## Population Counts from June 1, 2022 through June 30, 2022

Source: ICE Integrated Decision Support (IIDS), 07/05/2022

IIDS is a data warehouse that contains dynamic data extracts from the Enforcement Integrated Database (EID).

FY2022 data: IIDS as of 07/05/2022; EID data through 07/04/2022

Average Daily Population is calculated by the total daily population divided by the number of days in the month

Total Daily Population includes single adults and individuals in family units

Until March 15, 2022, ERO was appropriated funding for approximately 34,000 detention beds nationwide on any given day, which included single adult bedspace for an average daily population of 31,500 and 2,500 family unit beds, to support its mission to enforce immigration law. As of March 15, 2022, ERO had funding for detention beds to maintain space for an average daily population of 31,500 single adults. As of March 15, ICE did not receive funding specifically intended for the 2,500 family unit beds. ICE’s access to its full inventory of bedspace is severely limited due to various court orders limiting the intake of noncitizen detainees, an increase in detention facility contract terminations, detention facility contract modifications, and the ongoing COVID-19 pandemic. Last year, the U.S. District Court for the Central District of California issued a nationwide preliminary injunction recognizing the 75% capacity limit, and ordering ICE to maintain additional strict standards to reduce the risk of COVID-19 infection. See *Fraihat v. ICE*, 445 F.Supp.3d 709 (C.D. Cal. Apr. 20, 2020). In light of these mandates, ICE’s available bedspace inventory was only approximately 28,933 beds.

### **ICE Removals**

ICE Removals include Returns. Returns include Voluntary Returns, Voluntary Departures and Withdrawals Under Docket Control.

ICE Removals include aliens processed for Expedited Removal (ER) or Voluntary Return (VR) that are turned over to ERO for detention. Aliens processed for ER and not detained by ERO or VR after June 1st, 2013 and not detained by ERO are primarily processed by Border Patrol.

Starting in FY2009, ICE began to “lock” removal statistics at the end of each fiscal year and counted only the aliens whose removal or return was already confirmed. Aliens removed or returned in that fiscal year but not confirmed until after the end of that fiscal year were excluded from the locked data and thus from ICE statistics. To ensure an accurate and complete representation of all removals and returns, ICE will include the removals and returns confirmed after the end of that fiscal year into the next fiscal year. The number of removals in FY2009, excluding the "lag" from FY2008, was 387,790. The number of removals in FY2010, excluding the "lag" from FY2009, was 373,440. This number does not include 76,732 expedited removal cases which ICE closed on behalf of CBP in FY2010. Of those 76,732, 33,900 cases resulted from a joint CBP/ICE operation in Arizona. ICE spent \$1,155,260 on those 33,900 cases. The number of removals in FY2011, excluding the "lag" from FY2010, was 385,145. The number of removals in FY2012, excluding the "lag" from FY2011, was 402,919. The number of removals in FY2013, excluding the "lag" from FY2012, was 363,144. The number of removals in FY2014, excluding the "lag" from FY2013, was 311,111. The number of removals in FY2015, excluding the "lag" from FY2014, was 231,250. The number of removals in FY2016, excluding the "lag" from FY2015, was 235,524. The number of removals in FY2017, excluding the “lag” from FY2016, was 220,649. The number of removals in FY2018, excluding the “lag” from FY2017, was 252,405. The Number of removals in FY2019, excluding the "lag" from FY2018, was 262,591. The number of removals in FY2020, excluding the “lag” from FY2019, was 177,516. The number of removals in FY2021, excluding the “lag” from FY2020, was 55,355.

FY Data Lag/Case Closure Lag is defined as the physical removal of an alien occurring in a given month; however, the case is not closed in EARM until a subsequent FY after the data is locked. Since the data from the previous FY is locked, the removal is recorded in the month the case was closed and reported in the next FY Removals. This will result in a higher number of recorded removals in an FY than actual departures.

All stats are pulled based on Current Program which attributes all cases back to the Program of the processing officer of the event. However, if Current Program = OPL, XXX, ZZZ, or null, then Event Program is used.

Expedited removals include cases have one of the following case categories:

[8F] Expedited Removal [8G] Expedited Removal - Credible Fear Referral, [8H] Expedited Removal - Status Claim Referral, [8K] Expedited Removal Terminated due to Credible Fear Finding / NTA Issued.

Month break out of Expedited Removals is based on fiscal month of departure.

ICE Initial Book Ins are matched to ICE Removal record based on person-level details (Person record) where the ICE Initial Book In occur prior to the ICE Removal date. The ICE Initial Book In June not be directly related to the matched ICE Removal.
