Hi Ben

Per our telcon, see [REDACTED]'s e-mail below also, Triconmmiic's web site shows a relationship with the company below Quantum Microwave which Custom MMIC is familiar with that owner. They don't manufacture MMIC products so the brochure that is linked below which is 3A001.b.2 is not manufactured by Quantum Microwave so Triconmmic must be getting product from another source.

I talked with [REDACTED] after our call and he indicated that [REDACTED] will work with you.

Please let me know if you need anything else.

Take care

[REDACTED]
