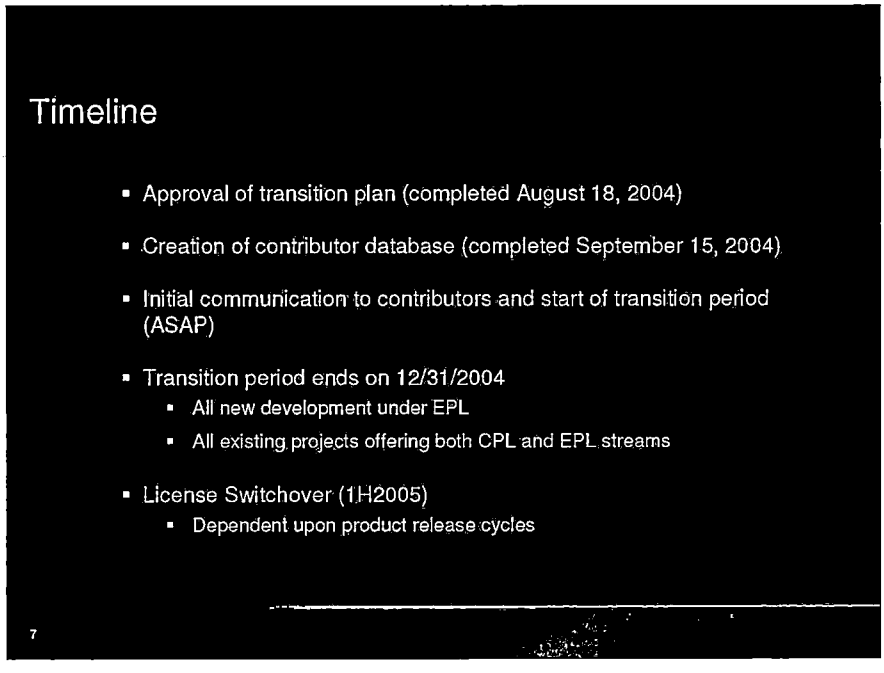

Bjorn-Freeman Benson (who is both a Board Member and the PMC lead of the WTP project) gave an update to the Board on the status of the project. The project faced a number of challenges gaining momentum over the summer months. However, it has received code contributions from both IBM and Eteration (Lomboz) and there is now an established build system and a working build.

CPL to EPL Conversion Status

Rich Main provided an update to the Board on the status of the CPL to EPL conversion project.

In Q3 the conversion plan was finalized and execution has begun. The goal is to have the projects converted to the new license by the end of the first half of 2005.

EclipseCon 2005 Update

Mike Milinkovich provided the Board a status update on EclipseCon 2005. The key points are captured in the slide below:

Key Activities in Q3

- Selected and committed to venue and dates
  - February 28 to March 3
  - Hyatt Regency, Burlingame, CA
- Solicited proposals from four show producers
  - OMG
  - Richmond Events
  - Evolutionary Events
  - Meeting Strategies
- Began establishing conference committees
  - Organizing (starting), Communications (in process), Program (done)
  - Issued Call for Participation
- What can your company do to help?
  - We need volunteer resources to run this event
  - We need exhibitors
  - We need special event sponsors
  - We need speakers!!! (Keynote anyone?)
  - Use the hotel

Eclipse.org Web Site Migration

Mike Milinkovich provided the Board a status update on migrating the www.eclipse.org website. The key points are captured in the slides below:

Background

- www.eclipse.org is the focal point for both our open source and ecosystem communities
- By most tangible measures it is hugely successful
  - Supports massive software projects
  - Supports massive download capabilities
  - Good reliability
- By many intangible measures, it needs work
  - "Tired" look and feel
  - Limited navigation --- "hard to find stuff"
  - Few value-added services for the community
  - No high availability in architecture, old software versions
- Very expensive to run in its current form
  - USD 25K/month in bandwidth

Recommendation

- Use co-hosting facility with proven track record, many references, professional staff
- Flexible contract to allow for cost reduction
- Selected vendor: Magma (www.magma.ca)
  - one-stop shopping for all of our IT needs, including local office DSL
  - Many references
  - Competitive prices
  - Ottawa location lowers risk during migration, allows for easier access

Membership Update

Mike Milinkovich provided the Board a status update on the membership. Growth in Q3 was very positive, with a new Strategic Developer (Actuate) and twelve other members joining by the end of the quarter. In addition, a general meeting of the Membership has been planned for October 26 & 27 in Dallas.

Membership Update Sept 10, 2004

Additions since last board meeting

- Strategic Developer
  - Actuate
- Add-In-Provider
  - PureEdge
  - CompuWare
  - Thales
  - Soft Landing
  - Mentor Graphics
  - JBoss
  - Agitar
  - Motorola
  - M1 Global
- Associate
  - Social Physics
- Committed (in process)
  - CA
  - Systinet

First Quarterly Eclipse Members Meeting

When:		October 26, 27
Where:		AA Conference Center DFW
New Members Jump Start		Oct 26
Dinner		Oct 26
Reception	Oct 26	
Members Meeting		Oct 27

- Agenda
  - Introductions
  - Executive Director Report
  - Add-In-Provider Representative Report
  - Membership report and introductions of the 15 New Members
  - Eclipse Councils organization and update
  - Eclipse PMC Report to include
  - Quarterly in-depth focus area (deep dive)
  - Requirement Break Out section. This will be small group sessions to discuss requirements and priority desires on the themes and priorities of Eclipse.
  - Eclipse EcoSystem Update
  - Marketing Update
  - Financial Update
  - Governance Update

Bjorn Freeman-Benson raised the point that "Membership" clearly includes our Committers. Information on the status of committer membership at Eclipse will be included in future membership updates.

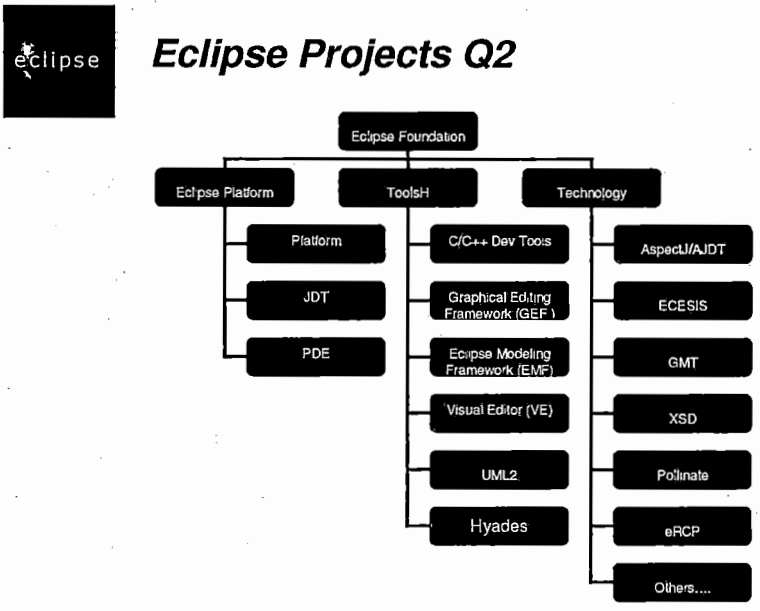

Project Update

Mike Milinkovich provided the Board with a status update on the open source projects at Eclipse. The key topics covered were:

1. In Q3 the number of projects at Eclipse grew quite substantially. This included the promotion of Hyades to its own top-level Test and Performance project, the creation of the WebTools project, and the BIRT proposal. In addition, a number of new projects were proposed for the Technology PMC.

