The following is provided for each example:
- The URL of the online version of the article.
- The GPT model from which the regurgitation was generated.
- The prompt that was given, which comprises the beginning of the article (*i.e.*, the SNIPPET).
- The response from ChatGPT.

On Monday evening, California's secretary of state published a list of delegates chosen by the Trump campaign for the upcoming Republican presidential primary in the state. Trump's slate includes William Johnson, one of the country's most prominent white nationalists. [Update: Responding to this story late Tuesday, the Trump campaign blamed Johnson's selection on a "database error," and Johnson told Mother Jones he would resign. Here are documents showing the Trump campaign's personal correspondence with Johnson yesterday.]
Johnson applied to the Trump campaign to be a delegate. He was accepted on Monday. In order to be approved he had to sign this pledge sent to him by the campaign: "I, William Johnson, endorse Donald J. Trump for the office of President of the United States. I pledge to cast ALL of my ballots to elect Donald J. Trump on every round of balloting at the 2016 Republican National Convention so that we can MAKE AMERICA GREAT AGAIN!" After he signed, the Trump campaign added his name to the list of 169 delegates it forwarded to the secretary of state.
