

- 3) At 15 I was admitted on scholarship to both Phillips Academy Andover and Phillips Exeter Academy, and I matriculated to Exeter.
- 4) Exeter integrates combinatorics into its standard mathematics curriculum starting in precalculus, which I completed in an accelerated program for only the best math students.
- 5) In 11th grade I scored the highest possible mark on the college-level advanced placement (A.P.) computer-science A/B exam and won Exeter's highest computer-science prize, in large part for my work on game theory (A.I.) and combinatorics.

5. This declaration is a concise exposition of the results of a detailed analysis and set of computer simulations, the methodologies and source code of which are laid out in the accompanying Declaration re Data and Tables (Feb. 1, 2024), Exh. E.

6. Using the attachments from my accompanying Declaration re Data and Tables, I calculated that the apparent likelihood of Judge Sandra Lynch’s assignments to all the First Circuit’s last 10 published decisions most important to Massachusetts Health and Human Services (H.H.S.)—as had happened since 2004—was 0.0097931940472 percent, or less than one in 10,211.³

Date	Case Name	Citation	Odds of Assignment

Oct. 18, 2016	<i>Sherkat v. New England Vill., Inc.</i>	691 F. App'x 644	54/133
Probability of all			0.019465294478155
That likelihood computes into odds worse than one out of			51
The odds of flipping a coin five times and getting only heads are one out of			32

11. A billion computer simulations of the random assignments of the cases directly above yielded a roughly equivalent empirical probability of Judge Lynch's assignment to every case in the set: 2.0339953 percent.⁸

⁷ See Decl. re Data and Tables, Attachms. 1 (source of odds), 10 (source of cases).

⁸ See Decl. re Data and Tables, Attachm. 13 (inside CSV.zip, log.txt at line 1783 (20,339,953 out of a billion)).

12. I further calculated that Judge Lynch’s combined apparent likelihood of assignment to all the First Circuit’s Massachusetts H.H.S., D.C.F. and D.D.S. cases, above, ¶¶ 6-10, was 0.0000000829183 percent, or less than one out of 1.2 billion. The likelihood of a single ticket winning the Powerball jackpot is more than four times better.⁹

Likelihood of Mass. H.H.S. case assignments	0.000097931940472
Likelihood of Mass. D.C.F. case assignments	0.000434975824897
Likelihood of Mass. D.D.S. case assignments	0.019465294478155
Combined likelihood of all above case assignments	0.00000000829183
That likelihood computes into odds worse than one out of	1,206,006,202
Odds of flipping a coin 30 times and getting only heads	0.00000000931323
That likelihood computers into odds of one out of	1,073,741,824

13. A billion computer simulations of the random assignments of the cases directly above failed to produce a single result in which Judge Lynch was assigned to all of the cases in those three sets. This is consistent with my calculation of odds lower than one in a billion.¹⁰

14. In my opinion, to believe that Judge Lynch’s assignments to Massachusetts H.H.S., D.C.F. and D.D.S. cases were random is absurd.

15. I am yet to calculate the apparent odds of Judge Lynch’s assignments to seven of the court’s nine most discretionary published decisions during her tenure listing Harvard University, its presidents and fellows, its medical school, or its cancer research center as

⁹ See, e.g., Winters, *Here are the odds you’ll win the \$439 million Powerball jackpot*, CNBC (Jan. 14, 2023) (“The odds of winning the Powerball jackpot by matching all numbers with the five white balls and red Powerball drawn are 1 in 292,201,338, according to the lottery”), available at <https://www.cnbc.com/2023/01/14/powerball-odds-of-winning-jackpot.html> (accessed June 21, 2023).

¹⁰ See Decl. re Data and Tables, Attachm. 13 (inside CSV.zip, log.txt at line 1792 (zero out of a billion)).

litigants or interested parties, as also had happened,¹¹ but the relevant computer simulations yielded empirical odds of 2,974,133:125,000,000, or 2.3793064 percent.¹²

16. Additionally, Judge Lynch was assigned to 50 of the First Circuit's 91 decisions most obviously implicating either Massachusetts or federal H.H.S. during her time on the Court.¹³

¹¹ See Decl. re Data and Tables, Attachm. 12.

¹² See Decl. re Data and Tables, Attachm. 13 (inside CSV.zip, log.txt at line 1801 (23,793,064 out of a billion)).

^F Barron first appears in Lexis July 29, 2014; see 760 F.3d 126.

^G The Honorable Juan Torruella died in office Oct. 26, 2020.

17. In a billion randomized computer simulations of the assignments of those 91 H.H.S. and related cases, Judge Lynch was assigned to 49 or fewer 998,831,943 times and to 50 or more 1,168,057 times.¹⁴

18. The observed likelihood of Judge Lynch's actual H.H.S.-related case assignments was thus 0.1168057 percent.

19. In my opinion, to believe that Judge Lynch's assignments to those 50 state and federal H.H.S. cases were random is absurd.