2. In Q3 the Eclipse Councils (Requirements, Planning and Architecture) were formed and held their first meetings. This is a key milestone in implementing the Eclipse Development Process.

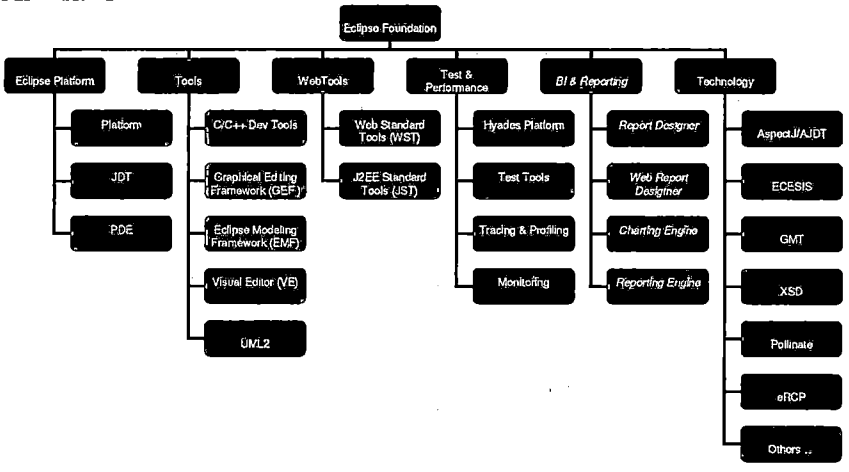

Eclipse Project Growth

Q3 Accomplishments

- Created two new top-level projects
  - WTP
  - TPTP
- Proposed a third new top-level project
  - BIRT
  - Creation review 9/22
  - Board approval meeting on 9/24
- *Lots* of activity in the Technology PMC
  - Pollinate created
  - eRCP proposed
  - Voicetools proposed
  - Ecomm to be proposed on Monday
  - Pipeline of additional proposals
    - Modelware (October)
    - SOA Blueprints (October)
    - SocialPhysics

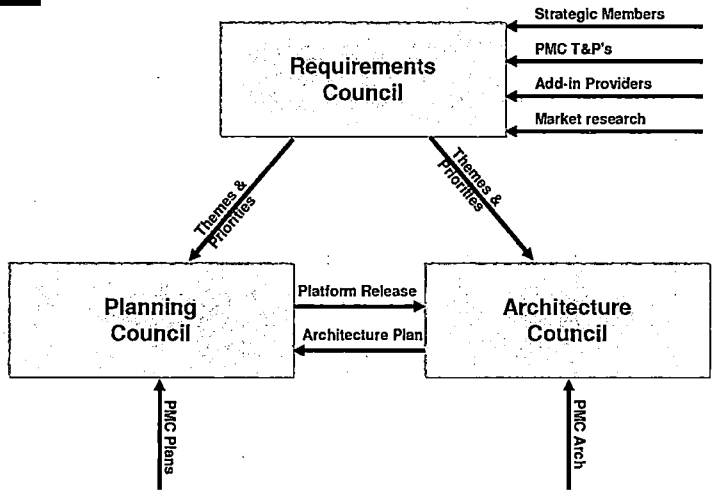

Eclipse Projects Q3

Eclipse Councils

The minutes of the Council meetings will be available on the Eclipse website.

Councils

Timeline

- Gather requirements, plans, architectures
  - Sept/Oct
- Prepare draft documents for each council
  - Nov
- Review by Councils and Board
  - Dec
- Exchange documents and begin process of convergence
  - Dec
- Expose for community review
  - Jan
- Council meetings for final approval
  - Feb
- Board vote for Roadmap approval
  - Feb 28, 2005 at Board meeting at EclipseCon

Exhibit Laks-5

Abridged Minutes of the Board Meeting of the Eclipse Foundation, Inc.
February 28, 2005

Attendees

Michael Bechauf (SAP)
Ed Cobb (BEA)
Mark Coggins (Actuate)
Boris Kapitanski (Serena)
Jonathan Khazam (Intel)
John Kellerman representing Dave Thomson (IBM)
Chris Morgan representing Tomas Evensen (Wind River)
Mike Norman (Scapa)
Mike Rank (HP)
Jim Saliba representing Rob Levy (Computer Associates)
Raaj Shinde (Borland)
David Tong (Sybase)
John Wiegand (Committer representative)
Todd E. Williams (Add-In Provider representative)
Mike Milinkovich (Executive Director)

Not in attendance

Dan Dodge (QNX)
Rich Main (Add-In Provider representative)
Jim Ready (MontaVista)

Location: Hyatt Regency Hotel, Burlingame, California.

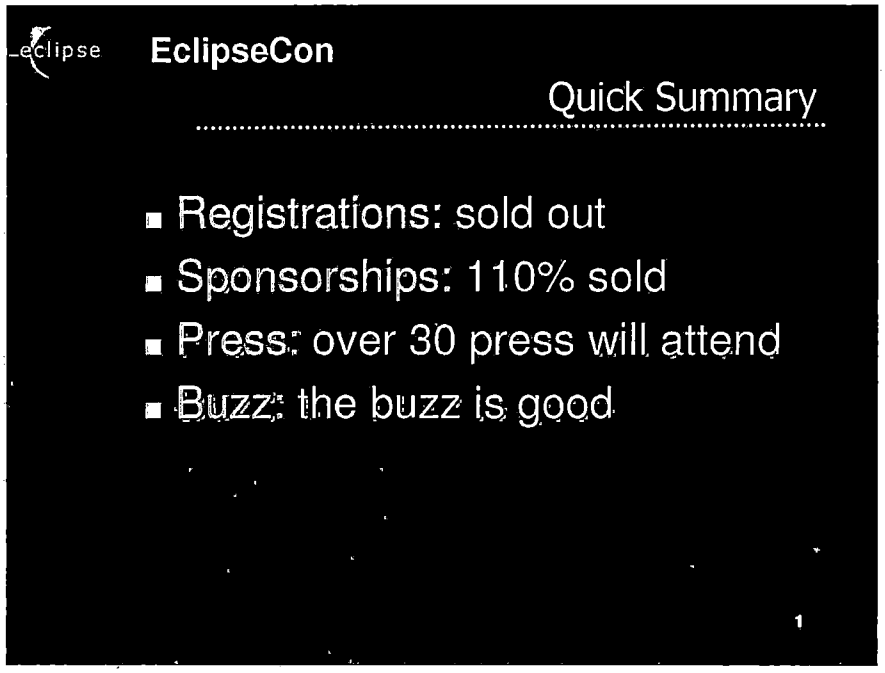

Board Items:

A number of resolutions were reviewed and approved by the Board. These resolutions included:

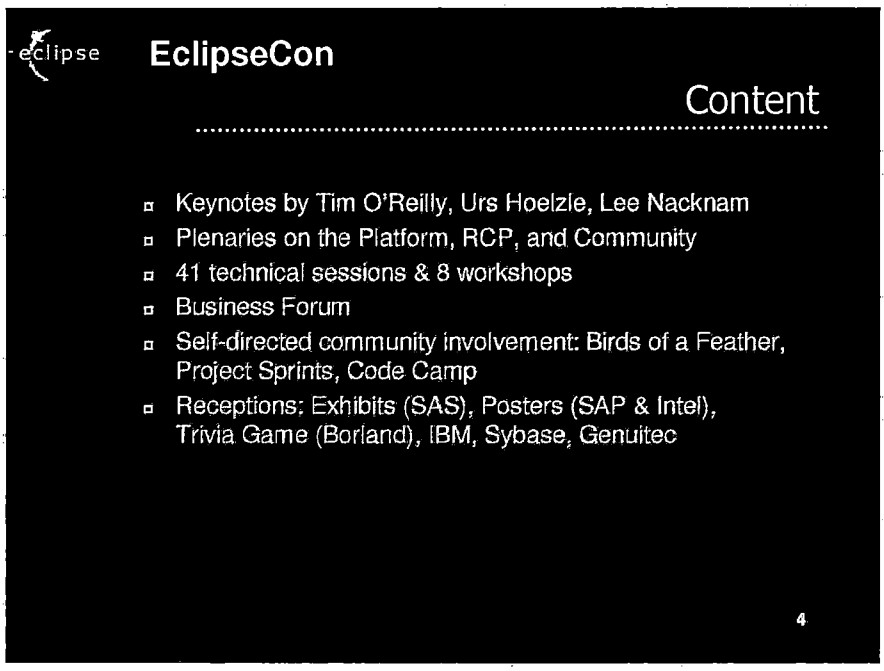

- The minutes of the January 28th and February16th phone calls were approved.
- A number of new board members were added due to the increase in the number of Strategic Developers. These include:
  - Ed Cobb (BEA)
  - Tomas Evensen (Wind River)
  - Mike Norman (Scapa)
  - Rob Levy (Computer Associates)
  - Raaj Shinde (Borland)
  - David Tong (Sybase)
- As a result of the recent elections, the following board members will begin one year terms on the Board commencing April 1st.
  - John Wiegand,
  - Kai-Uwe Maetzel,
  - Scott Lewis
  - Todd Williams,
  - Rich Main, and
  - Howard Lewis.
- As required under Section 6.7 of the Bylaws, the meeting of the Membership-at-Large on February 28, 2005 is designated as the annual meeting as required under the Bylaws.

EclipseCon 2005 Update

Mike Milinkovich provided the Board a status update on EclipseCon 2005. The key points are captured in the slides below:

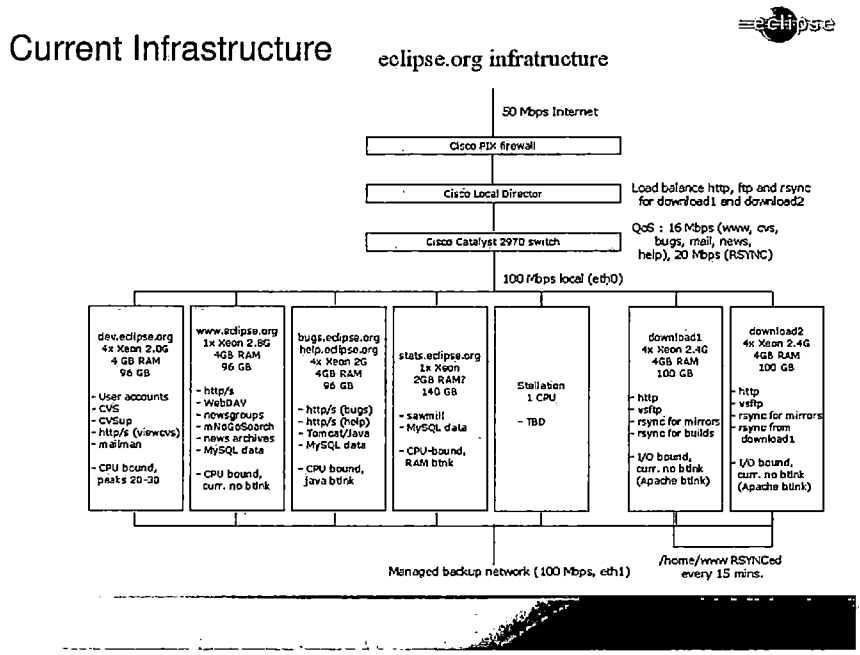

Eclipse.org Website Migration Status Update

Mike Milinkovich provided to the Board a status update on the migration of the www.eclipse.org website to a new hardware and software infrastructure. The goal of the Eclipse Foundation is to dramatically improve the look-and-feel and capabilities of the website during 2005. The first step is to install and configure the new hardware which has been donated by HP, IBM, and Intel.

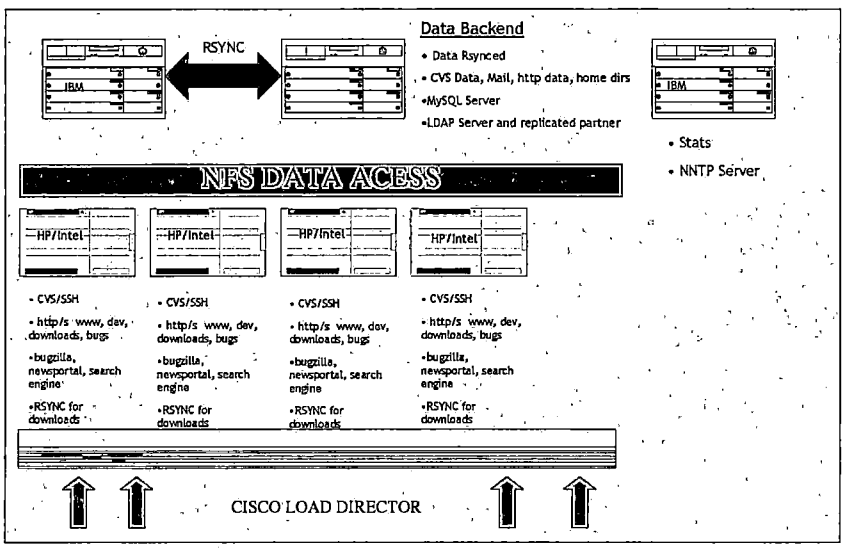

Issues

- No fault tolerance or high availability
  - Every server is a single point of failure
- No scalability
  - Every server is different
  - No load balancing
- Insufficient horsepower for the work we are doing

- Good news: new download page has resulted in significant (>15%) bandwidth usage reduction
  - Lesson: simple changes can have a large positive effect

New Architecture (contributed by Intel)

Planned Architecture: IBM backend, IPF II application servers

Next Steps

- Objective is to be running on new hardware by March 31st
- Starting an EMO-led team for a new software architecture and significantly enhanced capabilities
  - Denis Roy (IT), Bjorn Freeman-Benson (committer requirements), Ian Skerrett (user and member requirements), Susan Iwai (user community requirements)
  - First deliverable is focused on defining process
    - How do we gather community requirements?
    - More importantly, how do we prioritize community requirements
    - Those who are willing to contribute work (as opposed to ideas) will go to the front of the queue

Financial Update

Mike Milinkovich provided the Board a status update on the finances of the Foundation.

Eclipse Foundation Financials

- Deloitte & Touche have completed their audit of the Eclipse Foundation 2004 financial statements
- Financial Result for 2004
  - Revenue: $1.5M
  - Expenses: $1.1M
- Budget for 2005 (excluding EclipseCon)
  - Projected Revenue: $2.6M
  - Project Expenses: $2.6M

Eclipse Community | Information provided by the Eclipse Foundation

Eclipse Roadmap

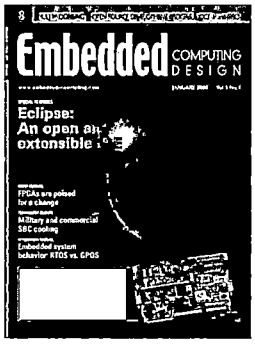

The Board reviewed and approved the Eclipse Roadmap document (http://www.eclipse.org/org/councils/roadmap.html) as drafted and approved by the Requirements Council, Planning Council and Architecture Council.