20. Judge Lynch was also assigned to 43 of the First Circuit's 91 decisions most obviously implicating state social-services agencies.

21. In a billion randomized computer simulations of the assignments of those 91 cases, Judge Lynch was assigned to 42 or fewer 908,679,109 times and to 43 or more 91,320,891 times.¹⁵

22. The observed likelihood of Judge Lynch's actual social-services-agency-related case assignments was thus 9.1320891 percent.

23. In every instance tested, Judge Lynch's actual case assignments lie entirely outside or just barely within the empirical bell curve, as indicated in the marked-up charts directly below, wherein a red circle or X indicates Judge Lynch's actual number of assignments.

¹⁴ See Decl. re Data and Tables, Attachm. 13 (inside CSV.zip, log.txt at line 1819 (1,168,057 out of a billion)).

¹⁵ See Decl. re Data and Tables, Attachm. 13 (inside CSV.zip, log.txt at line 1828 (91,320,891 out of a billion)).

24. Judge Lynch's assignments to social-services-related cases also exhibit an apparent skew toward the Massachusetts D.C.F.: Her Honor sat for 43 of 91 social-services-related cases from throughout the circuit,¹⁶ but, differentiated, Her Honor's results are 17 for 45 outside Massachusetts (37.8%) and 26 for 46 inside Massachusetts (56.52%).¹⁷

^A Thompson first appears in Lexis May 14, 2010; see 2010 U.S. App. LEXIS 27462.

^B Kayatta first appears in Lexis May 8, 2013; see 2013 U.S. App. LEXIS 26065.

^C Barron first appears in Lexis July 29, 2014; see 760 F.3d 126.

^D The Honorable Juan Torruella died in office Oct. 26, 2020.

25. I am yet to calculate the apparent odds of Judge Lynch's assignments to at least 26 of the above 46 Massachusetts social-services-related cases, or to five out of every seven such cases from

¹⁶ See Decl. re Data and Tables, Attachm. 5.

¹⁷ See Decl. re Data and Tables, Attachm. 9.

2012 onward (15 of 21), as also happened. But those odds, too, will each be slim.

26. I am also yet to calculate the apparent odds of Judge Lynch's assignments to 10 of the last 13 published decisions in Massachusetts criminal or habeas cases most obviously implicating child protection, as happened,¹⁸ but they, also, will be slim.

27. Absent Her Honor's more-frequent-than-expected assignments, Judge Lynch could not have played the outsize role that she did in writing the precedents followed by this Court in such cases.

28. The U.S. Court of Appeals typically assigns a panel of three judges to decide an appeal; usually, but not always, the panel elects a single member to write the decision and receive attribution. Other times the decision is issued *per curiam*, i.e. attributed to the court instead of to a single judge. Thus, on average, U.S. appellate judges are attributed for writing under a third of their decisions.

29. Judge Lynch, however, wrote three quarters (six of eight) of the decisions attributed to a single judge in the nine cases, above, ¶ 8, paramount to the Massachusetts D.C.F.¹⁹

30. Of Her Honor's 26 above-mentioned Massachusetts social-service-related decisions, Judge Lynch wrote 14 of the 25 attributed to a single judge (56%).²⁰

31. Of the millennium's five published decisions most important to the Massachusetts Department of Developmental Services, Judge Lynch wrote three of the four attributed to a single judge (75%).²¹

¹⁸ See Decl. of Martin Gottesfeld re Data and Tables, Attachm. 8.

¹⁹ See Decl. re Data and Tables, Attachm. 7.

²⁰ See Decl. re Data and Tables, Attachm. 5.

²¹ See Decl. re Data and Tables, Attachm. 10.

32. Of Her Honor's seven above-mentioned Harvard decisions, Judge Lynch wrote two of the four, i.e. half, of those attributed to a single judge, including the *Students for Fair Admissions* decision recently overturned by the Supreme Court.²²

33. And, of Judge Lynch's 50 Massachusetts and federal H.H.S. decisions referenced above, Her Honor wrote 19 of the 31 attributed to a single judge (61.3%).²³

34. Given Judge Lynch's apparent interest in these cases, as demonstrated by her prolific decision-writing, and the miniscule likelihood of such frequent assignments, many or most of Judge Lynch's H.H.S., Harvard, and social-services-related decisions are far more likely the result of human intent than random selection. To believe otherwise would be, again, absurd.²⁴

²² See Decl. re Data and Tables, Attachm. 12.

²³ See Decl. re Data and Tables, Attachm. 3.

²⁴ The above reflects data ending in August 2021 and does not reflect Judge Lynch's subsequent assignments to H.H.S., Harvard and social-services-related cases.

I declare the foregoing is true and correct under the penalty of perjury under the laws of the United States of America. 28 U.S.C. §§ 1746, 2242. Executed Thursday, February 1, 2024,