Membership Update

Mike Milinkovich provided the Board a status update on the marketing activities of the Foundation.

Press Coverage

- Cover story in January edition of Embedded Computing Design
- TPTP Project announced availability of 3.2 release
- EclipseCon press releases for Gold Sponsors and Business Forum
- Preparation for EclipseCon
  - 30+ editors and analysts in attendence
- Schwartz Communications hired as new PR agency (Feb. 1)

Press Plans for Q2/2005

- Follow on EclipseCon coverage
- Launch of Eclipse 3.1 in June

Analyst Coverage

- EclipseCon Briefings
  - Carl Zetie and John Rymer, Forrester Research
  - Michael Blechar, Gartner Group
  - Stephen O'Grady and James Governor, Redmonk
- Carl Zetie presenting at EclipseCon

EclipseCon Marketing

- Exhibit Hall Sold Out
  - 7 Gold Sponsors: Accelerated, Actuate, Agitar, Borland, HP, IBM, SAP
  - SAS, SAP, Intel, Borland , BEA sponsoring a reception
  - IBM, Sybase and Genuitec hosting a vendor reception
  - 37 Exhibitors in total
- 10 Media sponsors
  - OSTG, JavaPro, JavaLobby, SD Times most effective in driving web traffic
- Encouraged member companies to link to conference site
  - IBM, EPIC, Innoopract, Sybase, Exadel most effective
  - NOTE: Not all companies included a unique label for us to track
- Three tiered pricing help drive registrations
  - Dec. 31 and Jan. 31 prices went up so we saw an increase in traffic.

Eclipse Foundation, Inc.

Membership Update

Mike Milinkovich provided the Board a status update on the membership. Growth in membership continues to be strong.

Eclipse Working Groups

There have been a number of requests to the EMO to create ad hoc working groups of the members. In the December meeting, the Board authorized the EMO to support the creation of Eclipse Working Groups. Since then we have had the Eclipse Japan Working Group start, as well as a Market Study Working Group and an Embedded Marketing Working Group.

Market Study Working Group

- Market Research was #2 priority for Add-In Providers from Dallas Members meeting
- Jon Ward of IBM is leading a working group to initiate a market study.
- Evans Data has provided Eclipse a proposal for $60K to conduct this study.
- Working Group currently soliciting sponsors for the study from Member companies.
  - Interested companies: IBM, SAP, HP, Intel, TeamStudio, OC Systems, Instantiations, Genuitec

Embedded Marketing Working Group

- 8 companies have co-sponsored a booth at Embedded System Conference in San Francisco
  - QNX, TimeSys, Wind River, Accelerated, SlickEdit, RTI, Telelogic, ENEA

Instantiations CodePro Studio Brings Java Coding Best Practices to IBM WebSphere Development Tools

Version 1.2 Adds Powerful New Features that Facilitate Use of Industry Recommended Java Coding Practices to IBM WebSphere Studio Development Tools

Portland, OR – September 3, 2002 - Instantiations, a leading provider of advanced Java™ development and deployment solutions, announced today that it has begun shipping CodePro™ Studio 1.2, a comprehensive suite of products that enhance IBM WebSphere® Studio and Eclipse development environments. CodePro Studio helps ensure that Java developers deliver high quality software in record time at reduced cost. By seamlessly integrating into WebSphere development environments, CodePro Studio delivers extreme productivity and the ultimate developer experience.

Best practices are techniques or methodologies that, through experience and research, have proven to reliably lead to a desired result. In software development, a best practice is a well-defined method that contributes to a successful step in product development. Throughout the software industry, several best practices are widely followed such as coding standards, quality control and descriptive documentation.

"By automating essential Java coding best practices, we are liberating developers from tedious activities and enabling them to spend time on the more creative aspects of software development," said Allen Wirfs-Brock, Chief Technology Officer, Instantiations. "A commitment to using best practices in software development is a commitment to using all the knowledge and technology at one's disposal to ensure success."

CodePro Studio products automate many repetitive tasks, dramatically improve user interfaces, and streamline development activities. CodePro Studio gives developers a rich set of tools that are packed with valuable features in the areas of usability, collaboration, deployment, transition and best practices. The new Java coding best practices include; Design Patterns, Code Audit, Code Metrics, Javadoc Repair, JUnit Test Generation and Method and Field Wizards. CodePro Studio is the perfect complement to IBM's most popular WebSphere development environments.

Pricing and Availability

The price per developer for CodePro Studio Application Developer is $695, CodePro Studio WebSphere Developer is $995 and CodePro Studio WebSphere Developer Migration Edition is $1,295. The upgrade

is free to CodePro Studio customers who have a current support contract. For additional information or pricing on these products, please contact our sales department at (800) 808-3737 or by email at sales@instantiations.com. The products and free 30-day evaluations may be downloaded immediately from the company's web site at http://www.instantiations.com/codepro.

About Instantiations

Instantiations, Inc. provides leading edge software products, services, and technologies for Java. Through

our industry partnerships with IBM, Rational and Eclipse.org, Instantiations ensures that our products integrate seamlessly with the latest development environments and platforms. Based in Portland, Oregon, Instantiations was founded by a team of internationally recognized pioneers in the field of component software technology. Instantiations can be reached at (800) 808-3737. More information may be found at www.instantiations.com.

Federal Budget - $500-1,000,000
-they will defray
A %age
-they are looking to us
to find state support
for the facility

-they are looking for this t
be induced by State and County
government

-there is room for further
negotiation w/ the gov't

-we have to
4-10 mill. Needed

If we get it in place –
they want to contract back
to do the searches

advance docs required to set up
a meeting with the State would
be helpful

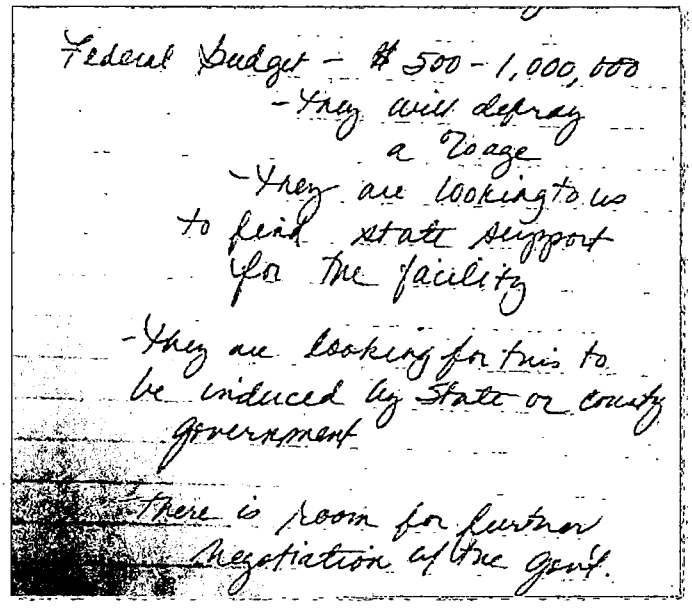

-State has incentive programs
Co. some incentive programs
which are statutorily
presented
-very unique project

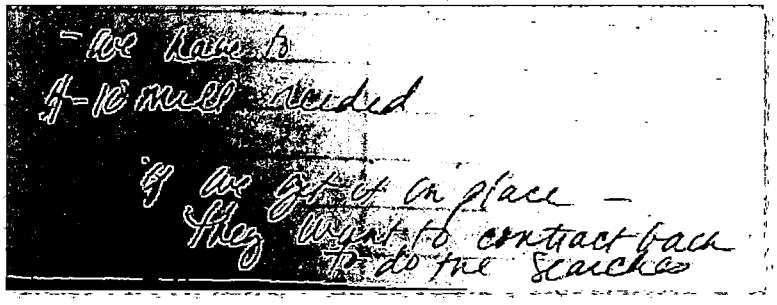

See the project w/ rent
Enhances ability to respond

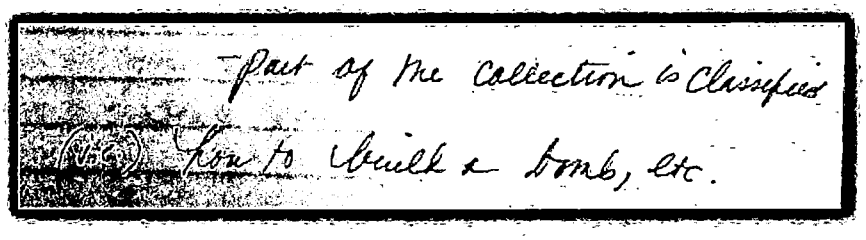

-the more we can understand what
the contract allows or doesn't
allow

-part of the collection is
classified
(i.e.) how to build a bomb, etc.

Nature of expectation GSA may
have-
bridge funding between
FOA-GSA
-building on Navy base

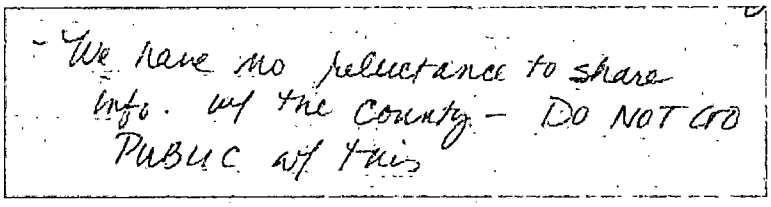

Transcript of Kelley Clements, Executive Assistant to Professor James P. Chandler, Stenographer's Notebook, Aug. 30, 2002

Available – building on DOE campus
where already a secure environment

-they're paying a fortune for
their facilities in Crystal City

-We have no reluctance to share
Info. w/ the County – DO NOT GO
PUBLIC w/ this

-will do a search re what is
already out there

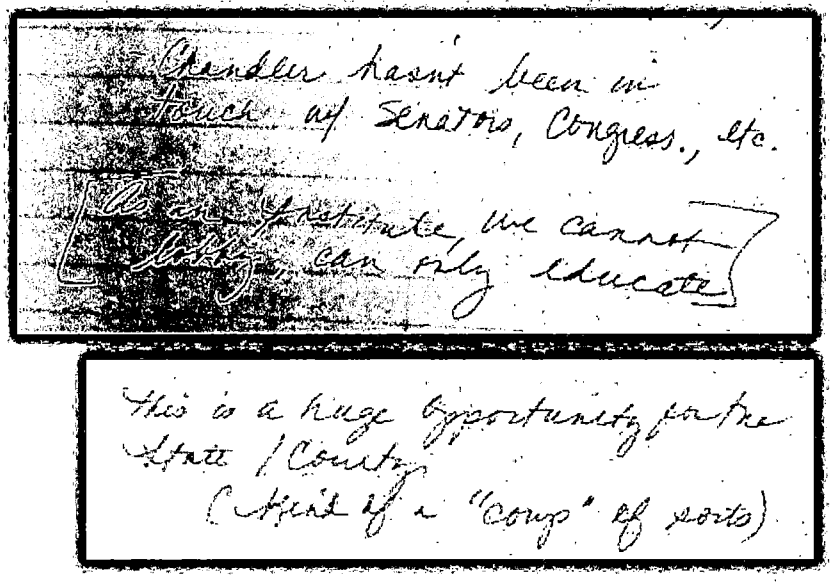

Janis will do

-think about spec

-will schedule meeting w/
State Officials (Election time [Sep-Oct, 2002]
State appts.)

-Chandler hasn't been in
Touch w/ Senators, Congress,
etc.

[As an Institute, we cannot
lobby, can only educate]

this is a huge opportunity for the
State / County
(kind of a "coup" of sorts)

-could give the state and
county global recognition

-there would be an immediate
Visibility of I.P.

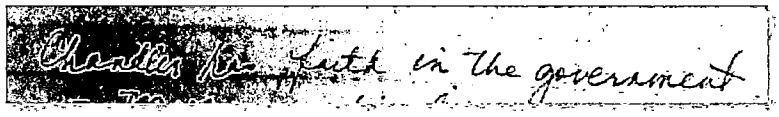

-paper presented to C.I.A
made public
-provide the game to

>programs of NIPLI
>as well as depth

-Reference to Nat'l Sec. Acad.
no info on www

Common Public License Version 0.5

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS COMMON PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

1. DEFINITIONS

"Contribution" means:

a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and

b) in the case of each subsequent Contributor:

i) changes to the Program, and

ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents " mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-

exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

a) it complies with the terms and conditions of this Agreement; and

b) its license agreement:

i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;

ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;

iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and

iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

a) it must be made available under this Agreement; and

b) a copy of this Agreement must be included with each copy of the Program.

Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a

commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR

ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against a Contributor with respect to a patent applicable to software (including a cross-claim or counterclaim in a lawsuit), then any patent licenses granted by that Contributor to such Recipient under this Agreement shall terminate as of the date such litigation is filed. In addition, If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. IBM is the initial Agreement Steward. IBM may assign the

responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

Exhibit D2

Common Public License Version 0.5

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS COMMON PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

1. DEFINITIONS

"Contribution" means:

a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and

b) in the case of each subsequent Contributor:

i) changes to the Program, and

ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents " mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-

exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

a) it complies with the terms and conditions of this Agreement; and

b) its license agreement:

i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;

ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;

iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and

iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

a) it must be made available under this Agreement; and

b) a copy of this Agreement must be included with each copy of the Program.

Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a

commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR

ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against a Contributor with respect to a patent applicable to software (including a cross-claim or counterclaim in a lawsuit), then any patent licenses granted by that Contributor to such Recipient under this Agreement shall terminate as of the date such litigation is filed. In addition, If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. IBM is the initial Agreement Steward. IBM may assign the

responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

1. Background

The Eclipse Foundation has made a policy decision to switch from the Common Public License ("CPL") to the Eclipse Public License ("EPL") for open source software published under its auspices. The differences between the two licenses can be summarized as:

- The Eclipse Foundation replaces IBM as the Agreement Steward in the EPL
- The EPL patent clause is revised by deleting the following sentence from Section 7 of the CPL:

  "If Recipient institutes patent litigation against a Contributor with respect to a patent applicable to software (including a cross-claim or counterclaim in a lawsuit), then any patent licenses granted by that Contributor to such Recipient under this Agreement shall terminate as of the date such litigation is filed."

For more detail refer to the actual license documents and the FAQ(s) that have been provided.

In order to effectuate the transition from the CPL to the EPL, the Eclipse Foundation will be seeking the agreement of each contributor to dual license their contributions under both the CPL and the EPL. This document contains a Draft Transition Plan to effect this change. The initial focus was mainly on the Platform, PDE, JDT, and CDT projects, which have synchronized content and (nearly) synchronized release dates in Summer 2004. However, the plan is intended to be comprehensive and cover all Eclipse projects.

2 CPL to EPL Transition Plan

2.1 Overview

The plan for transitioning from CPL to EPL is to license the current release of each Eclipse subproject, together with any maintenance updates that may be shipped from time to time, under both CPL and EPL for a transition period of approximately 6-8 months and will be roughly aligned with major releases of the Platform. This will hopefully give the community adequate time to adjust to the changes. If any projects find the timeframes to be impractical or feel the plan imposes an unreasonable burden for other reasons, they are encouraged to request an exception to the plan from the EMO. The EMO is prepared to work with projects to mitigate the impact of the license transition process.

Past release streams which were licensed under CPL only and are still in use (e.g. Eclipse 2.x), will continue to be supported as CPL only. As noted, maintenance streams of current releases will be dual licensed. New development streams going forward will operate under EPL only. Under the plan, most inbound contributions will be contributed

under both EPL and CPL during the transition period. Contributions to dual licensed streams under a single license will be possible but not encouraged, and will be handled as special cases (similar to the process currently used to deal with third party code that is not contributed under the CPL). The intention is that this process will be completed for all projects by December 31 2004. That is, by that date and for every project, CPL only development will cease, the current release will be offered under dual license, and new development will be EPL only.

At some well defined switchover date (currently expected to be in 1H05), all Eclipse development will move to EPL only. The exact date of the switchover will depend on individual project schedules, as well as the level community interest in dual licensed streams (requiring active maintenance, hence dual licensing on inbound contributions).

With regard to projects which have Summer 2004 releases, the plan is to hold the current dates and publish CPL licensed releases on schedule. As soon as is practicable thereafter, these projects will prepare dual licensed releases. Meanwhile, the Eclipse Foundation will attempt to contact all contributors to all projects to seek their agreement to license their contribution under both the EPL and CPL. As above, all projects should have re-licensed by December 31 2004.

2.2 Plan Details

The plan can proceed along three parallel tracks, Approval, Implementation, and Communications, each of which is discussed in more detail below. In each track there are a set of milestones which can be used to measure progress, and also provide an opportunity to adjust the plan based on feedback and circumstances.

2.2.1 Approval Track

2.2.1.1 Issue draft plan for review by Eclipse Foundation Board of Directors, their advisors, and Eclipse legal advisors (Completed).

2.2.1.2 Obtain Board Approval, possibly with modifications to the plan (Completed)

2.2.1.3 Create a subcommittee of the Board ("the Relicensing Committee") to monitor progress and provide direction re: plan execution (Completed).

2.2.1.4 Review and approval of Final Plan for implementing re-licensing (August 18).

2.2.1.5 Publish the final Plan and associated supporting documents on the Eclipse web site (August 25).

2.2.2 Implementation Track

2.2.2.1 August 2nd: Disseminate implementation plan (this plan) for review and comment (Completed).

2.2.2.2 August 18: Final Plan Approval (Mike Milinkovich)

2.2.2.3 August 16: Begin process of creating contributor knowledge base by surveying all projects (Kathleen Barry and Adrian Cho). Much of this work is already done as IBM has made available to the Foundation detailed lists of contributions made to the Platform and select other components led by IBM. In the course of doing this work, more detailed information may be collected on contributors and their contributions to assist with any downstream IP pedigree analysis. But the priority now is to facilitate the license transition process by first identifying contributors and then seeking their agreement to license their contributions under both the EPL and CPL.

The information needed for each committer or contributor:

a. personal contact data (essential: name, email address, project(s); optional: address, phone, fax)
b. does the person or their employer as appropriate agree that all of their contributions will also be licensed under the EPL.
c. does the person agree that their personal data may be collected and stored by the Eclipse Foundation.

Other information:
d. if a committer, have they read and agreed to the Eclipse Committer Agreement and the Eclipse Foundation IP Policy?
e. employment information (name and address of employer; is the person participating as an individual or on behalf of their employer; is subject to an employment relationship which transfers IP rights from employee to employer; does the employer consent to their participation in the project and contribution of code and artifacts under CPL and EPL; is the person "non-affiliated", i.e. neither an employee of an Eclipse Foundation member company nor a signatory of the Membership Agreement).

2.2.2.4 August 25: TRANSITION BEGINS

a) Communications materials will be finalized and relevant documents made available on the website. The documents will include:

- EPL FAQ (owned by Rich Main & Mike Milinkovich and based on input from reviews of this plan and other parties). The FAQ will continue to evolve even after initial publication.
- Transition Process FAQ (owned by Adrian Cho and Brian Barry) will be aimed at developers and cover questions specific to the transition process.
- Changes to Terms of Use and Software User Agreement (Adrian Cho).
- Communications to contributors (Kathleen Barry, Adrian Cho)

b) CPL-EPL Transition is in effect. All inbound contributions are by default now contributed under both the CPL and EPL and can be applied to any development or maintenance stream. Contributors can, if necessary, contribute under only one license; in such a case it is the responsibility of the contributor to clearly indicate the license

selected by copyright labels and other notices. Such single-license contributions and their incorporation into the code base will be handled on a case-by-case basis during the transition period, similar to the process used now for incorporating third party code not contributed under the CPL.
d) Foundation begins contacting all contributors. Kathleen Barry will handle the actual correspondence and compilation of results. Each case where the contributors cannot be contacted, where they do not wish for their contribution to also be licensed under the EPL, or where there are other issues, will be referred to Mike Milinkovich and handled on an individual basis.

2.2.2.5 CHANGES TO CONTENT

a) For releases that were already made available prior to August 25 2004 the CPL will be maintained. Those releases cannot be re-licensed without opening a maintenance or development stream based on that release.

b) For open streams, once a stream is ready for release under the EPL, the project has two re-licensing options:

i) Modify all the source files to change all legal notices. Modify all abouts, feature licenses, and feature update licenses.

OR

ii) As per i) but source files will NOT BE UPDATED. This means that source builds for the stream will contain source files with effectively "incorrect" license notices which will be "overridden" by the abouts, Software User Agreement and other content. The use of this mechanism will be well publicized and explained in other documentation on the website including the FAQ. Because it is possible to obtain content from www.eclipse.org in a variety of ways, this needs to be explained carefully. It is possible, for example, that users will obtain content directly from CVS and it will say "CPL" when it is actually both CPL and EPL. The license status for each project should be known and documented on the Eclipse web site.

Support (advice) for these content updating efforts will come from the PMCs and Adrian Cho.

Option i) is the preferred method. However, regardless of whether option i) or ii) is used, the notices may be changed to license under the EPL only or both the CPL and the EPL (see note below about restriction on open CPL streams after the Completion Date, December 31 2004).

Using one of the available options, projects should aim to provide dual licensed EPL/CPL content for their current release and its maintenance stream, as soon as is practical. New development going forward should be done under EPL only.

NOTE: The plan goal is that by the December 31 2004 completion date, there will be NO open CPL or CPL-EPL streams of development and that all appropriate source files will be modified with EPL notices. The Re-licensing Committee can approve exceptions to this rule, together with a stated duration for the exception. The criteria for considering an exception are: the size of the project; cost to completely change all source files; project schedules; and available resources.

2.2.2.6 December 31st – TRANSITION ENDS

a) Except for cases approved specifically by the Re-licensing Committee, all new development streams must be EPL

b) All projects are offering both EPL and CPL licensed versions of their current release.

2.2.2.7 1H05 – EXACT DATE TBD – LICENSE SWITCHOVER

a) Terms of Use changed to license all incoming contributions as EPL only

b) All CPL streams have been stabilized and all development is being done under EPL.

2.2.3 Communications Track

2.2.3.1 Ensure that EPL is approved by the Open Source Initiative and posted on the list of approved licenses on their web site (Completed).

2.2.3.2 Define overall communications strategy, including issues, talking points, etc. (Mike Milinkovich)

2.2.3.3 Press release and briefings as per communications strategy.

Tentative IP Log for eclipse.platform, eclipse.jdt and eclipse.pde

This tentative IP Log is generated dynamically from automatically collected project information. This information has not been vetted for accuracy by the Eclipse Foundation and may not represent the true state of the IP of this project(s). Please refer to the official approved IP Log(s) associated with the official release(s) of this project(s) for more information.

kernelv@gmail.com		
		some XML file can not be properly handled by

309902 (https://bugs.eclipse.org/309902)	1138 bytes	org.eclipse.pde.internal.core.text.XMLEditingModel when one attribute name is sub-string of another Attachment 165529: Patch to DocumentHandler.java
Aaron Maenpaa (gmail.com)		
201998 (https://bugs.eclipse.org/201998)	105203 bytes	Provide a wizard that generates NL fragments Attachment 116831: Addresses issues in comment #50
Achim Demelt (googlemail.com)		
278844 (https://bugs.eclipse.org/278844)	16396 bytes	[JUnit] Separate UI from non-UI code Attachment 145697: Fixes for concurrency issues
284885 (https://bugs.eclipse.org/284885)	1210 bytes	[launching] manage launch configurations using features (feature based launching) Attachment 159993: Patch to fix launching of legacy launch configs
Aditya Aswani (samsung.com)		
2cc542 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=2cc542db5dcda24fbb9f6e89d8b8a190d662cc05)	9 lines	**Bug 279147 (https://bugs.eclipse.org/279147)** - [patch] [samples] array index out of range error
545fb9 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=545fb959e5387c4d8c6b60a7a0416d5574b79fe1)	8 lines	**Bug 421636 (https://bugs.eclipse.org/421636)** - Selecting extension from quick outline (Ctrl-O) only works
Aghiles Abdesselam (ca.ibm.com)		
266970 (https://bugs.eclipse.org/266970)	11233 bytes	[CSS] Widget.setData keys should be qualified Attachment 131290: qualified updated
266146 (https://bugs.eclipse.org/266146)	2829 bytes	[CSS] JUnit for: Property retrieval must check instanceof and return null Attachment 126844: junit test for retrieveCSSProperty()
266804 (https://bugs.eclipse.org/266804)	14556 bytes	[CSS] borderVisible VS border-visible Attachment 127329: properties and junits updated
265232 (https://bugs.eclipse.org/265232)	17836 bytes	[CSS] CTabFolder extended properties are missing retrieveCSSProperty() Attachment 126485: retrieveCSSProperty() does not only return null & junit test
265214 (https://bugs.eclipse.org/265214)	42351 bytes	[CSS] Summary bug for Cascading Rule Tests and CTabFolder Properties Attachment 125948: CSS Properties and JUnits
266028 (https://bugs.eclipse.org/266028)	12085 bytes	[CSS] Property retrieval must check instanceof and return null Attachment 126618: instanceof check and will return null when appropriate
263184 (https://bugs.eclipse.org/263184)	1031 bytes	[CSS] Need Shell:active pseudo class Attachment 128268: fix in the junit test
271531 (https://bugs.eclipse.org/271531)	3316 bytes	[CSS] Button styleable properties Attachment 133183: Label and Button now have alignment stylable property
Alban Browaeys (yahoo.com)		
242788 (https://bugs.eclipse.org/242788)	914 bytes	a lot of popup ends up as null error Attachment 108896: check if the parent is disposed before setting the parent as the shell (and use display instead if so)
250707 (https://bugs.eclipse.org/250707)	977 bytes	[Proxy] remains an issue : if gnome proxy is set to direct connection pd is null and the java code does not handle that Attachment 114991: Fix the bug about gnome direct connection triggering a null pointer exception

Aleksandra Wozniak (gmail.com)		
239959 (https://bugs.eclipse.org/239959)	29364 bytes	Adding content to Compare with other resource dialog by drag&dropping Attachment 108951: patch #8
243873 (https://bugs.eclipse.org/243873)	1546 bytes	NPE in Compare with Other dialog Attachment 109784: patch #1
240294 (https://bugs.eclipse.org/240294)	1535 bytes	Unused class in source code Attachment 107446: Removes Messages.java from org.eclipse.compare.internal
241539 (https://bugs.eclipse.org/241539)	1995 bytes	Key binding for Compare with Other dialog Attachment 109790: patch #1
244623 (https://bugs.eclipse.org/244623)	974 bytes	Cannot perform compare from Compare with Other dialog Attachment 110399: patch #1
Alena Laskavaia (gmail.com)		
5145ec (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=5145ec03a715093278a5e4613602988186b9e38e)	26 lines	**Bug 441659 (https://bugs.eclipse.org/441659)**: Image Browser does not advance on Show more
77e7d5 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=77e7d5c05d104afb4e72d02bfdbfc544ad7ac746)	20 lines	**Bug 480752 (https://bugs.eclipse.org/480752)** - Remove dead method JavadocTagOperation#updateMonitor
829028 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=8290283e8cf35ffcf2721773743fd15ce49dc09a)	157 lines	**Bug 481613 (https://bugs.eclipse.org/481613)** - [Plugin Image Browser] add pagination controls
a853a1 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=a853a1512b79385ecf3339d713eea0a3968977e2)	86 lines	**Bug 477016 (https://bugs.eclipse.org/477016)**: Image Browser: needs path filter
ad44e5 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=ad44e52ec92fd981cd4a10d82a32724dab17a707)	184 lines	**Bug 453392 (https://bugs.eclipse.org/453392)** - No debug options help
ea05fd (http://git.eclipse.org/c/pde/eclipse.pde.build.git/commit?id=ea05fde9ea49686908385f35eaf4e657a594bcc3)	8 lines	**Bug 432399 (https://bugs.eclipse.org/432399)** - [Import/Export] Export feature not exporting empty folders
259281 (https://bugs.eclipse.org/259281)	2002 bytes	[launch] When using Environment tab it does not process variables with newline correctly Attachment 120865: proposed patch
Alex Blewitt (gmail.com)		
24222b (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=24222b61ddb2f64c5adef043929bc43dfabffa37)	10 lines	Suggested fix for **Bug 491193 (https://bugs.eclipse.org/491193)**
585678 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=585678758449fc2f8471be099e7798db3a58b784)	7 lines	**Bug 469803 (https://bugs.eclipse.org/469803)** - Add Eclipse-SourceReferences to autocomplete
665c6b (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=665c6be26f708ce414df6852464946500207ff40)	3 lines	Register the viewer as the selection provider
6f7511 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=6f75112103a3c3d9df02b8978853e1308db5e062)	70 lines	**Bug 474069 (https://bugs.eclipse.org/474069)** - Replace new Boolean with Boolean.valueOf
95ad7b (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=95ad7b194d9a98b93cd129f464dd5380842cf3a9)	83 lines	**Bug 476691 (https://bugs.eclipse.org/476691)** - Warn when Service-Component used without activation
a96a5d (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=a96a5d04071f4252061c8f91c143eaf88b358886)	18 lines	**Bug 491193 (https://bugs.eclipse.org/491193)** - Remove traces of HelloWorld template
b5343e (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=b5343eb76ce7234793c21d34d8ddd99e809b6637)	382 lines	**Bug 489697 (https://bugs.eclipse.org/489697)** - Replace calls to new Integer() with Integer.valueOf()

c10a80 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=c10a8080908b4d4cb6acdb76bdcad76bce05e0b3)	22 lines	**Bug 297143 (https://bugs.eclipse.org/297143)** - Default to not generating an activator
d56b8f (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=d56b8f3654a7ce6cd6b7e7622b766763dea56d18)	83 lines	**Bug 476691 (https://bugs.eclipse.org/476691)** - Warn when Service-Component used without activation
d65119 (http://git.eclipse.org/c/platform/eclipse.platform.common.git/commit?id=d65119c0536402714ab7c5025756d2b1cd22278d)	4 lines	**Bug 474098 (https://bugs.eclipse.org/474098)** - Add clearPersistedState documentation
fd993a (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=fd993a71c242be009964f44b8e7947aeb1fb7dcf)	8 lines	**Bug 489606 (https://bugs.eclipse.org/489606)** - Only warn about missing Application.e4xmi
210826 (https://bugs.eclipse.org/210826)	827 bytes	Enabled on NSButton seems to have no effect Attachment 83685: Enables the button.enable to work
Alexander Kitaev (gmail.com)		
320802 (https://bugs.eclipse.org/320802)	1135 bytes	ASTParser.createASTs(..) fails silently on multiple missing parameter types. Attachment 175141: patch (for org.eclipse.jdt.core_3.7.0.vB_03)
Alexander Koptelov (ru.ibm.com)		
b7a292 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=b7a292c186579f8af46f30c18a1120221e8f7c8d)	13 lines	**Bug 484797 (https://bugs.eclipse.org/484797)** - [patch] - External plugin dependencies are lost after
Alexander Kurtakov (redhat.com)		
01d4fc (http://git.eclipse.org/c/platform/eclipse.platform.common.git/commit?id=01d4fcee1a19fc2372c82d13e536e6c63176b7dc)	6 lines	**Bug 429229 (https://bugs.eclipse.org/429229)** - Fix strict bin.includes warnings
115eb7 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=115eb7f7a9b12243207fe3ac71d3b31c8cbe0dd5)	1609 lines	**Bug 415649 (https://bugs.eclipse.org/415649)** - Don't create new cursor and dispose it
13c66f (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=13c66fbc10081891b55495b916d7a2d3432dbbb0)	40 lines	**Bug 415608 (https://bugs.eclipse.org/415608)** - Use FrameworkUtil.getBundle instead of deprecated
2add11 (http://git.eclipse.org/c/platform/eclipse.platform.git/commit?id=2add11485c732c9a1090c220b323cf8f5755c518)	66 lines	**Bug 482106 (https://bugs.eclipse.org/482106)** - Reduce warnings in workbench
32b197 (http://git.eclipse.org/c/platform/eclipse.platform.git/commit?id=32b19733226878191c596158f257d1c181081aa0)	114 lines	**Bug 482106 (https://bugs.eclipse.org/482106)** - Reduce warnings in workbench
4daab3 (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=4daab3e6c100f4f5b060f35d7708ff29c483cb6a)	36 lines	**Bug 415601 (https://bugs.eclipse.org/415601)** - Fix deprecation warnings
5f1fbd (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=5f1fbdaf979a64ad261371917a61debd985a604c)	33 lines	**Bug 416438 (https://bugs.eclipse.org/416438)** - Don't use deprecated [Default|Instance]Scope() constructors
62e6a5 (http://git.eclipse.org/c/platform/eclipse.platform.git/commit?id=62e6a5f5bdecadb39dec38fc130a92db4c787057)	1 lines	**Bug 464845 (https://bugs.eclipse.org/464845)** - Use API instead of restricted classes for getting Compiler
6a79c5 (http://git.eclipse.org/c/platform/eclipse.platform.common.git/commit?id=6a79c5f3e559c7ea0e8046bc4c341a315d031644)	2 lines	**Bug 451961 (https://bugs.eclipse.org/451961)** - Update maven-dependency-plugin in eclipse.platform.common
9b4a1d (http://git.eclipse.org/c/platform/eclipse.platform.git/commit?id=9b4a1d6dbcd5d844ba817f900b95dcd8ffb846be)	386 lines	**Bug 482106 (https://bugs.eclipse.org/482106)** - Reduce warnings in workbench
acce2e (http://git.eclipse.org/c/platform/eclipse.platform.common.git/commit?id=acce2e2db5a6eb3beee7952f3bd233a34e3cdd3c)	66 lines	**Bug 433236 (https://bugs.eclipse.org/433236)** - Consolidate maven-dependency-plugin configuration
b2b930 (http://git.eclipse.org/c/platform/eclipse.platform.common.git/commit?id=b2b9307661cb0f98494e3881aaab7cb79cdf1740)	15 lines	**Bug 428514 (https://bugs.eclipse.org/428514)** - Merge the examples project that contain only views.
b61e16 (http://git.eclipse.org/c/platform/eclipse.platform.common.git/commit?id=b61e164480b820b24bf54aae26a0d510e4fea6b1)	2 lines	**Bug 474660 (https://bugs.eclipse.org/474660)** - Update maven-dependency-plugin to 2.10

be77df (http://git.eclipse.org/c/platform/eclipse.platform.git/commit?id=be77df48fc6087ef5efa46d77112fd8effa07d56)	24 lines	**Bug 482106 (https://bugs.eclipse.org/482106)** - Reduce warnings in workbench
d3ddd8 (http://git.eclipse.org/c/platform/eclipse.platform.git/commit?id=d3ddd8664978d4f4ad1732937cea73cc18dcad43)	130 lines	**Bug 482106 (https://bugs.eclipse.org/482106)** - Reduce warnings in workbench
fcfa55 (http://git.eclipse.org/c/platform/eclipse.platform.git/commit?id=fcfa55e786ab15dcc5c8810f1c8a9a924dd7cd3e)	97 lines	**Bug 488825 (https://bugs.eclipse.org/488825)** - Ant runtime preferences page has weird colors
Andi Thomas (csc.com)		
231327 (https://bugs.eclipse.org/231327)	1228 bytes	Tabbing into table sets focus to first column regardless of its visibility Attachment 120765: Changes as a patch
Andrea Guarinoni (gmail.com)		
0cd93d (http://git.eclipse.org/c/pde/eclipse.pde.ui.git/commit?id=0cd93d523e13847127999c82a624f8939ecbaa77)	46 lines	Provide resonable PDE defaults for syntax color in Dark theme
Andreas eiÃÅžner (andreasmeissner.de)		
351272 (https://bugs.eclipse.org/351272)	1491 bytes	[Help][Index] Keyword Index: Blank line after parent nodes that link a help page Attachment 199181: Patch that fixes the described bug by modifiying the method IndexPart.getChildren(IIndexEntry)
Andreas Bjoru (bjoru.com)
